Rev. May 2017

Check fridge temperature at the beginning and end of each day. Vaccines must be stored between 2°C-8°C at all times. Take immediate action if they have been exposed to temperatures outside of normal storage range.

Take immediate action if products have been exposed to temperatures outside of 2°-8°C. **DO NOT DISCARD PRODUCTS!** Quarantine products, label **DO NOT USE** and maintain between 2°-8°C while awaiting direction from the regional Immunization Supervisor/Ministry of Health.
