Ms. Kathy Gesy

Pharmacy Leader, Oncology Pharmacist
Saskatchewan Cancer Agency

PREFACE

OBJECTIVES

The Drug Plan has been established to:

- provide coverage to Saskatchewan residents for quality pharmaceutical products of proven therapeutic effectiveness;
- reduce the direct cost of prescription drugs to Saskatchewan residents;
- reduce the cost of drug materials;
- encourage the rational use of prescription drugs.

THE FORMULARY

The Saskatchewan Formulary is a listing of the therapeutically effective drugs of proven high quality that have been approved for coverage under the Drug Plan. It is compiled by the Minister of Health with the advice of the Drug Advisory Committee of Saskatchewan (DACS) and is published annually, with regular updates.

The members of the DACS are appointed by the Minister of Health and provide independent, specialized advice on drug-related matters. The membership on the DACS is composed of two public representatives as well as clinical specialists in the areas of medicine, pharmacology, pharmacy, and economics.

The ongoing work of the DACS includes the evaluation of new products, as well as the re-evaluation of products as required. The goal is to list a range and variety of drugs that will enable prescribers to select an effective course of therapy for most patients.

THE DRUG REVIEW PROCESS

Saskatchewan is participating in the Common Drug Review (CDR).

The CDR helps support and inform drug plan decisions about drugs by providing:

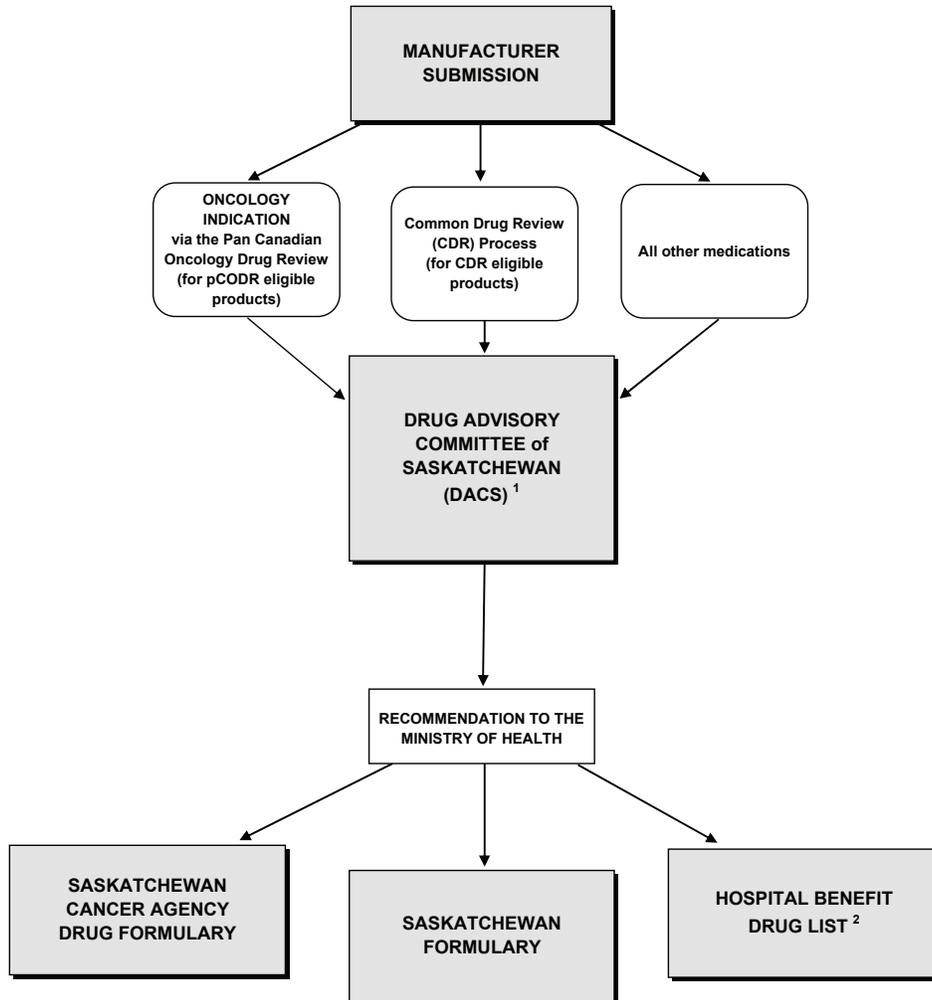

- systematic reviews of the clinical evidence
- reviews of the pharmacoeconomic information
- detailed recommendations by the Canadian Expert Drug Advisory Committee (CEDAC).

The drug plan continue to make final benefit-listing and coverage decisions, based on CEDAC recommendations, and jurisdictional factors, such as plan mandates, priorities, and resources.

For more information about the CDR and CEDAC, visit: <http://www.cadth.ca>.

Upon receipt of the CEDAC recommendation, the DACS will begin Saskatchewan's review. Using this information, along with additional details of anticipated cost and impact on patterns of practice, the DACS makes a recommendation to the Minister of Health. These recommendations reflect the "Policy for Inclusion of Products in the Saskatchewan Formulary" (see pages xi - xiii).

PRODUCT SUBMISSION PROCESS *

¹ The DACS provides independent, specialized advice on drug-related matters to the Minister of Health.

² All products listed in the Saskatchewan Formulary are benefits when used in the hospital setting.

* The majority of submissions for interchangeable generic drugs do not require committee review as the Executive Director of the Drug Plan has the authority to approve these products for coverage. More complex interchangeable drug submissions are reviewed by the drug review committee.

REQUEST FOR PRODUCT ASSESSMENT

Submission Process

Any supplier wishing to have products listed in the Saskatchewan Formulary, the Hospital Benefit Drug List or the Saskatchewan Cancer Agency Benefit List may submit requests for product assessment. The route a submission follows is determined by the indication of the products. There is no deadline date for submissions for listing in the Formulary. In general, submissions are reviewed in order of receipt.

Clinical Documentation

Single-Supplier Product Submissions

New Chemical Entities, New Combination Products and New Indications for Listed Products.

Saskatchewan is participating in the Common Drug Review (CDR) process. As a consequence, submissions for new chemical entities, new combination products and new indications for listed products should be made directly to CDR Directorate in accordance to the CDR Submission Guidelines as posted on the Canadian Agency for Drugs and Technologies in Health website <http://www.cadth.ca>.

Single Source Products That Do Not Contain New Chemical Entities

Saskatchewan Health will accept submissions of single source products that do not contain new chemical entities or new combinations and that will not fall under the jurisdiction of the CDR process; however, the same submission requirements as per CDR guidelines will apply to this category of products.

Line Extension Products

The following submission requirements pertain to new strengths and formulations or reformulations of drug products that are currently listed in the Saskatchewan Formulary.

1. Copy of NOC
2. Copy of completed Drug Identification Number (DIN) notification form
3. Copy of approved Product Monograph
4. Justification of the need for the Line Extension
5. Copy of Comprehensive Summary ("Clinical Studies" section only) or other document accepted by Health Canada and copies of critical studies that address key clinical issues relevant to the new strength, formulation or reformulation or evidence of formulation proportionality or bioequivalence data; and evidence of a similar dissolution profile.

Interchangeable Product Submissions

The following submission requirements pertain to multi-source products submitted for listing in an interchangeable grouping in the Saskatchewan Formulary.

- A. Drug products in solid oral dosage forms reviewed by the TPD according to the guidelines, "Conduct and Analysis of Bioavailability and Bioequivalence Studies - Part A and B" and have a Canadian Reference Product on the Notice of Compliance.
 1. Copy of NOC

2. Copy of completed Drug Identification Number (DIN) notification form
 3. Copy of approved Product Monograph
- Note: Comparative (Bio) studies may be requested on a case-by-case basis.
- B. Drug products in solid oral dosage forms reviewed by the TPD according to the guidelines "Conduct and Analysis of Bioavailability and Bioequivalence Studies - Report C.
1. Copy of NOC
 2. Copy of completed Drug Identification Number (DIN) notification form
 3. Copy of approved Product Monograph
- Note: Comparative (Bio) studies may be requested on a case-by-case basis.
- C. Drug Products that are cross-referenced
1. Copy of NOC
 2. Copy of completed Drug Identification Number (DIN) notification form
 3. Copy of approved Product Monograph
 4. Letters from both the manufacturer of the submitted product and the manufacturer of the cross-licensed product, confirming that the two products are identical in all aspects, except for embossing and labelling.
- D. Drug products in Aqueous Solutions (e.g. oral, ophthalmics, inhalation, injections) that have a Canadian Reference Product on the Notice of Compliance.
1. Copy of NOC
 2. Copy of completed Drug Identification Number (DIN) notification form
 3. Copy of approved Product Monograph
- Note: Comparative (Bio) studies may be requested on a case-by-case basis.
- E. Drug products in semi-solid formulations (e.g. creams, ointments)
1. Copy of NOC
 2. Copy of completed Drug Identification Number (DIN) notification form
 3. Copy of approved Product Monograph
- Note: Comparative (Bio) studies may be requested on a case-by-case basis.

Drug Products Without a Canadian Reference Product

The following submission requirements pertain to products submitted for listing in an interchangeable grouping where the active ingredient is designated as an "old drug" by the TPD and the drug product is approved on the basis of DIN application (i.e. an NOC is not issued) or is issued a Notice of Compliance without a Canadian Reference Product.

- A. Drug products in solid dosage forms
1. Copy of completed Drug Identification Number (DIN) notification form
 2. Copy of approved Product Monograph or Prescribing Information
 3. Executive summary of comparative bioavailability study or pharmacodynamic study or studies conducted in accordance with the TPD guidelines, "Conduct and Analysis of Bioavailability and Bioequivalence studies - Part A and B and Report C.

B. Drug Products Not in Solid Oral Dosage Form

1. Copy of completed Drug Identification Number (DIN) notification form
2. Copy of approved Product Monograph or Prescribing Information
3. Executive summary of comparative Bioavailability study or pharmacodynamic study or studies conducted in accordance with the TPD guidelines or surrogate comparisons with the reference drug product (i.e. in vivo or vitro test methods or a pharmacodynamic or therapeutic equivalence study).

C. Drug Products That Are Cross-Referenced

1. Copy of completed Drug Identification Number (DIN) notification form
2. Copy of approved Product Monograph or Prescribing Information
3. Letters from both the manufacturer of the submitted product and the manufacturer of the cross-licensed product, confirming that the two products are identical in all aspects, except for embossing and labelling.

Clinical documentation in support of products to be reviewed may be submitted at any time. The committees meet on a regular basis and will review submission as quickly as possible upon receipt. Details of the criteria for product listings are published in each edition of the Formulary and in regular updates to the Formulary.

Notification is required whenever there is a change in formulation or in the clinical information published in the product monograph, for any listed product as well as for any product under review.

Manufacturing Documentation

A copy of completed and approved Certified Product Information Document (C.P.I.D.) should be submitted with the clinical documentation if possible, but will be accepted at a later date.

Economic Evaluation

Price information including current price list and/or catalogue should be provided at the time of product submission.

Submission of pharmacoeconomic analyses are encouraged. The National Pharmacoeconomic Guidelines serve as a guide. The Formulary Committee will routinely consider direct "medical" costs such as:

- impact on laboratory tests for monitoring, evaluation or diagnosis
- impact on physician office visits
- impact on hospitalization or institutionalization
- impact on surgical procedures
- increased or decreased incidence and severity of side effects.

The availability of quality-of-life analyses is encouraged. Submission of a budget impact analyses for Saskatchewan Health is required.

Additional Documentation Required:

- A letter authorizing unrestricted communication regarding the drug product between the Saskatchewan Prescription Drug Plan and:
 1. Participating federal/provincial/territorial (F/P/T) drug plans

2. F/P/T governments, including their agencies and departments
 3. F/P/T health authorities (including regional authorities and related facilities)
 4. Health Canada
 5. Patented Medicine Prices Review Board (PMPRB)
 6. Canadian Agency for Drugs and Technology in Health (CADTH)
- Expected market share information is requested to allow for an accurate projection of the impact of a new product.
 - Product patent expiration date is requested to allow for consideration of the potential long-term economic impact of the product.
 - Copies of the initial product launch material, and any subsequent promotional material sent to physicians and pharmacists.
 - A letter confirming the ability to supply product.

Submission Procedure

Requests for product assessment, together with complete documentation as noted above should be sent to:

Dr. Lorne Davis, Pharmacologist
 Department of Pharmacology, College of Medicine
 University of Saskatchewan, 107 Wiggins Road
 Saskatoon, Saskatchewan S7N 5E5

With a complete copy sent to:

Director, Pharmaceutical Services, Ministry of Health
 Drug Plan and Extended Benefits Branch
 2nd Floor, 3475 Albert Street
 Regina, Saskatchewan S4S 6X6

NOTES CONCERNING THE FORMULARY

Benefits

The Saskatchewan Formulary lists the drugs, which are covered by the Drug Plan. A prescription is required for all drugs dispensed under the Drug Plan with the exception of insulin, blood-testing agents, urine-testing agents, syringes, needles, lancets and swabs used by diabetic patients. Certain drugs are covered under the Exception Drug Status Program (EDS) and require that specific medical criteria are met before coverage is granted. See Appendix A for more information regarding EDS.

Eligibility

With a few exceptions, all Saskatchewan residents with a valid Saskatchewan Health Services card are eligible for coverage under the Drug Plan. The exceptions include those who have prescription costs paid by another agency. For example:

- Health Canada; First Nations and Inuit Health Branch
- Workers' Compensation Board

- Veterans Affairs Canada
- members of the Royal Canadian Mounted Police
- members of the Canadian Forces
- inmates of Federal Penitentiaries

Policy for Inclusion of Products in the Saskatchewan Formulary

1. Only products produced by manufacturers approved by Health Canada will be considered.
2. Only drug products formulated and produced in accordance with sound manufacturing principles and found to comply with official standards will be considered.
3. Only drug products which are valid therapeutic agents, with proven clinical effectiveness, for the diagnosis, prevention or treatment of mental or physical disorders will be listed. The availability of suitable alternative agents, and potential for undesirable effects will be considered.

The medical literature and clinical studies are reviewed and evaluated to determine if the drug product is therapeutically effective for the treatment of the conditions for which the drug is indicated.

The clinical literature is also reviewed to determine the therapeutic advantages or disadvantages in relation to alternative agents, which may or may not be listed in the Saskatchewan Formulary.

The rate and severity of potential undesirable effects are reviewed and compared with those for alternative products.

In reviewing products for which suitable alternatives are listed in the Formulary, consideration will be given to the following additional criteria:

- clinical documentation must clearly demonstrate therapeutic advantages such as:
 - more effective for treatment of the condition(s) for which the drug is intended;
 - increased safety as shown by reduced toxicity and reduced incidence of adverse reactions and/or side effects;
 - improved dosing schedule;
 - reduced potential for abuse or inappropriate use;
- OR
- anticipated cost of a product of equivalent therapeutic effectiveness must offer a potential economic advantage over listed alternatives.

4. The cost of therapy relative to the clinical efficacy is reviewed and compared to the cost of therapy relative to the clinical efficacy of alternative agents.

An increased cost may be justified if the drug product produces better clinical results in a significant portion of the patient population, demonstrates fewer or less severe undesirable effects, or has a dosage regime which improves patient compliance.

The cost of oral combination products relative to the combined costs of the single entities, the cost of the various dosage strengths relative to therapeutic advantages, and the cost of additional dosage forms relative to the therapeutic advantages will be considered when reviewing such products.

5. Some drug products will not be listed as regular benefits, but may be made available on Exception Drug Status for treatment of selected clinical indications. (See Appendix A)
6. Combination products are required to meet the following additional criteria:
 - each component must make a contribution to the claimed effect;
 - the dosage of each component (amount, frequency, duration of therapeutic effect) must be such that the combination is safe and effective for a significant patient population, requiring such concurrent therapy as defined in the labelling;

A component may be added to:

 - enhance safety or effectiveness of the principal active ingredient;
 - minimize the potential for abuse of the principal active ingredient.
 - combination fixed ratio must be "right" for:
 - significant portion of patients;
 - significant amount of natural history of disease.
7. Sustained, prolonged or delayed release dosage forms are required to meet the following additional criteria:
 - clinical studies have demonstrated the sustained, prolonged or delayed action of the active ingredient;
 - the dosage form possesses therapeutic advantages in the treatment of the disease entity for which the product is indicated;
8. The various strengths of one dosage form will be considered if they possess therapeutic advantages and meet the required standards for quality and cost.
9. The various dosage forms of a drug product will be evaluated individually.
10. Drug products not listed in the Schedules of the Food and Drugs Act, Narcotic Control Act or the Saskatchewan Pharmacy Act, but usually sold on prescription, will be considered for inclusion.
11. Products which contain the same amount of the same active ingredient in an equivalent dosage form and are of acceptable equivalent therapeutic effectiveness will be listed as interchangeable.
12. The following will not be listed:
 - fertility agents;
 - drugs used in erectile dysfunction;
 - certain over-the-counter preparations;
 - drugs used primarily in hospitals;
 - antineoplastic agents (these are provided to patients through the Saskatchewan Cancer Agency);
 - anti-tuberculosis drugs;
 - blood derivatives - immune serum globulin for prophylaxis against infectious hepatitis or measles or for treatment of immune deficiency disease is available from the Health Offices.
 - vaccines and sera - most immunological agents are available from the Health Offices.
 - safety engineered syringes

13. Drug products identified by trade names deemed to be inappropriate, confusing and/or misleading may not be listed. Some examples include:
 - products with similar or identical trade names but containing different active ingredients;
 - products with a different strength of ingredient, manufactured by the same supplier, but with a different trade name.

Policy for Formulary Deletion

The Minister of Health may delete any product from the Saskatchewan Formulary under the following circumstances:

1. Upon the recommendation of the DACS:
 - where the standards of quality and/or production have altered and are not considered to meet accepted standards;
 - where new information demonstrates that the product does not have adequate therapeutic benefit;
 - where undesirable effects of the product make the continued listing of the product inappropriate;
 - where new products possessing clearly demonstrated therapeutic advantages have been listed, thereby making the continued listing of the product unnecessary.
2. Upon the recommendation of the Drug Plan where there are undesirable financial, supply or administrative implications to continued listing of a product, the Drug Plan will consult with the DACS prior to making a recommendation. The comments of the Committee will be brought to the attention of the Minister.
3. Where the Minister of Health believes a product should be deleted, the Minister will consult with the DACS before making a final decision.

Exception Drug Status

Certain drug products may be considered for Exception Drug Status coverage under one or more of the following circumstances:

- the drug is ordinarily administered only to hospital inpatients and is being administered outside of a hospital because of unusual circumstances;
- the drug is not ordinarily prescribed or administered in Saskatchewan but is being prescribed because it is required in the diagnosis or treatment of a patient having an illness, disability or condition rarely found in this province;
- the drug is infrequently used since therapeutic alternatives listed in the Formulary are usually effective but are contraindicated or found to be ineffective because of the clinical condition of the patient;
- the drug has been deleted from the Formulary, but is required by patients who were previously stabilized on the drug;
- the drug has potential for use in other than approved indications;
- the drug has potential for the development of widespread inappropriate use;
- the drug is more expensive than listed alternatives and offers an advantage in only a limited number of indications.

The following information is required to process Exception Drug Status requests:

- * patient name
- * patient Health Services Number (9 digits)
- * name of drug
- * diagnosis relevant to use of drug
- * prescriber name
- * prescriber phone number

Saskatchewan Prescription Drug Plan policy does not allow a fee to be charged to clients for Exception Drug Status applications made to the Drug Plan on the client's behalf.

See Appendix A for further details regarding Exception Drug Status.

"No Substitution" Prescriptions

Drug Plan benefits will be based only on the lowest priced interchangeable brand as listed in the Formulary or sticker updates. Credit towards established deductibles or thresholds (for income based drug coverage under Special Support) will also be based on the lowest priced interchangeable brand. Although the Formulary will continue to list all approved brands, patients will, in addition to their normal share of cost, be responsible for any incremental cost associated with the selection of a higher cost brand.

It is important to note that both generic and brand name products are manufactured under the same standards of good manufacturing practice, and that only those brands, which meet the standards for bioequivalence, are accepted as interchangeable in Saskatchewan..

In cases where a patient experiences problems with a specific brand of a medication, a prescriber may make application for exemption from the cost of the "no sub" brand. (See Appendix C for details.)

Adverse Drug Reactions

Health Canada encourages the reporting of suspected adverse reactions. Saskatchewan prescribers, pharmacists, and other health professionals are encouraged to participate in the **Canada Vigilance Program**; see Supplementary Information at the back of the book.

Index

Drug products are listed alphabetically by generic name and brand name at the back of the Formulary (see grey screened pages).

Pharmacologic-Therapeutic Classification of Drugs

The drugs are classified according to the pharmacologic-therapeutic classification developed by the American Society of Health System Pharmacists for the purpose of the American Hospital Formulary Service.

Permission to use this system has been granted by the American Society of Health System Pharmacists. The Society is not responsible for the accuracy of transpositions or excerpts from the original content.

Within each therapeutic classification the drugs are listed alphabetically according to their generic names. Under each drug, acceptable products are listed. Drugs with multiple uses may be listed in one or more classes.

Prescription Quantities

The Drug Plan places no limitation on the quantities of drugs that may be prescribed. Prescribers shall exercise their professional judgment in determining the course and duration of treatment for their patients. However, in most cases, the Drug Plan will not pay benefits or credit deductibles for more than a 3-month supply of a drug at one time.

The quantity dispensed for one dispensing fee shall be determined by the terms of the contract in force when the prescription was dispensed. For drugs listed on the *Two Month* and *100 Day* maintenance drug lists, refer to Appendix E. Because of possible waste and the potential danger of storing large quantities of potent drugs in the home, the Drug Plan does not encourage the dispensing of unreasonably large quantities of prescription drugs.

Release of Patient Drug Profiles

Saskatchewan prescribers or pharmacists wishing to obtain a drug profile for patients in their care may do so by submitting a written request, stating the patient's name, address, date of birth and Health Services Number to the address below. The drug profile will include all claims for Formulary and Exception Drug Status drugs submitted to the Drug Plan on behalf of the patient in the previous 9-12 months.

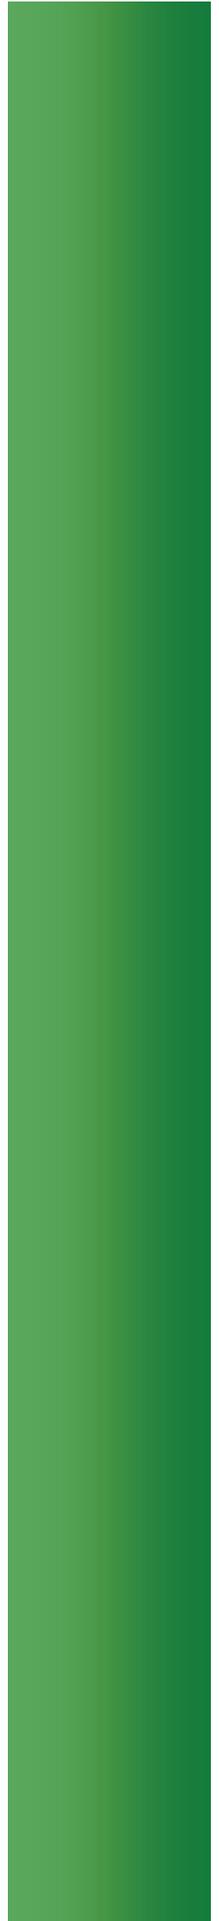

Please submit written request to:

Executive Director
Drug Plan & Extended Benefits Branch
Ministry of Health
2nd Floor, 3475 Albert Street
Regina SK S4S 6X6

FAX: (306) 787-8679

LEGEND

LEGEND

- 1 Pharmacological-Therapeutic classification.
- 2 Pharmacological-Therapeutic sub-classification.
- 3 Nonproprietary or generic name of the drug.
- 4 An asterisk (*) to the left of a drug strength and dosage form indicates that the products listed below are interchangeable.
- 5 An asterisk (*) to the right of a price indicates that the Drug Plan has negotiated a contract price (Standing Offer Contract - SOC) for that product. Pharmacists will dispense these products except where a prescriber indicates "no substitution" for a product in an interchangeable category (see page xiv). In cases where contracts have been negotiated with two suppliers of an interchangeable product, either brand may be used.
- 6 The following symbol:☒, to the left of a drug strength and dosage form indicates that the products listed below are NOT interchangeable.
- 7 This product requires Exception Drug Status (EDS) approval (see Appendix A for EDS criteria).
- 8 The price published in the formulary includes a wholesale mark-up, and is the maximum price accepted (at time of publication) expressed as decimal dollars. Pharmacies are required by contract to submit their actual acquisition cost of the drug, which may be less than the published formulary price. For the most up to date information on formulary drug prices refer to the online formulary at <http://formulary.drugplan.health.gov.sk.ca>
- 9 The Drug Identification Number (DIN), which has been assigned by Health Canada, uniquely identifies the drug product and its manufacturer, name and strength of active ingredients, route of administration, and pharmaceutical dosage form. In some cases, as noted in the formulary, identification numbers are generated by the Drug Plan for billing purposes only.
- 10 Drug strength and dosage form.
- 11 The Natural Product Number (NPN), which has been assigned by Health Canada, uniquely identifies the natural product and its manufacturer, name and strength of active ingredients, route of administration, and pharmaceutical dosage form.
- 12 All active ingredients of combination products are listed.
- 13 Strengths of active ingredients are listed in the same order as the ingredients. This example indicates that the tablet contains 100mg of levodopa and 25mg of carbidopa.
- 14 Brand name of drug.
- 15 Three letter identification code assigned to each manufacturer. The codes are listed in Appendix H near the back of the Formulary.
- 16 The size of vials or ampoules of injectables is listed in brackets.
- 17 The size of a tube of ophthalmic ointment is listed in brackets.
- 18 This product is affected by the Maximum Allowable Cost (MAC) Policy (see Appendix I for MAC policy information).

APPENDIX A

EXCEPTION DRUG STATUS PROGRAM

NOTES REGARDING THE EXCEPTION DRUG STATUS (EDS) PROGRAM

- Duly licensed practitioners prescribing within their scope of practice (or authorized office staff) may apply for EDS.
- Requests can be submitted by telephone, by mail or by fax. A toll-free line with an electronic message system is available **exclusively** for requests on a 24-hour basis. The telephone number to access this line is **1-800-667-2549**; the Drug Plan EDS Unit fax number is **(306) 798-1089**.
- Patients are notified by letter if coverage has been approved and the time period for which coverage has been approved.
- If a request has been denied, letters are sent to the patient and prescriber notifying them of the reason for the denial. In most cases, the Drug Plan requires more information to determine the patient's eligibility for coverage, and will reconsider coverage at such time as further information is received.
- If the drug requested is not a benefit under the Drug Plan, the patient and prescriber are notified. Payment for the medication is the responsibility of the patient in these cases. It is important to note that not all medications currently available on the market in Canada are benefits under the Saskatchewan Drug Plan or under the Exception Drug Status Program of the Drug Plan.
- The majority of EDS requests are routinely backdated **30 days** from the time the Drug Plan receives the request. Provision can be made for further backdating of EDS coverage on a case-by-case basis by staff in the Operations Unit. However, there is no provision or backdating further than one year from the current date. Requests for backdating can be made by a health professional or the patient. Patients are expected to meet EDS criteria within the dates requested.
- Saskatchewan Prescription Drug Plan policy does not allow a fee to be charged to clients for Exception Drug Status applications made to the Drug Plan on the client's behalf.
- See *NOTES CONCERNING THE FORMULARY*, pages x-xv for additional general information regarding Exception Drug Status coverage.
- Coverage may be provided for other products in certain instances.

REQUIREMENTS FOR REVIEW OF DRUGS FOR NON-APPROVED INDICATIONS

On rare occasions drugs are required for non-approved indications on a case by case basis. In order to conduct a timely review of these requests the drug review committee requests the following information be provided by the prescriber:

- the disease or problem being treated
- list of previous therapies tried and the response achieved
- other non-exception options available and why not appropriate
- name of the drug being requested
- clinical evidence to strongly support the use of the drug for the condition being treated
- outcome measures that will be followed to assess the effect of the drug
- dose of the drug and length of time to be used

CRITERIA FOR COVERAGE UNDER EXCEPTION DRUG STATUS

Following are the criteria for coverage of certain drugs under Exception Drug Status. Professional staff at the Drug Plan can provide further information.

The following information is required to process all Exception Drug Status requests:

- **Patient name; patient Health Services Number (9 digits); name of drug; diagnosis* relevant to use of drug; prescriber name and phone number.**

*For pharmacist-initiated EDS requests:

The diagnosis, which must be obtained from the physician or physician's agent, is to be consistently documented within the pharmacy, whether the documentation is on the original prescription, computer file, or EDS fax form.

abacavir SO₄, oral solution, 20mg/mL; tablet, 300mg (Ziagen-GSK)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

abacavir SO₄/lamivudine, tablet, 600mg/300mg (Kivexa-GSK)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

abacavir SO₄/lamivudine/zidovudine, tablet, 300mg/150mg/300mg (Trizivir-GSK)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

abatacept, powder for solution, 250mg/vial (Orencia-BMY)

- (a) For treatment of severely active rheumatoid arthritis when used in combination with DMARDs (unless these agents are contraindicated) in patients who have failed to respond to an adequate trial of an anti-TNF agent. This drug should NOT be used in combination with anti-TNF agents.
- (b) For treatment of juvenile idiopathic arthritis in children who are intolerant to, or have not had an adequate response from etanercept. Initial treatment should be limited to a maximum of 16 weeks. Retreatment should only be permitted for children who had an adequate initial treatment response and subsequently experience a disease flare.

Accel Pioglitazone - see pioglitazone

Accolate - see zafirlukast

acitretin, capsule, 10mg, 25mg (Soriatane-HLR)

For treatment of:

- (a) Severe intractable psoriasis
 - (b) Darier's disease
 - (c) Ichthyosiform dermatoses
 - (d) Palmoplantar pustulosis
- and other disorders of keratinization.

Aclasta - see zoledronic acid

Actonel - see risedronate sodium

Actos - see pioglitazone HCl

Acular - see ketorolac tromethamine

adalimumab, pre-filled syringe, 40mg/0.8mL (Humira-ABB); pre-filled pen, 40mg/0.8mL (Humira Pen-ABB)

For treatment of:

- (a) active rheumatoid arthritis in patients who have failed methotrexate and leflunomide.

- (b) active rheumatoid arthritis in patients intolerant to methotrexate and leflunomide.
- (c) psoriatic arthritis in patients who have failed methotrexate and one other DMARD.
- (d) psoriatic arthritis in patients who are intolerant to methotrexate and one other DMARD.

Note: Treatment should be combined with an immunosuppressant. This product should be used in consultation with a specialist in this area. Exceptions can be considered in cases where methotrexate or leflunomide are contraindicated.

- (e) For treatment of ankylosing spondylitis (A.S.) according to the following criteria:
 - 1) For patients who have already been treated conventionally with two or more NSAIDs taken sequentially at maximum tolerated or recommended doses for four weeks without symptom control. AND
 - 2) Satisfy New York diagnostic criteria: a score ≥ 4 on the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) AND a score of ≥ 4 cm on the 0-10cm spinal pain VAS on two occasions at least 12 weeks apart without any change of treatment. AND
 - 3) Adequate response to treatment assessed at 12 weeks defined as at least 50% reduction in pre-treatment baseline BASDAI score or by ≥ 2 units AND a reduction of ≥ 2 cm in the spinal pain VAS.

NOTE:

Coverage will not be provided when a patient switches to another anti-TNF agent if the patient fails to respond or if there is loss of response to the first agent. Requests for coverage for this indication must be made by a rheumatologist.

A second application would also be required after 12 weeks to assess and would need to show an improvement to the patient's condition on either of these medications. Please refer to the Formulary website for the application form.

- (f) Crohn's disease as follows:

Initially for a 6 month period: For the treatment of moderate to severely active Crohn's disease in patients refractory to or with contraindications to an adequate course of 5-aminosalicylic acid and corticosteroids and other immunosuppressive therapy. Eligible patients should receive an induction dose of 160mg followed by 80mg two weeks later. Clinical response to adalimumab should be assessed four weeks after the first induction dose, using criteria such as a 100 point reduction in the Crohn's Disease Activity Index (CDAI).

Ongoing coverage: Adalimumab maintenance therapy should only be provided for responders, as noted above, and for a dose not exceeding 40mg every two weeks. Patients undergoing this treatment should be reviewed every 6 months by a specialist.

- (g) For treatment of adult patients with severe debilitating plaque psoriasis who meet all of the following criteria:
 - i) failure to respond to, contraindications to, or intolerant of methotrexate and cyclosporine; **AND**
 - ii) failure to respond to, intolerant to or unable to access phototherapy.

Coverage will be approved initially for the induction phase of up to 16 weeks. Coverage can be renewed in patients who have responded to therapy. This product should be used in consultation with a specialist in this area.

adefovir dipivoxil, tablet, 10mg (Hepsera-GSI)

For treatment of hepatitis B when used in combination with lamivudine, in patients who have developed failure to lamivudine, as defined by an increase in HBV DNA of $\geq 1 \log_{10}$ IU/mL above the nadir, measured on two separate occasions within a interval of at least 1 month, after the first three months of lamivudine therapy, and when failure to lamivudine is not due to poor adherence to therapy.

Advagraf - see tacrolimus

Advair - see salmeterol xinafoate/fluticasone propionate

Advair Diskus - see salmeterol xinafoate/fluticasone propionate

Aggrenox - see dipyridamole/acetylsalicylic acid
Aldara - see imiquimod

alendronate sodium, oral solution, 70mg/75mL (Fosamax-MSD)

For treatment of osteoporosis in patients with the inability to swallow.

***alendronate sodium, tablet, 10mg (Fosamax-MSD) (Apo-Alendronate-APX) (Novo-Alendronate-NOP) (Mylan-Alendronate-MYL) (Sandoz Alendronate-SDZ); tablet, 70mg (Fosamax-MSD) (CO Alendronate-COB) (pms-Alendronate-PMS) (Apo-Alendronate-APX) (Novo-Alendronate-NOP) (ratio-Alendronate-RPH) (Mylan-Alendronate-MYL) (Dom-Alendronate-DOM) (pms-Alendronate-FC-PMS)**

For treatment of:

- (a) Osteoporosis in patients unresponsive to etidronate disodium/calcium (Didrocal) after receiving it for one year.
- (b) Osteoporosis in patients intolerant to etidronate disodium/calcium (Didrocal).
- (c) Osteoporosis in patients with pre-existing and/or recent fractures, and:
- (d) Glucocorticoid-induced osteoporosis in patients who have received systemic glucocorticoid treatment for at least 3 months.

***alendronate sodium, tablet, 40mg (Fosamax-MSD) (CO Alendronate-COB)**

For treatment of symptomatic Paget's disease of the bone.

alendronate sodium/vitamin D3 (cholecalciferol), tablet, 70mg/5600IU (Fosavance-MSD)

For treatment of osteoporosis.

Alertec - see modafinil

alfacalcidol, capsule, 0.25ug, 1ug; oral drops, 2ug/mL (One-Alpha-LEO)

For management of:

- (a) Hypocalcemia in chronic renal disease patients prior to initiation of dialysis.
- (b) Osteodystrophy in chronic renal disease patients prior to initiation of dialysis.

Note: Coverage for dialysis patients is provided under the Saskatchewan Aids to Independent Living (S.A.I.L.) Program. Exception Drug Status coverage is not required for S.A.I.L. patients.

alglucosidase alfa, powder for solution, 50mg/vial (Myozyme-GZY)

For patients with infantile onset Pompe disease, as demonstrated by onset of symptoms and confirmed cardiomyopathy within the first 12 months of life.

The Committee approved the following monitoring and withdrawal criteria, which received approval from the Canadian Expert Drug Advisory Committee (CEDAC):

The *monitoring* of markers of disease severity and response to treatment must include at least:

- Weight, length and head circumference.
- Need for ventilatory assistance, including supplementary oxygen, CPAP, BiPAP, or endotracheal intubation and ventilation.
- Left ventricular mass index (LVMI) as determined by echocardiography (not ECG alone).
- Periodic consultation with cardiology.
- Periodic consultation with respiratory.

Withdrawal of therapy:

- Patients to be considered for reimbursement of drug costs for alglucosidase alfa treatment must be willing to participate in the long-term evaluation of the efficacy of treatment by periodic medical assessment. Failure to comply with recommended medical assessment and investigations may result in withdrawal of financial support of drug therapy.
- The development of the need for continuing invasive ventilatory support after the initiation of enzyme-replacement therapy (ERT) should be

considered a treatment failure. Funding for ERT should not be continued for infants who fail to achieve ventilator-free status, or who deteriorate further, within 6 months after the initiation of ventilatory support.

- Deterioration of cardiac function, as shown by failure of LV hypertrophy (as indicated by LV mass index) to regress by more than $Z=1$ unit, or persistent clinical or echocardiographic findings of cardiac systolic or diastolic failure without evidence of improvement, in spite of 24 weeks of ERT, should be considered a treatment failure and funding for ERT should be discontinued.

almotriptan malate, tablet, 6.25mg, 12.5mg (Axert-JAN)

For treatment of migraine headaches in patients over 18 years of age.

The maximum quantity that can be claimed through the Drug plan is limited to 6 doses per 30 days within a 60-day period. Patients requiring more than 12 doses in a consecutive 60-day period should be considered for migraine prophylaxis therapy if they are not already receiving such therapy.

Amatine - see midodrine HCl

ambrisentan , tablet, 5mg, 10mg (Volibris-GSK)

For the treatment of pulmonary arterial hypertension, on the recommendation of a specialist.

Amerge - see naratriptan HCl

amoxicillin trihydrate/potassium clavulanate, oral suspension, 40mg/5.3mg/mL (Clavulin-GXK)

*oral suspension, 80mg/11.4mg/mL (Clavulin-GSK) (Apo-Amoxi Clav-APX)

*oral suspension, 25mg/6.25mg (Apo-Amoxi Clav-APX); 50mg/12.5mg/mL (Clavulin-GSK) (Apo-Amoxi Clav-APX);

*tablet, 250mg/125mg, 500mg/125mg (Clavulin-GSK) (Apo-Amoxi Clav-APX)

*tablet, 875mg/125mg (Clavulin-GSK) (Apo-Amoxi Clav-APX)

(Novo-Clavamoxin-NOP) (ratio-Aclavulante-RPH)

For treatment of:

- (a) Upper and lower respiratory tract infections in patients unresponsive to first-line antibiotics.
- (b) Infections caused by organisms known to be resistant or unresponsive to alternative antibiotics.
- (c) Infections in patients allergic to alternative antibiotics.
- (d) Respiratory tract infections in nursing home patients.
- (e) Pneumonia in patients in the community with comorbidity e.g. chronic underlying lung disease (excluding asthma), diabetes mellitus, renal insufficiency, heart failure, stroke.
- (f) Infections in patients with neutropenia.
- (g) Pneumonia caused by aspiration.
- (h) For human, cat and dog bites.
- (i) Diabetic foot infections, and:
- (j) For completion of treatment initiated in hospital.

anakinra, subcutaneous injection (pre-filled syringe), 100mg/0.67mL (Kineret-AMG)

For treatment of:

- (a) Active rheumatoid arthritis in patients who have failed methotrexate and leflunomide.
- (b) Active rheumatoid arthritis in patients intolerant to methotrexate and leflunomide.
(Note - exceptions can be considered in cases where methotrexate or leflunomide are contraindicated). *This product should be used in consultation with a specialist in this area.*

Note: Coverage will not be provided when used in combination with TNF blocking agents (i.e. adalimumab, etanercept and infliximab) due to the significantly higher risk of adverse events. Treatment should be combined with an immunosuppressant.

Androcur - see cyproterone acetate

Apidra - see insulin glulisine
 Apo-Alendronate - see alendronate sodium
 Apo-Amoxi Clav - see amoxicillin trihydrate/potassium clavulanate
 Apo-Calcitonin - see calcitonin salmon
 Apo-Carvedilol - see carvedilol
 Apo-Cefprozil - see cefprozil
 Apo-Cefuroxime - see cefuroxime axetil
 Apo-Ciproflox - see ciprofloxacin
 Apo-Clarithromycin - see clarithromycin
 Apo-Clonidine - see clonidine HCl
 Apo-Clozapine - see clozapine
 Apo-Cyclobenzaprine - see cyclobenzaprine HCl
 Apo-Cyproterone - see cyproterone
 Apo-Desmopressin - see desmopressin
 Apo-Etodolac - see etodolac
 Apo-Fluconazole - see fluconazole
 Apo-Flunarizine - see flunarizine
 Apo-Ketoconazole - see ketoconazole
 Apo-Ketorolac - see ketorolac tromethamine
 Apo-Lactulose - see lactulose
 Apo-Lansoprazole - see lansoprazole
 Apo-Leflunomide - see leflunomide
 Apo-Levofloxacin - see levofloxacin
 Apo-Megestrol - see megestrol acetate tablet
 Apo-Meloxicam - see meloxicam
 Apo-Midodrine - see midodrine HCl
 Apo-Minocycline - see minocycline HCl
 Apo-Modafinil - see modafinil
 Apo-Nabumetone - see nabumetone
 Apo-Norflox - see norfloxacin
 Apo-Ofloxacin - see ofloxacin
 Apo-Olanzapine - see olanzapine
 Apo-Omeprazole - see omeprazole
 Apo-Oxcarbazepine - see oxcarbazepine
 Apo-Pantoprazole - see pantoprazole sodium
 Apo-Pioglitazone - see pioglitazone HCl
 Apo-Raloxifene - see raloxifene HCl
 Apo-Selegiline - see selegiline HCl
 Apo-Sumatriptan - see sumatriptan
 Apo-Ticlopidine - see ticlopidine HCl
 Apo-Tizanidine - see tizanidine HCl
 Apo-Zidovudine - zidovudine
 Aptivus - see tipranavir
 Aranesp - see darbepoetin alfa
 Arava - see leflunomide
 Aredia - see pamidronate
 Aricept - see donepezil HCl
 Aristospan - see triamcinolone/hexacetonide

atazanavir SO₄, capsule, 150mg, 200mg, 300mg (Reyataz-BMY)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

atomoxetine HCl, capsule, 10mg, 18mg, 25mg, 40mg, 60mg (Strattera-LIL)

For treatment of Attention Deficit Hyperactivity Disorder (ADHD) in patients who meet all of the following criteria:

- Has failed or is intolerant to treatment with methylphenidate and an amphetamine.

- Treatment with Strattera must be recommended by or in consultation with a specialist in psychiatry, pediatrics or a general practitioner with expertise in ADHD.
- Evidence of benefit from a one month trial with Strattera.

atovaquone, suspension, 150mg/mL (Mepron-GSK)

For treatment of *Pneumocystis carinii* pneumonia (PCP) in patients intolerant to trimethoprim/sulfamethoxazole.

Atripla - see efavirenz/emtricitabine/tenofovir disoproxil fumarate

Avandamet - see rosiglitazone maleate/metformin HCl

Avandia - see rosiglitazone maleate

Avelox - see moxifloxacin HCl

Avonex - see Appendix G

Avonex PS - see Appendix G

Axert - see almotriptan malate

***azithromycin, tablet, 250mg (Zithromax-PFI) (Apo-Azithromycin-APX) (Novo-Azithromycin-NOP) (CO Azithromycin-COB) (pms-Azithromycin-PMS) (Sandoz Azithromycin-SDZ) (ratio-Azithromycin-RPH) (Mylan-Azithromycin-MYL) (Dom-Azithromycin-DOM); *oral suspension, 20mg/mL, 40mg/mL (Zithromax-PFI) (pms-Azithromycin-PMS) (Novo-Azithromycin-NOP) (Sandoz Azithromycin-SDZ)**

For treatment of:

- Pneumonia.
- Upper and lower respiratory tract bacterial infections known to be resistant or unresponsive to alternative antibiotics.
- Infections in patients allergic to alternative antibiotics.
- Infection (and prophylaxis) in patients with non-tuberculous Mycobacterium.
- Chlamydia trachomatis* infections, and:
- For completion of treatment initiated in hospital with macrolides or quinolones.
- For patients intolerant to erythromycin and/or other antibiotics.

***azithromycin, tablet, 600mg (Zithromax-PFI) (CO Azithromycin-COB) (pms-Azithromycin-PMS) (Dom-Azithromycin-DOM)**

For treatment and prophylaxis in patients with non-tuberculous Mycobacterium.

baclofen, injection, 0.05mg/mL, 0.5mg/mL, 2mg/mL (Lioresal Intrathecal-NVR)

For treatment of:

- Severe spastic conditions in patients unresponsive to oral baclofen.
- Severe spastic conditions in patients intolerant to oral baclofen.

Baraclude - see entecavir

Betaseron - see Appendix G

bezafibrate, tablet, 200mg (pms-Bezafibrate-PMS); sustained release tablet, 400mg (Bezalip SR-HLR)

For treatment of:

- Hyperlipidemia in patients unresponsive to gemfibrozil or fenofibrate.
- Hyperlipidemia in patients who have experienced side effects with gemfibrozil or fenofibrate.

Bezalip SR - see bezafibrate

Biaxin - see clarithromycin

Biaxin XL - see clarithromycin

bosentan, tablet, 62.5mg, 125mg (Tracleer-ACT)

For treatment of pulmonary arterial hypertension on the recommendation of a specialist.

Botox - see botulinum toxin type A

botulinum toxin type A, injection, 100IU/vial (Botox-ALL)

For treatment of:

- (a) Eye dystonias, that is, blepharospasm and strabismus.
- (b) Cervical dystonia, that is, torticollis.
- (c) Other forms of severe spasticity.
- (d) Hyperhidrosis of the axilla.
- (e) Children with non-neurologic functional outflow obstruction due to external sphincter over-activity who are not candidates for or who have not responded to other options.
- (f) Spinal cord injury patients with chronic urinary retention who are not candidates for or who have not responded to other options.
- (g) Severe neurogenic bladder dysfunction in patients who have failed treatment with two anticholinergic drugs, who are unable to take these drugs because of adverse effects, who have definite evidence of detrusor hyperactivity on cystometrogram done by a qualified urodynamicist.

Note: This criteria does not apply to patients with multiple sclerosis.

budesonide, controlled ileal release capsule, 3mg (Entocort-AST)

- (a) For treatment of mild to moderate Crohn's Disease affecting the ileum and/or ascending colon. *Coverage will be provided for up to 8 weeks.*
- (b) Maintenance treatment in Crohn's Disease will be approved for patients unresponsive or intolerant to other agents.

bumetanide, tablet, 1mg, 2mg, 5mg (Burinex-LEO)

For treatment of patients intolerant to furosemide.

buprenorphine/naloxone, sublingual tablet, 2mg/0.5, 8mg/2mg (Suboxone-SPC)

For treatment of opioid dependency in patients for whom methadone is contraindicated, (e.g. patients at high risk of, or with QT prolongation, or hypersensitivity to methadone).

***bupropion HCl, SR tablet, 100mg, (Sandoz Bupropion SR-SDZ) (ratio-Bupropion SR-RPH); tablet, 150mg, (Wellbutrin SR-VL) (Sandoz Bupropion SR-SDZ) (ratio-Bupropion SR-RPH) (pms-Bupropion SR-PMS); extended-release tablet, 150mg, 300mg (Wellbutrin XL-BVL)**

For treatment of depression.

Burinex - see bumetanide

buserelin acetate, intranasal solution, 1.05mg/mL; injection, 1.05mg/mL (Suprefact-HRU)

For treatment of:

- (a) Endometriosis. *(Coverage may be repeated after a six month lapse, for another 6 month course).*
- (b) Menorrhagia in preparation for endometrial ablation, and:
- (c) For pre-treatment of uterine fibroids prior to surgical removal.

***cabergoline, tablet, 0.5mg (Dostinex-PFI) (CO Cabergoline-COB)**

For treatment of:

- (a) Hyperprolactinemic disorders in patients unresponsive to bromocriptine.
- (b) Hyperprolactinemic disorders in patients intolerant to bromocriptine.

Calcimar - see calcitonin salmon

**calcitonin salmon, injection, 100IU/mL (Caltine-FEI);
*injection, 200IU/mL (Calcimar-AVT) (Apo-Calcitonin-APX)**

For treatment of:

- (a) Osteoporosis with bone pain due to crush fracture. *Coverage will be provided for a maximum of 3 months.*
- (b) Osteogenesis imperfecta, and:
- (c) For symptomatic treatment of Paget's disease of the bone.

***calcitonin salmon, nasal spray, 200IU/dose (Miacalcin-NVR)
(Apo-Calcitonin-APX) (Sandoz Calcitonin NS-SDZ)**

For treatment of:

- (a) Osteoporosis in patients intolerant to listed bisphosphonates.
- (b) Osteoporosis in patients unresponsive to listed bisphosphonates after treatment for one year, and:
- (c) Osteoporosis with bone pain due to crush fracture. *Coverage will be provided for a maximum of 3 months as an alternative to the subcutaneous dosage form.*

calcitriol, capsule, 0.25ug, 0.5ug; oral solution, 1ug/mL (Rocaltrol-HLR)

- (a) For management of hypocalcemia and osteodystrophy in patients with chronic renal failure undergoing renal dialysis. *Note: Coverage for dialysis patients is provided under the Saskatchewan Aids to Independent Living (SAIL) Program. Exception Drug Status coverage is NOT required for SAIL patients.*
- (b) For management of hypocalcemia and clinical manifestations associated with post-surgical hypoparathyroidism, idiopathic hypoparathyroidism, pseudohypoparathyroidism, or vitamin D resistant rickets.

calcium acetate, tablet, 667mg (PhosLo-FMC)

For treatment of:

- (a) End-stage renal disease in patients intolerant to aluminum or calcium carbonate containing phosphate-binding agents.
- (b) End-stage renal disease in patients where aluminum or calcium carbonate containing phosphate-binding agents are inappropriate.

Caltine - see calcitonin salmon

***carbamazepine, controlled release tablet, 200mg, 400mg (Tegretol CR-NVR)
(pms-Carbamazepine-CR-PMS) (Dom-Carbamazepine CR-DOM)
(Mylan-Carbamazepine CR-MYL)**

For treatment in patients:

- (a) Uncontrolled using the regular tablet dosage form.
- (b) Experiencing unacceptable adverse reactions using the regular tablet dosage form.

***carvedilol, tablet, 3.125mg, 6.25mg, 12.5mg, 25mg (Apo-Carvedilol-APX)
(pms-Carvedilol-PMS) (Novo-Carvedilol-NOP) (Nu-Carvedilol-NXP)
(Dom-Carvedilol-DOM) (ratio-Carvedilol-RPH)(Ran-Carvedilol-RAN)**

For treatment of:

- (a) Stable symptomatic heart failure in patients taking an ACE inhibitor.
- (b) Stable symptomatic heart failure in patients Intolerant to an ACE inhibitor.

cefixime, tablet, 400mg; suspension, 20mg/mL (Suprax-AVT)

For treatment of:

- (a) Infections in patients allergic to alternative antibiotics. *(Note: patients who have had an anaphylactic reaction to penicillin should not receive cephalosporins.)*
- (b) Infections caused by organisms known to be:
 - Resistant to alternative antibiotics.

- Unresponsive to alternative antibiotics.
- (c) Uncomplicated gonorrhoea.
- (d) For completion of antibiotic treatment initiated in hospital.

***cefprozil, tablet, 250mg, 500mg (Cefzil-BMY)(Apo-Cefprozil-APX)
(Ran-Cefprozil-RAN) (Sandoz Cefprozil-SDZ)**

***oral suspension, 25mg/mL (Cefzil-BMY)(Apo-Cefprozil-APX)
(Sandoz Cefprozil-SDZ)**

***oral suspension, 50mg/mL (Cefzil-BMY)(Apo-Cefprozil-APX)
(Ran-Cefprozil-RPH) (Sandoz Cefprozil-SDZ)**

For treatment of:

- (a) Upper and lower respiratory tract infections in patients unresponsive to first-line antibiotics.
- (b) Infections caused by organisms known to be resistant or unresponsive to alternative antibiotics.
- (c) Infections in patients allergic to alternative antibiotics. (*Note: patients who have had an anaphylactic reaction to penicillin should not receive cephalosporins.*)
- (d) Respiratory tract infections in nursing home patients.
- (e) Pneumonia in patients in the community with comorbidity e.g. chronic underlying lung disease (excluding asthma), diabetes mellitus, renal insufficiency, heart failure, stroke, and:
- (f) For completion of antibiotic treatment initiated in hospital.

Ceftin - see cefuroxime axetil

cefuroxime axetil, suspension, 25mg/mL (Ceftin-GSK)

***tablet, 250mg, 500mg (Ceftin-GSK) (ratio-Cefuroxime-RPH)
(Apo-Cefuroxime-APX)**

For treatment of:

- (a) Upper and lower respiratory tract infections in patients unresponsive to first-line antibiotics.
- (b) Infections caused by organisms known to be resistant or unresponsive to alternative antibiotics.
- (c) Infections in patients allergic to alternative antibiotics. (*Note: patients who have had an anaphylactic reaction to penicillin should not receive cephalosporins.*)
- (d) Respiratory tract infections in nursing home patients.
- (e) Pneumonia in patients in the community with comorbidity i.e. chronic underlying lung disease (excluding asthma), diabetes mellitus, renal insufficiency, heart failure, stroke, and:
- (f) For completion of antibiotic treatment initiated in hospital.

Cefzil - see cefprozil

Celsentri - see maraviroc

Celebrex - see celecoxib

celecoxib, capsule, 100mg, 200mg (Celebrex-PFI)

For treatment of:

- (a) Patients age 65 and over (*approved automatically through the online computer system*).
- (b) Rheumatoid arthritis and osteoarthritis in patients who have one of the following factors:
 - past history of ulcers;
 - concurrent prednisone therapy;
 - concurrent warfarin therapy.
- (c) Patients intolerant to other NSAIDs listed in the Formulary.

CellCept - see mycophenolate mofetil
Cesamet - see nabilone
Chorionic Gonadotropin - see chorionic gonadotropin

**chorionic gonadotropin, injection, 10,000IU/vial
(Chorionic Gonadotropin-OMG)**

- For treatment of:
- (a) Habitual abortion.
 - (b) Delayed puberty.

Ciloxan - see ciprofloxacin
Cipro - see ciprofloxacin tablet
Ciprodex - see ciprofloxacin HCl/dexamethasone
Cipro XL - see ciprofloxacin

***ciprofloxacin, ophthalmic solution, 0.3% (Ciloxan-ALC)
(pms-Ciprofloxacin-PMS) (Apo-Ciprolox-APX); ophthalmic ointment, 0.3%
(Ciloxan-ALC)**

- For treatment of:
- (a) Ophthalmic infections caused by gram-negative organisms.
 - (b) Ophthalmic infections unresponsive to alternative agents.

***ciprofloxacin, tablet, 250mg, 500mg (Apo-Ciproflo-APX)
(CO Ciprofloxacin-COB) (Mylan-Ciprofloxacin-MYL)
(Novo-Ciprofloxacin-NOP) (pms-Ciprofloxacin-PMS)
(ratio-Ciprofloxacin-RPH) (Sandoz Ciprofloxacin-SDZ)
(Dom-Ciprofloxacin-DOM) (Nu-Ciprofloxacin-NXP)
(Ran-Ciproflox-RAN) (Taro-Ciprofloxacin-TAR) (Mint-Ciprofloxacin-MNT);
*tablet, 750mg (Apo-Ciproflo-APX) (CO Ciprofloxacin-COB)
(Mylan-Ciprofloxacin-MYL) (Novo-Ciprofloxacin-NOP)
(pms-Ciprofloxacin-PMS) (ratio-Ciprofloxacin-RPH)
(Sandoz Ciprofloxacin-SDZ) (Dom-Ciprofloxacin-DOM)
(Nu-Ciprofloxacin-NXP) (Ran-Ciproflox-RAN) (Mint-Ciprofloxacin-MNT); oral
suspension 100mg/mL (Cipro-BAY)**

- For treatment of:
- (a) Infections caused by *Pseudomonas aeruginosa*.
 - (b) Infections in patients allergic to two or more alternative antibiotics.
 - (c) Infections known to be resistant to alternative antibiotics. Resistance must be determined by culture and sensitivity testing (C&S).
 - (d) Patients with severe diabetic foot infections in combination with other antibiotics.
 - (e) Infection (and prophylaxis) in patients with prolonged neutropenia.
 - (f) Genitourinary tract infections in patients allergic or unresponsive to alternative antibiotics.
 - (g) Patients with bronchiectasis or cystic fibrosis.
 - (h) Gonorrhea, and:
 - (i) For completion of antibiotic treatment initiated in hospital when alternatives are not appropriate.

ciprofloxacin, extended release tablet, 500mg (Cipro XL-BAY)

For treatment of **uncomplicated urinary tract infections** in **females** unresponsive or allergic to first-line agents.

ciprofloxacin, extended release tablet, 1000mg (Cipro XL-BAY)

For treatment of **complicated urinary tract infections** in patients unresponsive or allergic to first-line agents.

**ciprofloxacin HCl/dexamethasone, otic suspension, 0.3%/0.1%
(Ciprodex-ALC)**

- (a) For acute otitis media with otorrhea through tympanostomy tubes in patients who require treatment.

- (b) For acute otitis externa in the presence of a tympanostomy tube or a known perforation of the tympanic membrane.

***clarithromycin, tablet, 250mg, 500mg (Biaxin-ABB) (Apo-Clarithromycin-APX) (Mylan-Clarithromycin-MYL) (pms-Clarithromycin-PMS) (ratio-Clarithromycin-RPH) (Sandoz Clarithromycin-SDZ) oral suspension, 25mg/mL, 50mg/mL (Biaxin-ABB); extended-release tablet, 500mg (Biaxin XL-ABB)**

For treatment of:

- (a) Pneumonia.
- (b) Upper and lower respiratory tract bacterial infections known to be resistant to alternative antibiotics.
- (c) Upper and lower respiratory tract bacterial infections unresponsive to alternative antibiotics.
- (d) Infections in patients allergic to alternative antibiotics.
- (e) For treatment (and prophylaxis) in patients with non-tuberculous Mycobacterium.
- (f) For one week for eradication of *H. pylori*-related infections when used in combination treatment regimens for the treatment of peptic ulcer disease.
- (g) For completion of treatment initiated in hospital with macrolides or quinolones.
- (h) For patients intolerant to erythromycin and/or other antibiotics.

Clavulin - see amoxicillin trihydrate/potassium clavulanate

Climara - see estradiol

***clonidine HCl, tablet, 0.025mg (Dixarit-BOE) (Apo-Clonidine-APX) (Novo-Clonidine-NOP)**

For treatment of:

- (a) Menopausal flushing.
- (b) Attention Deficit Hyperactivity Disorder.

clopidogrel bisulfate, tablet, 75mg (Plavix-BMY)

- (a) For treatment of patients who have experienced a transient ischemic attack, stroke, or a myocardial infarction **while on acetylsalicylic acid**.
- (b) For treatment of patients who have experienced a transient ischemic attack, stroke, or who have had a myocardial infarction and have a **clearly demonstrated allergy to acetylsalicylic acid** (manifested by asthma or nasal polyps).
- (c) For treatment of patients who have experienced a transient ischemic attack, stroke, or a myocardial infarction and are **intolerant to acetylsalicylic acid** (manifested by gastrointestinal hemorrhage).
- (d) When prescribed following intracoronary stent placement. *Coverage will be provided for a period of 1 year. In patients intolerant or allergic to ASA coverage may be renewed.*
- (e) For reduction of atherothrombotic events in patients with acute coronary syndrome (i.e. unstable angina or non-Q-wave myocardial infarction without ST segment elevation) concurrently with acetylsalicylic acid. Coverage will also be considered for patients intolerant or allergic to acetylsalicylic acid. *Coverage will be provided for a period of 1 year. In patients intolerant or allergic to ASA coverage may be renewed.*
- (f) For treatment of peripheral arterial disease in patients intolerant/allergic to ASA.

Clopixol - see zuclopentixol

***clozapine, tablet, 25mg, 100mg (Clozaril-NVR) (Mylan-Clozapine-MYL) (Apo-Clozapine-APX) tablet, 50mg, 200mg (Mylan-Clozapine-MYL)**

For treatment of schizophrenia in patients who are either treatment resistant or treatment intolerant and have no other medical contraindications.

Clozaril - see clozapine

CO Azithromycin - see azithromycin
CO Cabergoline - see cabergoline
CO Ciprofloxacin - see ciprofloxacin
CO Fluconazole - see fluconazole
CO Levofloxacin - see levofloxacin
CO Sumatriptan - see sumatriptan
CO Meloxicam - see meloxicam
CO Norfloxacin - see norfloxacin
CO Olanzapine - see olanzapine
CO Olanzapine ODT - see olanzapine
CO Pantoprazole - see pantoprazole sodium
CO Pioglitazone - see pioglitazone HCl

**codeine, controlled release tablet, 50mg, 100mg, 150mg, 200mg
(Codeine Contin-PFR)**

For treatment of :

- (a) Palliative and chronic pain patients as an alternative to ASA/codeine combination products or acetaminophen/codeine combination products.
- (b) Palliative and chronic pain patients as an alternative to regular release tablet when large doses are required.

In non-palliative patients, coverage will only be approved for a 6 month course of therapy, subject to review.

Codeine Contin - see codeine
Combivir - see lamivudine/zidovudine
Copaxone - see Appendix G
Crixivan - see indinavir SO₄

***cyclobenzaprine HCl, tablet, 10mg (Apo-Cyclobenzaprine-APX)
(Novo-Cycloprine-NOP) (Nu-Cyclobenzaprine-NXP)
(pms-Cyclobenzaprine-PMS) (Mylan-Cyclobenzaprine-MYL)
(Dom-Cyclobenzaprine-DOM) (ratio-Cyclobenzaprine-RPH)**

As an adjunct to rest and physical therapy for relief of muscle spasm associated with acute, painful musculoskeletal conditions in patients unresponsive to alternative therapy or who are experiencing severe adverse reactions to alternative therapy.

Coverage will be provided for up to a 3 week period. Coverage can be renewed for a 3 week period every 3 months.

**cyclosporine, capsule, 10mg, 25mg, 50mg, 100mg; liquid, 100mg/mL
(Neoral-NVR)**

For treatment of:

- (a) Nephrotic syndrome.
- (b) Severe active rheumatoid arthritis in patients for whom classical slow-acting anti-rheumatic agents are inappropriate or ineffective, and:
- (c) For induction and maintenance of remission of severe psoriasis in patients for whom conventional therapy is ineffective or inappropriate.

For the above indications prescriptions are subject to deductible (where applicable) and co-payment as for other drugs covered under the Drug Plan.

Pharmacies note: claims on behalf of these patients must use the following identifying numbers (not the DIN):

10mg - 00950792	100mg - 00950815
25mg - 00950793	100mg/mL - 00950823
50mg - 00950807	

cyclosporine, capsule, 10mg, 25mg, 50mg, 100mg; liquid, 100mg/mL (Neoral-NVR)

For prophylaxis of graft rejection following solid organ transplant and in bone marrow transplant procedures.

In such cases, the cost is covered at 100% and the deductible (where applicable) does not apply.

Cymbalta - see duloxetine hydrochloride

**cyproterone acetate, injection, 100mg/mL (Androcur-PMS);
*tablet, 50mg (Androcur-PMS) (Mylan-Cyproterone-MYL)
(Apo-Cyproterone-APX)**

For treatment of hirsutism.

dalteparin sodium, syringe, 2,500IU/mL (0.2mL), 25,000IU/mL (0.2mL, 0.3mL, 0.4mL, 0.5mL, 0.6mL, 0.72mL); injection solution, 10,000IU/mL (1mL), 25,000IU/mL (3.8mL) (Fragmin-PFI)

- (a) For treatment of venous thromboembolism for up to 10 days.
- (b) For prophylaxis following total knee arthroplasty for up to 35 days.
- (c) For major orthopedic trauma for up to 10 days (treatment duration may be reassessed).
- (d) For long-term outpatient prophylaxis in patients who are pregnant.
- (e) For long-term outpatient prophylaxis in patients who have a contraindication to, are intolerant to, or have failed, warfarin therapy.
- (f) For long-term outpatient prophylaxis in patients who have lupus anticoagulant syndrome.
- (g) Prophylaxis in patients undergoing total hip replacement or following hip fracture surgery for up to 35 days following the procedure.

darbeoetin alfa, pre-filled syringe, 25ug/mL (0.4mL), 40ug/mL (0.5mL), 100ug/mL (0.3mL, 0.4mL, 0.5mL, 0.65mL), 200ug/mL (0.3mL, 0.4mL, 0.5mL), 500ug/mL (0.3mL, 0.4mL) (Aranesp-AMG)

For treatment of anemia in chronic renal disease patients prior to initiation of dialysis.

Note: Coverage for dialysis patients is provided under the Saskatchewan Aids to Independent Living (S.A.I.L.) Program. Exception Drug Status coverage is not required for S.A.I.L. patients.

darifenacin, extended release tablet, 7.5mg, 15mg (Enablex-NVR)

For treatment of patients intolerant to oxybutynin chloride.

darunavir, tablet, 400mg (Prezista-JAN)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

darunavir, tablet, 300mg, 600mg (Prezista-JAN)

For management of HIV disease in patients shown to be non-responsive or resistant to all currently listed protease inhibitors (except Aptivus). *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

DDAVP - see desmopressin

DDAVP Melt - see desmopressin

deferasirox, tablet for oral suspension, 125mg, 250mg, 500mg (Exjade-NVR)

For treatment of chronic iron overload in patients with transfusion dependent anemias who have a contraindication to the injectable deferoxamine.

***deferroxamine mesylate, powder for solution, 500mg/vial, 2g/vial (pms-Deferroxamine-PMS) (Desferal-NVR) (Desferrioxamine Mesilate-HOS)**
For treatment of iron overload in patients with transfusion-dependent anemias.

delavirdine mesylate, tablet, 100mg (Rescriptor-PFI)
For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Desferal - see deferroxamine mesylate
Desferrioxamine Mesilate - see deferroxamine mesylate

***desmopressin, tablet, 0.1mg, 0.2mg; (DDAVP-FEI) (Apo-Desmopressin-APX) (Novo-Desmopressin-NOP); orally disintegrating tablet, 60ug, 120ug, 240ug (DDAVP Melt-FEI)**

For treatment of:

- Diabetes insipidus.
- Enuresis in children over 5 years of age refractory to bed-wetting alarms or alternative agents listed in the Formulary.
- Nocturia in patients with a recognized neurologic disorder which causes detrusor over-activity confirmed by cystogram in the absence of obstruction, who have not responded or are intolerant to at least two anticholinergic drugs.

***desmopressin, intranasal solution, 10ug/dose (DDAVP-FEI) (Apo-Desmopressin-APX) (Novo-Desmopressin-NOP)**

For treatment of:

- Diabetes insipidus.
- Nocturia in patients with a recognized neurologic disorder which causes detrusor over-activity confirmed by cystogram in the absence of obstruction, who have not responded or are intolerant to at least two anticholinergic drugs.

desmopressin, injection, 4ug/mL (DDAVP-FEI); intranasal solution, 150ug/dose (Octostim-FEI)
For prophylaxis of mild hemophilia A and mild von Willebrand's disease.

Detrol LA - see tolterodine L-tartrate
DexIron - see iron dextran

diclofenac sodium, ophthalmic solution, 0.1% (Voltaren Ophtha-NVO)
For treatment of:

- Post-operative ocular inflammation in patients undergoing cataract surgery.
- Long-term inflammatory conditions unresponsive to short-term topical steroids, and:
- For prophylaxis of aphakic macular edema following cataract surgery.

didanosine, capsule (enteric coated beadlet), 125mg, 200mg, 250mg, 400mg (Videx EC-BMY)
For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Diflucan - see fluconazole

dipyridamole, tablet, 50mg, 75mg (Persantine-BOE)
For treatment following:

- Transluminal angioplasty, for a maximum of 6 months.
- Bypass surgery, for a maximum of 12 months.

- (c) Prosthetic heart valve replacement for 12 months. *This is renewable on a yearly basis.*

dipyridamole/acetylsalicylic acid, capsule, 200mg/25mg (Aggrenox-BOE)

For treatment of patients who have had a:

- (a) Stroke while on acetylsalicylic acid.
(b) Transient ischemic attack while on acetylsalicylic acid.

Dixarit - see clonidine HCl
Dom-Alendronate - see alendronate sodium
Dom-Azithromycin - see azithromycin
Dom-Carbamazepine CR - see carbamazepine
Dom-Carvedilol - see carvedilol
Dom-Ciprofloxacin - see ciprofloxacin
Dom-Cyclobenzaprine - see cyclobenzaprine HCl
Dom-Fluconazole - see fluconazole
Dom-Meloxicam - see meloxicam
Dom-Minocycline - see minocycline HCl
Dom-Selegiline - see selegiline HCl
Dom-Sumatriptan - see sumatriptan
Dom-Ursodiol C - see ursodiol

donepezil HCl, tablet, 5mg, 10mg (Aricept-PFI)

- (a) A diagnosis of probable Alzheimer's disease as per DSM-IV criteria.
(b) A mild to moderate stage of the disease with a MMSE score of 10-26 established within 60-days prior to application for coverage by a clinician or nurse practitioner.
(c) A Functional Activities Questionnaire (FAQ) must be completed within 60-days prior to initial application for coverage by a clinician or nurse practitioner.
(d) Patients must discontinue all drugs with anticholinergic activity at least 14 days before the MMSE and FAQ are administered. Drugs with anticholinergic activity are not to be used concurrently with donepezil therapy. List all current medications patient was taking at the time of assessment.
(e) Patients intolerant to one drug may be switched to another drug in this class. Intolerance should be observed within the first month of treatment.
- **Eligible patients currently taking donepezil** would require assessment at 6 month intervals. To continue receiving donepezil, patients must not have both a greater than 2 point reduction in MMSE and a 1 point increase in FAQ in a 6 month evaluation period. Scores are compared to the most recent test results.
 - **Eligible new patients** will enter a 3 month treatment period with donepezil. During the 3 month trial, patients must exhibit an improvement from the initial MMSE or FAQ to continue treatment with donepezil. The improvement must be at least 2 MMSE points or -1 FAQ. Patients who meet these requirements will be re-evaluated at 6 month intervals. To continue receiving donepezil, patients must not have both a greater than 2 point reduction in MMSE and a 1 point increase in FAQ in a 6 month evaluation period. Scores are compared to the most recent test results.
 - The MMSE score must remain at 10 or greater at all times to be eligible for coverage.
 - Patients who do not meet criteria to continue donepezil can be re-evaluated within 3 months to confirm deterioration before coverage is discontinued.
 - Donepezil does not need to be discontinued prior to MMSE or FAQ testing.
 - A patient intolerant of one drug and switching to a second will be considered a "new" patient and will be assessed as such.

- Coverage will not be considered for patients who have failed on other drugs in this class.

Initial EDS applications for donepezil (Aricept) will only be accepted from physicians on the Aricept/Exelon/Reminyl EDS application form. This form is available online at <http://formulary.drugplan.health.gov.sk.ca> or by calling the Drug Plan. EDS renewals can be submitted either by telephone, mail or fax.

dornase alfa, inhalation solution, 1mg/mL (Pulmozyme-HLR)

For treatment of cystic fibrosis patients who meet the following criteria:

- At least 5 years of age.
- Lung function greater than 40% (as measured by FVC).
- Physicians will be requested to provide evidence of the beneficial effect of this drug in their patients after 6 months of therapy before additional coverage is granted.

Renewal of coverage will be provided for a 6 month period if any of the following criteria are met:

- FEV₁ has improved by 10% from pre-treatment value.
- Decreased antibiotic utilization.
- Decreased hospitalizations.
- Decreased absenteeism from school or work.
- If the individual deteriorates upon discontinuation of Pulmozyme therapy. *Physicians must provide appropriate documentation to establish benefit.*

Dostinex - see cabergoline

duloxetine hydrochloride, delayed release capsule, 30mg, 60mg (Cymbalta-LIL)

- For the treatment of neuropathic pain in diabetic patients unresponsive following treatment with adequate doses of tricyclic antidepressants (TCA) as indicated on the patient profile by 2 consecutive prescriptions for a TCA within 6 months of the EDS request, or
- For the treatment of neuropathic pain in diabetic patients intolerant or contraindicated to tricyclic antidepressants.

Coverage will be provided to a maximum daily dose of 60mg.

Duragesic - see fentanyl

Duragesic Mat - see fentanyl

Edecrin - see ethacrynic acid

efavirenz, capsule, 50mg, 200mg; tablet, 600mg (Sustiva-BMY)

For management of HIV disease. This drug, as with other antivirals in treatment of HIV, should be used under the direction of an infectious disease specialist.

efavirenz/emtricitabine/tenofovir disoproxil fumarate, tablet, 600mg/200mg/300mg (Atripla-BMY)

For treatment of HIV-1 infection where the virus is susceptible to each of tenofovir and emtricitabine and efavirenz and:

- Atripla is used to replace existing therapy with its component drugs, or
- The patient is treatment naive, or
- The patient has established viral suppression but requires antiretroviral therapy modification due to intolerance or adverse effects.

This drug as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.

Eldepryl - see selegiline HCl

Elidel - see pimecrolimus

Elmiron - see pentosan polysulfate sodium

emtricitabine/tenofovir disoproxil fumarate, tablet, 200mg/300mg (Truvada-GSI)

For treatment of HIV patients where:

- a) The virus is susceptible to tenofovir and emtricitabine, **AND**
- b) Efavirenz is not indicated due to adverse effects or antiretroviral resistance.

This drug as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.

Enablex - see darifenacin

Enbrel - see etanercept

enfuvirtide, powder for solution, 108mg/vial (vial) (Fuzeon-HLR)

For management of HIV disease on a case-by-case basis, following committee review of each case. (It was noted that enfuvirtide is not first-line therapy. The most appropriate use of this product is for "salvage therapy"). *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

enoxaparin, syringe, 30mg/mL, 40mg/mL, 60mg/mL, 80mg/mL, 100mg/mL (Lovenox-AVT); injection solution, 100mg/mL (3mL); 150mg/mL (Lovenox HP-AVT)

- (a) For treatment of venous thromboembolism for up to 10 days.
- (b) For prophylaxis following total knee arthroplasty for up to 35 days.
- (c) For major orthopedic trauma for up to 10 days (treatment duration may be reassessed).
- (d) For long-term outpatient prophylaxis in patients who are pregnant.
- (e) For long-term outpatient prophylaxis in patients who have a contraindication to, are intolerant to, or have failed, warfarin therapy.
- (f) For long-term outpatient prophylaxis in patients who have lupus anticoagulant syndrome.
- (g) For treatment of pediatric patients where anticoagulant therapy is required and warfarin therapy cannot be administered.
- (h) Prophylaxis in patients undergoing total hip replacement or following hip fracture surgery for up to 35 days following the procedure.

entecavir, tablet, 0.5mg (Baraclude-BMY)

For treatment of chronic hepatitis B infection in patients with cirrhosis documented on radiologic or histologic grounds and a HBV DNA concentration above 2000IU/mL.

Entocort - see budesonide

epoetin alfa, pre-filled syringe, 1,000 IU/0.5mL, 2,000IU/0.5mL, 3,000IU/0.3mL, 4,000IU/0.4mL, 5,000IU/0.5mL, 6,000IU/0.6mL, 8,000IU/0.8mL, 10,000IU/mL, 20,000IU/0.5mL (Eprex-JAN)

For treatment of:

- (a) Anemia in chronic renal disease patients prior to initiation of dialysis. *Note: Coverage for dialysis patients is provided under the Saskatchewan Aids to Independent Living (S.A.I.L.) Program. Exception Drug Status coverage is not required for S.A.I.L. patients.*
- (b) Anemia in AIDS patients.
- (c) Anemia in transplant patients.

epoprostenol, powder for solution, 0.5mg/vial, 1.5mg/vial (Flolan-GSK)

For treatment of pulmonary hypertension on the recommendation of a specialist.

Please contact the Drug Plan for billing information.

Eprex - see epoetin alfa

esomeprazole magnesium trihydrate, delayed release tablet, 20mg, 40mg (Nexium-AST)

- (a) For a maximum of 8 weeks in treatment of peptic ulcer disease, which includes gastric and duodenal ulcers, in patients not responding or experiencing unusual or severe adverse reactions to a reasonable trial with H₂ blockers, sucralfate or misoprostol. *Coverage for a repeat treatment will be approved only after a 3-6 month period of no treatment or prophylaxis with an H₂ blocker, sucralfate or misoprostol.*
- (b) For treatment of symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to stop-down therapy with an H₂ antagonist depending on symptom resolution.*
- (c) For treatment of severe erosive esophagitis and Zollinger-Ellison Syndrome.
- (d) For one week for eradication of H. pylori-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*
- (e) For first-line prevention of gastroduodenal hemorrhage in high risk patients with prior history of gastroduodenal bleeds for whom anticoagulant, glucocorticosteroid or NSAID therapy cannot be avoided. *Coverage is renewable on a yearly basis for patients if discontinuation of offending agents or replacement with less damaging alternatives is not feasible.*
- (f) For a maximum of 8 weeks in patients discharged from hospital, on a proton pump inhibitor, following a gastroduodenal bleed.

Estalis - see estradiol/norethindrone acetate

Estraderm - see estradiol

estradiol, transdermal gel (metered dose pump), 0.06% (Estrogel-SCH); +transdermal therapeutic system, 25ug, 50ug, 100ug (Estraderm-NVR), 25ug, 50ug, 75ug, 100ug (Climara-BEX), 25ug, 50ug (Oesclim-PAL) *transdermal therapeutic system, 25ug, 37.5ug, 50ug, 75ug, 100ug (Estradot-NVR) (Sandoz Estradiol Derm-SDZ)

For treatment of patients:

- (a) Intolerant to oral estrogen.
- (b) With a fasting plasma triglyceride level of 4.5 mmol/L or more.

estradiol/norethindrone acetate, transdermal therapeutic system (8), 50ug/140ug; 50ug/250ug (Estalis-NVR)

For treatment of patients:

- (a) Intolerant to oral hormone replacement therapy (either estrogen or progesterone).
- (b) With a fasting plasma triglyceride level of 4.5 mmol/L or more.

Estradot - see estradiol

Estrogel - see estradiol

etanercept, powder for injection (vial), 25mg/vial; pre-filled syringe, 50mg/mL (Enbrel-AMG)

For treatment of:

- (a) Active rheumatoid arthritis in patients who have failed or are intolerant to methotrexate and leflunomide.
- (b) Active juvenile rheumatoid arthritis in pediatric patients who have failed one DMARD.
- (c) Psoriatic arthritis in patients who have failed or are intolerant to methotrexate and one other DMARD.

Note: Exceptions can be considered in cases where methotrexate or leflunomide are contraindicated. Treatment should be combined with an immunosuppressant.

(d) For treatment of ankylosing spondylitis (A.S.) according to the following criteria:

- 1) For patients who have already been treated conventionally with two or more NSAIDs taken sequentially at maximum tolerated or recommended doses for four weeks without symptom control. AND
- 2) Satisfy New York diagnostic criteria: a score ≥ 4 on the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) AND a score of ≥ 4 cm on the 0-10cm spinal pain VAS on two occasions at least 12 weeks apart without any change of treatment. AND
- 3) Adequate response to treatment assessed at 12 weeks defined as at least 50% reduction in pre-treatment baseline BASDAI score or by ≥ 2 units AND a reduction of ≥ 2 cm in the spinal pain VAS.

NOTE:

Coverage will not be provided when a patient switches to another anti-TNF agent if the patient fails to respond or if there is loss of response to the first agent. Requests for coverage for this indication must be made by the rheumatologist.

A second application would also be required after 12 weeks to assess and would need to show an improvement to the patient's condition on either of these medications. Please refer to the Formulary website for the application form.

(e) For treatment of adult patients with severe debilitating plaque psoriasis who meet all of the following criteria:

- i) failure to respond to, contraindications to, or intolerant of methotrexate and cyclosporine **AND**
- ii) failure to respond to, intolerant to or unable to access phototherapy. Coverage will be approved initially for the induction phase of up to 16 weeks. Coverage can be renewed in patients who have responded to therapy. This product should be used in consultation with a specialist in this area.

For all of the above indications this product should be used in consultation with a specialist in this area.

ethacrynic acid, tablet, 25mg (Edecrin-MSD)

For treatment of patients intolerant to furosemide.

etodolac, capsule, 200mg, 300mg (Apo-Etodolac-APX)

For treatment of patients intolerant to other NSAIDs listed in the Formulary.

etravirine, tablet, 100mg (Intelence-JAN)

For use in combination with other antiretroviral agents for the treatment of HIV-1 strains resistant to multiple antiretroviral agents, including non-nucleoside reverse transcriptase inhibitors. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Evista - see raloxifene HCl

Exelon - see rivastigmine

Exjade - see deferasirox

***fentanyl, transdermal system, 12ug/hr (Duragesic-JAN) (ratio-Fentanyl-RPH) (Sandoz Fentanyl MTX-SDZ) (Ran-Fentanyl Matrix-RAN) 25ug/hr, 50ug/hr, 75ug/hr, 100ug/hr (Duragesic-JAN) (Ran-Fentanyl-RAN) (ratio-Fentanyl-RPH) (Novo-Fentanyl-NOP) (Sandoz Fentanyl MTX-SDZ) (Duragesic Mat-JAN) (Ran-Fentanyl Matrix-RAN)**

For treatment of patients:

- (a) Intolerant to, or unable to take, oral sustained-release strong opioids.
- (b) As an alternative to subcutaneous narcotic infusion therapy.

Ferrlecit - see iron ferric sodium gluconate complex

filgrastim, injection solution, 300ug/mL (Neupogen-AMG)

For treatment of:

- (a) Congenital, cyclic or idiopathic neutropenia in patients with absolute neutrophil counts of less than or equal to 500.
- (b) Non-cancer patients who have undergone bone marrow transplantation.
- (c) AIDS patients with absolute neutrophil counts of less than 500.

Flexitec - see cyclobenzaprine HCl

Flolan - see epoprostenol

**fluconazole, powder for oral suspension, 10mg/mL (Diflucan-PFI);
*tablet, 50mg, 100mg (Apo-Fluconazole-APX) (Mylan-Fluconazole-MYL)
(pms-Fluconazole-PMS) (Novo-Fluconazole-NOP) (CO Fluconazole-COB)
(Dom-Fluconazole-DOM)**

For treatment of:

- (a) Fungal meningitis in immunocompromised patients.
- (b) Severe or life-threatening fungal infections.
- (c) Severe dermatophytoses unresponsive to other forms of therapy including ketoconazole.

Note: the 150mg capsule form of fluconazole is listed as a regular benefit in the Saskatchewan Formulary.

flunarizine HCl, capsule, 5mg (Apo-Flunarizine-APX)

For prophylaxis of migraines in cases where alternative prophylactic agents have not been effective.

Foradil - see formoterol fumarate

**+formoterol fumarate, powder for inhalation (capsule), 12ug (Foradil-NVR);
powder for inhalation (package), 6ug/dose, 12ug/dose
(Oxeze Turbuhaler-AST)**

For treatment of:

- (a) Asthma uncontrolled on concurrent inhaled steroid therapy. *It is important that these patients also have access to a short-acting beta-2 agonist for symptomatic relief.*
- (b) COPD unresponsive to short-acting beta agonists or short-acting anticholinergic bronchodilators.

**formoterol fumarate dihydrate/budesonide, powder for inhalation (package),
6ug/100ug, 6ug/200ug (Symbicort Turbuhaler-AST)**

For treatment of:

- (a) Asthma in patients uncontrolled on inhaled steroid therapy
- (b) COPD in patients where there has been concurrent or past use of tiotropium or a LABA (salmeterol or formoterol).

Fosamax - see alendronate sodium

**fosamprenavir calcium, tablet, 700mg; oral suspension, 50mg/mL
(Telzir-GSK)**

For the management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Fosavance - see alendronate sodium/vitamin D₃ (cholcalciferol)

fosfomycin tromethamine, oral powder (sachet), 3g (Monurol-AXX)

For treatment of:

- (a) Urinary tract infections with organisms resistant to first line therapy.
- (b) Urinary tract infections in patients allergic to first line agents.
- (c) Urinary tract infections in pregnancy when first line agents are inappropriate.

Fragmin - see dalteparin sodium

Fraxiparine - see nadroparin calcium

Fraxiparine Forte - see nadroparin calcium

Fucithalmic - see fusidic acid

fusidic acid, ophthalmic drops (preservative free), 1%; ophthalmic drops 1% (Fucithalmic-LEO)

For treatment of patients unresponsive to listed alternatives.

Fuzeon - see enfuvirtide

galantamine hydrobromide, extended release capsule, 8mg, 16mg, 24mg (Reminyl ER-JAN)

- (a) A diagnosis of probable Alzheimer's disease as per DSM-IV criteria.
- (b) A mild to moderate stage of the disease with a MMSE score of 10-26 established within 60-days prior to application for coverage by a clinician.
- (c) A Functional Activities Questionnaire (FAQ) must be completed within 60-days prior to initiation for coverage by a clinician.
- (d) Patients must discontinue all drugs with anticholinergic activity at least 14 days before the MMSE and FAQ are administered. Drugs with anticholinergic activity are not to be used concurrently with galantamine hydrobromide therapy. List all current medications patient was taking at the time of assessment.
- (e) Patients intolerant to one drug may be switched to another drug in this class. Intolerance should be observed within the first month of treatment.
 - **Eligible patients currently taking galantamine hydrobromide** would require assessment at 6 month intervals. To continue receiving galantamine hydrobromide, patients must not have both a greater than 2 point reduction in MMSE and a 1 point increase in FAQ in a 6 month evaluation period. Scores are compared to the most recent test results.
 - **Eligible new patients** will enter a 3 month treatment period with galantamine hydrobromide. During the 3 month trial, patients must exhibit an improvement from the initial MMSE or FAQ to continue treatment with galantamine hydrobromide. The improvement must be at least 2 MMSE points or -1 FAQ. Patients who meet these requirements will be re-evaluated at 6 month intervals. To continue receiving galantamine hydrobromide, patients must not have both a greater than 2 point reduction in MMSE and a 1 point increase in FAQ in a 6 month evaluation period. Scores are compared to the most recent test results.
 - The MMSE score must remain at 10 or greater at all times to be eligible for coverage.
 - Patients who do not meet criteria to continue galantamine hydrobromide can be re-evaluated within 3 months to confirm deterioration before coverage is discontinued.
 - Galantamine hydrobromide does not need to be discontinued prior to MMSE or FAQ testing.

- A patient intolerant of one drug and switching to a second will be considered a "new" patient and will be assessed as such.
- Coverage will not be considered for patients who have failed on other drugs in this class.

Initial EDS applications for galantamine (Reminyl) will only be accepted from physicians on the Aricept/Exelon/Reminyl EDS application form. This form is available online at <http://formulary.drugplan.health.gov.sk.ca> or by calling the Drug Plan. EDS renewals can be submitted either by telephone, mail or fax.

gatifloxacin, ophthalmic solution, 0.3% (Zymar-ALL)

For treatment of:

- (a) Ophthalmic infections caused by gram-negative organisms.
- (b) Ophthalmic infections unresponsive to alternative agents.

glatiramer acetate, injection, 20mg (pre-filled syringe) (Copaxone-TVM)

See Appendix G

GlucNorm - see repaglinide

goserelin acetate, 3.6mg/syringe (Zoladex-AST)

For treatment of:

- (a) Endometriosis. (*Coverage may be repeated after a six month lapse, for another 6 month course.*)
- (b) Menorrhagia in preparation for endometrial ablation, and:
- (c) For pre-treatment of uterine fibroids prior to surgical removal.
Coverage will be provided for a maximum of 6 months.

Hepsera - see adefovir dipivoxil

Heptovir - see lamivudine

Hp-PAC - see lansoprazole/clarithromycin/amoxicillin

Humalog - see insulin lispro

Humatrope - see somatropin

Humira - see adalimumab

Humira Pen - see adalimumab

imiquimod, topical cream (single-use packet), 5% (Aldara-MDA)

For treatment of:

- (a) Genital warts in patients unresponsive to podofilox.
- (b) Genital warts in patients with a large wart area.

Imitrex - see sumatriptan

indinavir SO₄, capsule, 200mg, 400mg (Crixivan-MSD)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

infliximab, injection (mg),100mg/vial (Remicade-SCH)

(a) *Moderate to severe Crohn's Disease:*

- For treatment of patients who demonstrate continuing symptoms despite the use of optimal conventional therapies such as 5-ASA agents, glucocorticoids and immunosuppressive therapy.

- For treatment of patients who are intolerant to conventional therapy including 5-ASA agents, glucocorticoids and immunosuppressive therapy.
- (b) *Fistulizing Crohn's Disease:*
- For treatment of patients with symptomatic enterocutaneous or perineal fistulae, enterovaginal fistulae or enterovesical fistulae (i.e. any type of fistulizing Crohn's Disease).
- Clinical response should be assessed after the induction dose. Ongoing coverage will only be provided for those who respond to treatment. Patients undergoing this treatment should be reviewed every six months by a specialist in this area.
- (c) Active rheumatoid arthritis in patients who have failed treatment with methotrexate and leflunomide.
- (d) Active rheumatoid arthritis in patients intolerant to methotrexate and leflunomide.
- Treatment should be combined with an immunosuppressant. This product should be used in consultation with a specialist in this area. (Note: Exceptions can be considered in cases where methotrexate or leflunomide are contraindicated.*
- (e) For treatment of adult patients with severe debilitating plaque psoriasis who meet all of the following criteria:
- i) failure to respond to, contraindications to, or intolerant of methotrexate and cyclosporine; **AND**
 - ii) failure to respond to, intolerant to or unable to access phototherapy.
- Coverage will be approved initially for the induction phase of up to 16 weeks. Coverage can be renewed in patients who have responded to therapy. This product should be used in consultation with a specialist in this area.
- (f) Psoriatic arthritis in patients who have failed or are intolerant to methotrexate and one other DMARD.
- Note: Exceptions can be considered in cases where methotrexate or leflunomide are contraindicated. Treatment should be combined with an immunosuppressant.*
- (g) For treatment of ankylosing spondylitis (A.S.) according to the following criteria:
- 1) For patients who have already been treated conventionally with two or more NSAIDs taken sequentially at maximum tolerated or recommended doses for four weeks without symptom control. **AND**
 - 2) Satisfy New York diagnostic criteria: a score ≥ 4 on the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) **AND** a score of ≥ 4 cm on the 0-10cm spinal pain VAS on two occasions at least 12 weeks apart without any change of treatment. **AND**
 - 3) Adequate response to treatment assessed at 12 weeks defined as at least 50% reduction in pre-treatment baseline BASDAI score or by ≥ 2 units **AND** a reduction of ≥ 2 cm in the spinal pain VAS.

NOTE: Coverage will not be provided when a patient switches to another anti-TNF agent if the patient fails to respond or if there is a loss of response to the first agent. Requests for coverage for this indication must be made by the rheumatologist.

A second application would also be required after 12 weeks to assess and would need to show an improvement to the patient's condition on either of these medications. Please refer to the Formulary website for the application form.

For all of the above indications this product should be used in consultation with a specialist in this area.

Infufer - see iron dextran

Innohep - see tinzaparin sodium

**insulin aspart, injection solution, 100U/mL (5x3mL) (10mL)
(NovoRapid-NOO)**

- (a) For treatment of Type 1 diabetes.
- (b) For treatment of difficult to control Type 2 diabetes in patients who have not responded to alternative insulin agents listed in the Formulary.

insulin detemir, injection solution, 100U/mL (5x3mL) (Levemir-NOO)

For the treatment of patients who have been diagnosed with Type 1 or Type 2 diabetes requiring insulin and are currently taking insulin NPH and/or premix daily at optimal dosing **AND**

- (a) Have experienced unexplained nocturnal hypoglycemia at least once a month despite optimal management.

OR

- (b) Have documented severe or continuing systemic or local allergic reaction to existing insulin.

insulin glargine, injection solution, 100U/mL(10mL); 100U/mL, pre-filled pen SoloStar (3mL) (Lantus-AVT)

For the treatment of patients who have been diagnosed with Type 1 or Type 2 diabetes requiring insulin and are currently taking insulin NPH and/or premix daily at optimal dosing **AND**

Have experienced unexplained nocturnal hypoglycemia at least once a month despite optimal management.

OR

- (a) Have documented severe or continuing systemic or local allergic reaction to existing insulin.

**insulin glulisine, solution for injection, 100U/mL (10mL);
100U/mL, pre-filled pen SoloStar (3mL) (Apidra-AVT)**

- (a) For treatment of Type 1 diabetes.
- (b) For treatment of difficult to control Type 2 diabetes in patients who have not responded to alternative insulin agents listed in the Formulary.

insulin lispro, injection solution, 100U/mL (5x3mL) (10mL) (Humalog-LIL)

- (a) For treatment of Type 1 diabetes
- (b) For treatment of difficult to control Type 2 diabetes in patients who have not responded to alternative insulin agents listed in the Formulary.

Intelligence - see etravirine

interferon alfa-2b, powder for injection, 10 million IU; injection solution albumin (human) free, 6 million IU/mL (0.5mL), 10 million IU/mL (0.5mL, 1mL); multi-dose pen (kit) albumin (human) free, 18 million IU/pen, 30 million IU/pen, 60 million IU/pen (Intron-A-SCH)

For treatment of:

- (a) Chronic active hepatitis B for a period of up to 6 months.
- (b) Chronic active hepatitis C. Coverage will be provided for a duration of up to 48 weeks therapy. Genotypes 2 and 3 may respond to 24 weeks therapy.

Note: Interferons are not interchangeable. Pharmacists should dispense the product specified by the physician.

Intron A - see interferon alfa-2b

interferon beta-1a, powder for IM injection, 30ug (Avonex-BGN); pre-filled syringe, 30ug (Avonex PS-BGN)

See Appendix G

interferon beta-1a, pre-filled syringe, 8.8ug/0.2mL (6)/22ug/0.5mL (6) (Rebif Initiation Pack-SRO)

See Appendix G

interferon beta-1a, pre-filled syringe, 8.8 ug/0.2mL (6), 22ug (6 million IU), 44ug (12 million IU) (Rebif-SRO); pre-filled cartridge, 66ug/1.5mL (3 doses of 22ug), 132ug/1.5mL (3 doses of 44ug) (Rebif-SRO)

See Appendix G

interferon beta-1b, powder for injection, 0.3mg (3mL) (Betaseron-BEX)

See Appendix G

Intron A - see interferon alfa-2b

Invirase - see saquinavir

***iron dextran, injection, 50mg/mL (Infufer-SDZ) (DexIron-MYL)**

For treatment of iron deficiency when patients are intolerant to oral iron replacement products. *Note: Coverage for dialysis patients is provided under the Saskatchewan Aids to Independent Living (S.A.I.L.) Program. Exception Drug Status coverage is not required for S.A.I.L. patients.*

iron ferric sodium gluconate complex, injection solution, 12.5mg/mL (Ferlecit-JAN)

For treatment of:

- (a) Iron deficiency anemia in patients undergoing chronic hemodialysis who are receiving supplemental erythropoetin.
- (b) Iron deficiency anemia in patients intolerant to oral iron replacement products.

Note: Coverage for dialysis patients is provided under the Saskatchewan Aids to Independent Living (S.A.I.L.) Program. Exception Drug Status coverage is not required for S.A.I.L. patients.

iron sucrose, injection, 20mg/mL (Venofer-MYL)

- (a) For treatment of iron deficiency when patients are intolerant to oral iron replacement products and intravenous iron dextran.
- (b) For treatment of patients who are intolerant to oral iron replacement products who require loading regimens of intravenous iron therapy.

Isentress - see raltegravir

itraconazole, capsule, 100mg; oral solution, 10mg/mL (Sporanox-JAN)

For treatment of:

- (a) Severe or life-threatening fungal infections.
- (b) Severe dermatophytoses unresponsive to other forms of therapy.
- (c) Onychomycosis.

Jamp-Lactulose - see lactulose

Kaletra - see lopinavir/ritonavir

Ketek - see telithromycin

***ketoconazole, tablet, 200mg (Apo-Ketoconazole-APX) (Nu-Ketocon-NXP) (Novo-Ketoconazole-NOP)**

For treatment of:

- (a) Severe or life-threatening fungal infections.
- (b) Severe dermatophytoses.
- (c) Dermatophytoses unresponsive to other forms of therapy.

***ketorolac tromethamine, ophthalmic solution, 0.5% (Acular-ALL)
(Apo-Ketoralac-APX) (ratio-Ketorolac-RPH)**

For treatment of:

- (a) Post-operative ocular inflammation in patients undergoing cataract surgery.
- (b) Long-term inflammatory conditions unresponsive to short-acting topical steroids, and:
- (c) For prophylaxis of aphakic macular edema following cataract surgery.

**+ketotifen fumarate, tablet, 1mg (Zaditen-NVR) (Novo-Ketotifen-NOP)
syrup, 0.2mg/mL (Novo-Ketotifen-NOP)**

For treatment of pediatric patients with asthma who are unresponsive to or unable to administer alternative prophylactic agents listed in the Formulary.

Kineret - see anakinra

Kivexa - see abacavir SO₄/lamivudine

***lactulose, solution, 667mg/mL (pms-Lactulose-PMS) (ratio-Lactulose-RPH)
(Apo-Lactulose-APX) (Jamp-Lactulose-JPC)**

For treatment of portal systemic encephalopathy.

lamivudine, tablet, 100mg (Heptovir-GSK)

For management of hepatitis B.

lamivudine, tablet, 150mg, 300mg; oral solution, 10mg/mL (3TC-GSK)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

lamivudine/zidovudine, tablet, 150mg/300mg (Combivir-GSK)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

lanreotide acetate, injection, 60mg, 90mg, 120mg (Somatuline Autogel-TCI)

For treatment of acromegaly.

***lansoprazole, delayed release capsule, 15mg, 30mg (Prevacid-ABB)
(Apo-Lansoprazole-APX) (Novo-Lansoprazole-NOP);
delayed release tablet, 15mg, 30mg (Prevacid FasTab-ABB)**

- (a) For a maximum of 8 weeks in treatment of peptic ulcer disease, which includes gastric and duodenal ulcers, in patients not responding or experiencing unusual or severe adverse reactions to a reasonable trial with H₂ blockers, sucralfate or misoprostol. *Coverage for a repeat treatment will be approved only after a 3-6 month period of no treatment or prophylaxis with an H₂ blocker, sucralfate or misoprostol.*
- (b) For treatment of symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to step-down therapy with an H₂ antagonist depending on symptom resolution.*
- (c) For treatment of severe erosive esophagitis and Zollinger-Ellison Syndrome.
- (d) For one week for eradication of *H. pylori*-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*
- (e) For first-line prevention of gastroduodenal hemorrhage in high risk patients with prior history of gastroduodenal bleeds for whom anticoagulant, glucocorticosteroid or NSAID therapy cannot be avoided. *Coverage is renewable on a yearly basis for patients if discontinuation of offending agents or replacement with less damaging alternatives is not feasible.*
- (f) For a maximum of 8 weeks in patients discharged from hospital, on a

proton pump inhibitor, following a gastroduodenal bleed.

lansoprazole/clarithromycin/amoxicillin, 7 day package, 30mg/500mg/500mg (Hp-PAC-ABB)

For one week for eradication of *H. pylori*-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*

Lantus - see insulin glargine

Lantus SoloStar - see insulin glargine

***leflunomide, tablet, 10mg, 20mg (Arava-AVT) (Apo-Leflunomide-APX) (Novo-Leflunomide-NOP) (Sandoz Leflunomide-SDZ) (pms-Leflunomide-PMS) (Mylan-Leflunomide-MYL)**

For treatment of:

- (a) Active rheumatoid arthritis in patients who have failed methotrexate and at least one other DMARD (e.g. sulfasalazine, azathioprine or hydroxychloroquine).
- (b) Active rheumatoid arthritis in patients intolerant to methotrexate and at least one other DMARD (e.g. sulfasalazine, azathioprine or hydroxychloroquine).

Note: Leflunomide is contraindicated in patients with pre-existing impairment of liver function.

Leucovorin - see leucovorin calcium

leucovorin calcium, tablet, 5mg (Leucovorin-WYA)

For treatment of folic acid deficiency in patients who have been on long-term therapy with trimethoprim/sulfamethoxazole.

leuprolide acetate, injection, 3.75mg/mL, 7.5mg/mL; depot injection, 11.25mg (3-month SR) (Lupron Depot-ABB)

For treatment of:

Endometriosis. *(Coverage may be repeated after a six month lapse, for another 6 month course).*

Menorrhagia in preparation for endometrial ablation, and:

For pre-treatment of uterine fibroids prior to surgical removal.

Coverage will be provided for a maximum of 6 months.

Levaquin - see levofloxacin

Levemir - see insulin detemir

***levofloxacin, tablet, 250mg, 500mg (Levaquin-JAN) (Novo-Levofloxacin-NOP) (Apo-Levofloxacin) (CO Levofloxacin-COB) (Mylan-Levofloxacin-MYL) (pms-Levofloxacin-PMS) (Sandoz Levofloxacin-SDZ)**

For treatment of:

- (a) Pneumonia in patients with underlying lung disease (excluding asthma).
- (b) Pneumonia in nursing home patients.
- (c) Infections in patients allergic to two or more alternative antibiotics.
- (d) Infections known to be resistant to alternative antibiotics. Resistance must be determined by C & S. Where C & S cannot be obtained coverage will be approved when a patient has failed at least 2 other classes of antibiotics, and:
- (e) For completion of antibiotic treatment initiated in hospital when alternatives are not appropriate.
- (f) For treatment of pelvic inflammatory disease.

***levofloxacin, tablet, 750mg (Levaquin-JAN) (Novo-Levofloxacin-NOP)
(Apo-Levofloxacin-APX) (CO Levofloxacin-COB) (pms-Levofloxacin-PMS)
(Sandoz Levofloxacin-SDZ)**

EDS will only be approved for five days.

For treatment of:

- (a) Pneumonia in patients with underlying lung disease (excluding asthma)
- (b) Pneumonia in patients in a nursing home.
- (c) Pneumonia in patients allergic to two or more alternative antibiotics.
- (d) Pneumonia known to be resistant to alternative antibiotics. Resistance must be determined by C & S. Where C & S cannot be obtained coverage will be approved when a patient has failed at least 2 other classes of antibiotics, and:
- (e) For completion of antibiotic treatment of pneumonia initiated in hospital when alternatives are not appropriate.

linezolid, tablet, 600mg (Zyvoxam-PFI)

Following consultation with an infectious disease specialist

For treatment of:

- (a) Gram-positive infections in patients resistant to vancomycin.
- (b) Gram positive infections in patients intolerant to or experiencing severe adverse effects from vancomycin, and:
- (c) For completion of therapy initiated in hospital with intravenous vancomycin, quinupristin/dalfopristin or linezolid for patients who can be discharged on oral therapy.

Lioresal Intrathecal - see baclofen

Loniten - see minoxidil

**lopinavir/ritonavir, tablet, 100mg/25mg; 200mg/50mg; oral solution,
80mg/20mg(mL) (Kaletra-ABB)**

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Losec - see omeprazole magnesium

Lovenox - see enoxaparin

Lovenox HP - see enoxaparin

Lucentis - see ranibizumab

Lupron Depot - see leuprolide acetate

Lyrica - see pregabalin

maraviroc, tablet, 150mg, 300mg (Celsentri-PFI)

For treatment of HIV-1 disease (in combination with other antiretroviral agents) in patients:

- (a) Who have CCR5 tropic viruses **AND**
- (b) Who have documented resistance to at least one agent from each of the three major classes of antiretroviral agents (nucleoside reverse transcriptase inhibitors, non-nucleoside reverse transcriptase inhibitors and protease inhibitors).

Note: Testing for CCR5 tropic viruses is required for use of this agent. This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.

Maxalt - see rizatriptan benzoate

Maxalt RPD - see rizatriptan benzoate

Megace OS - see megestrol acetate oral suspension

***megestrol acetate, tablet, 40mg, 160mg (Apo-Megestrol-APX)
(Nu-Megestrol-NXP)**

For treatment of anorexia, cachexia, or unexplained weight loss in patients with a diagnosis of acquired immunodeficiency (AIDS).

megestrol acetate, oral suspension, 40mg/mL (Megace OS-BMY)

For treatment of anorexia, cachexia, or unexplained weight loss in patients with a diagnosis of acquired immunodeficiency (AIDS).

***meloxicam, tablet, 7.5mg, 15mg (Mobicox-BOE) (pms-Meloxicam-PMS)
(ratio-Meloxicam-RPH) (Apo-Meloxicam-APX) (Dom-Meloxicam-DOM)
(CO Meloxicam-COB) (Mylan-Meloxicam-MYL) (Novo-Meloxicam-NOP)**

For treatment of patients intolerant to other NSAIDs listed in the formulary.

Mepron - see atovaquone

mercaptopurine, tablet, 50mg (Purinethol-GSK)

For treatment of:

- (a) Crohn's disease.
- (b) Rheumatoid arthritis.

**+methoxsalen, capsule, 10mg (Oxsoralen-ICN) (Oxsoralen Ultra-ICN)
lotion, 1% (Oxsoralen-ICN)**

For treatment of psoriasis, for use prior to PUVA therapy.

Miacalcin - see calcitonin salmon nasal spray

***midodrine HCl, tablet, 2.5mg, 5mg (Amatine-RBP) (Apo-Midodrine-APX)**

For treatment of orthostatic hypotension.

Minocin - see minocycline HCl

***minocycline HCl, capsule, 50mg, 100mg (Minocin-WYA)
(Apo-Minocycline-APX) (Novo-Minocycline-NOP)
(ratio-Minocycline-RPH)(Mylan-Minocycline-MYL)
(Med-Minocycline-MED)(Dom-Minocycline-DOM) (Sandoz Minocycline-SDZ)**

For treatment of acne unresponsive to tetracycline.

minoxidil, tablet, 2.5mg, 10mg (Loniten-PFI)

For control of hypertension unresponsive to all other listed therapeutic agents.

Mint-Ciprofloxacin - see ciprofloxacin

Mint-Pioglitazone - see pioglitazone HCl

Mobicox - see meloxicam

***modafinil, tablet, 100mg (Alertec-DPY) (Apo-Modafinil-APX)**

For treatment of:

- (a) Patients with sleep laboratory-confirmed diagnosis of narcolepsy.
- (b) Patients with sleep laboratory-confirmed diagnosis of idiopathic CNS hypersomnia.

**montelukast sodium, chewable tablet, 4mg, 5mg; tablet, 10mg; oral
granules, 4mg (Singulair-MSD)**

For adjunctive treatment of asthma in patients uncontrolled on inhaled corticosteroids.

Monurol - see fosfomycin tromethamine

moxifloxacin HCl, tablet, 400mg (Avelox-BAY)

For treatment of:

- (a) Pneumonia in patients with underlying lung disease (excluding asthma) and pneumonia in nursing home patients.
- (b) Infections in patients allergic to two or more alternative antibiotics.
- (c) Infections known to be resistant to alternative antibiotics. Resistance must be determined by C & S. Where a C & S cannot be obtained coverage will be approved when a patient has failed at least 2 other classes of antibiotics, and:
- (d) For completion of antibiotic treatment initiated in hospital when alternatives are not appropriate.

moxifloxacin HCl, ophthalmic solution, 0.5% (Vigamox-ALC)

For treatment of ophthalmic infections unresponsive to alternative agents.

Mycobutin - see rifabutin

mycophenolate mofetil, capsule, 250mg; tablet, 500mg; powder for oral suspension, 200mg/mL (CellCept-HLR)

- (a) For prevention of acute rejection in transplant patients.
- (b) For treatment of nephrotic syndrome in cases of biopsy-proven evidence of severe proliferative lesions or sclerosis, which have not responded after a 6 month course of cyclophosphamide, or in patients unable to tolerate cyclophosphamide.

mycophenolate sodium, enteric coated tablet, 180mg, 360mg (Myfortic-NVR)

For prevention of acute rejection in renal transplant patients.

Myfortic - see mycophenolate sodium

Mylan-Alendronate - see alendronate sodium

Mylan-Azithromycin - see azithromycin

Mylan-Carbamazepine CR - see carbamazepine

Mylan-Ciprofloxacin - see ciprofloxacin

Mylan-Clarithromycin - see clarithromycin

Mylan-Clozapine - see clozapine

Mylan-Cycloprine - see cyclobenzaprine HCl

Mylan-Cyproterone - see cyproterone acetate

Mylan-Fluconazole - see fluconazole

Mylan-Leflunomide - see leflunomide

Mylan-Levofloxacin - see levofloxacin

Mylan-Meloxicam - see meloxicam

Mylan-Minocycline - see minocycline HCl

Mylan-Nabumetone - see nabumetone

Mylan-Omeprazole - see omeprazole

Mylan-Pantoprazole - see pantoprazole sodium

Mylan-Pioglitazone - see pioglitazone HCl

Mylan-Rivastigmine - see rivastigmine

Mylan-Selegiline - see selegiline HCl

Mylan-Sumatriptan - see sumatriptan

Mylan-Ticlopidine - see ticlopidine HCl

Mylan-Tizanidine - see tizanidine HCl

Myozyme - see alglucosidase alfa

nabilone, capsule, 0.5mg, 1mg (Cesamet-VAE)

For treatment of nausea and anorexia in AIDS patients.

***nabumetone, tablet, 500mg (Apo-Nabumetone-APX)
(Mylan-Nabumetone-MYL) (Novo-Nabumetone-NOP); 750mg
(Novo-Nabumetone-NOP)**

For treatment of patients intolerant to other NSAIDs listed in the Formulary.

**nadroparin calcium, syringe, 9,500IU/mL (0.3mL, 0.4mL, 0.6mL, 0.8mL,
1.0mL) (Fraxiparine-AVT); syringe, 19,000IU/mL (0.6mL, 0.8mL, 1mL)
(Fraxiparine Forte-AVT)**

- (a) For treatment of venous thromboembolism for up to 10 days.
- (b) For prophylaxis following total knee arthroplasty for up to 35 days.
- (c) For major orthopedic trauma for up to 10 days (treatment duration may be reassessed).
- (d) For long-term outpatient prophylaxis in patients who are pregnant.
- (e) For long-term outpatient prophylaxis in patients who have a contraindication to, are intolerant to, or have failed, warfarin therapy.
- (f) For long-term outpatient prophylaxis in patients who have lupus anticoagulant syndrome.
- (g) Prophylaxis in patients undergoing total hip replacement or following hip fracture surgery for up to 35 days following the procedure.

nafarelin acetate, intranasal solution, 2mg/mL (Synarel-HLR)

For treatment of:

- (a) Endometriosis. *(Coverage may be repeated after a six month lapse, for another 6 month course).*
- (b) Menorrhagia in preparation for endometrial ablation, and:
- (c) For pre-treatment of uterine fibroids prior to surgical removal.
Coverage will be provided for a maximum of 6 months

Nalcrom - see sodium cromoglycate

naratriptan HCl, tablet, 1mg, 2.5mg (Amerge-GSK)

For treatment of migraine headaches in patients over 18 years of age.

The maximum quantity that can be claimed through the Drug Plan is limited to 6 doses per 30 days within a 60-day period. Patients requiring more than 12 doses in a consecutive 60-day period should be considered for migraine prophylaxis therapy if they are not already receiving such therapy.

natalizumab, solution for IV infusion, 20mg/mL (Tysabri-BGN)

See Appendix G

nateglinide, tablet, 60mg, 120mg (Starlix-NVR)

For treatment of :

- (a) Diabetes in patients uncontrolled on sulfonylureas.
- (b) Diabetes in patients intolerant to sulfonylureas.

nelfinavir mesylate, tablet, 250mg, 625mg (Viracept-PFI)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Neoral - see cyclosporine

Neupogen - see filgrastim

nevirapine, tablet, 200mg (Viramune-BOE)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Nexium - see esomeprazole magnesium trihydrate

nimodipine, tablet, 30mg (Nimotop-BAY)

For treatment of subarachnoid hemorrhage to complete a 3 week course of treatment in cases where a patient is discharged from hospital before completion of the treatment period.

Nimotop - see nimodipine

Nizoral - see ketoconazole

***norfloxacin, tablet, 400mg (Apo-Norflo-APX) (Novo-Norfloxacine-NOP) (pms-Norfloxacine-PMS) (CO Norfloxacine-COB)**

For treatment of:

- (a) Genitourinary tract infections caused by *Pseudomonas aeruginosa*.
- (b) Genitourinary tract infections in patients allergic to alternative agents.
- (c) Genitourinary tract infections in patients with organisms known to be resistant to alternative antibiotics, and:
- (d) For adults with gonococcal urethritis or cervicitis.

Norprolac - see quinagolide HCl

Norvir - see ritonavir

Norvir SEC - see ritonavir

Novo-Alendronate - see alendronate sodium

Novo-Azithromycin - see azithromycin

Novo-Carvedilol - see carvedilol

Novo-Ciprofloxacin - see ciprofloxacin

Novo-Clavamoxin - see amoxicillin trihydrate/potassium clavulanate

Novo-Clonidine - see clonidine HCl

Novo-Cycloprine - see cyclobenzaprine HCl

Novo-Desmopressin - see desmopressin

Novo-Fentanyl - see fentanyl

Novo-Fluconazole - see fluconazole

Novo-Ketoconazole - see ketoconazole

Novo-Ketotifen - see ketotifen fumarate

Novo-Lansoprazole - see lansoprazole

Novo-Leflunomide - see leflunomide

Novo-Levofloxacin - see levofloxacin

Novo-Meloxicam - see meloxicam

Novo-Minocycline - see minocycline HCl

Novo-Nabumetone - see nabumetone

Novo-Norfloxacine - see norfloxacine

Novo-Olanzapine - see olanzapine

Novo-Olanzapine OD - see olanzapine

Novo-Pantoprazole - pantoprazole sodium

Novo-Pioglitazone - see pioglitazone HCl

Novo-Rabeprazole EC - see rabeprazole sodium

Novo-Raloxifene - see raloxifene HCl

NovoRapid - see insulin aspart

Novo-Rivastigmine- see rivastigmine

Novo-Selegiline - see selegiline HCl

Novo-Sumatriptan - see sumatriptan

Novo-Sumatriptan DF - see sumatriptan

Novo-Ticlopidine - see ticlopidine

Nu-Carvedilol - see carvedilol

Nu-Ciprofloxacin - see ciprofloxacin

Nu-Cyclobenzaprine - see cyclobenzaprine HCl

Nu-Ketocon - see ketoconazole

Nu-Megestrol - see megestrol acetate tablet

Nu-Selegiline - see selegiline HCl

Nu-Ticlopidine - see ticlopidine HCl

Nutropin - see somatropin

Nutropin AQ - see somatropin
Nutropin AQ Pen - see somatropin
Octostim - see desmopressin

***octreotide, injection, 50ug/mL (1mL), 100ug/mL (1mL), 200ug/mL (5mL), 500ug/mL (1mL) (Sandostatin-NVR) (Octreotide Acetate-OMG); powder for injection, 10mg/vial, 20mg/vial, 30mg/vial (Sandostatin LAR-NVR)**

- (a) For management of terminal malignant bowel obstruction in palliative patients.
- (b) For treatment of acromegaly.

Note: Coverage for federally approved cancer indications is provided under the Saskatchewan Cancer Agency according to their guidelines.

Octreotide Acetate - see octreotide
Ocuflox - see ofloxacin ophthalmic solution
Oesclim - see estradiol

***ofloxacin, ophthalmic solution, 0.3% (Ocuflox-ALL) (Apo-Ofloxacin-APX) (pms-Ofloxacin-PMS)**

For the treatment of:

- (a) Ophthalmic infections caused by gram-negative organisms.
- (b) Ophthalmic infections unresponsive to alternative agents, and:
- (c) Infiltrative corneal infections.

***olanzapine, tablet, 2.5mg, 5mg, 7.5mg, 10mg, 15mg (Zyprexa-LIL) (Novo-Olanzapine-NOP) (pms-Olanzapine-PMS) (Apo-Olanzapine-APX); orally disintegrating tablet, 5mg, 10mg, 15mg (Zyprexa Zydis-LIL) (Novo-Olanzapine OD-NOP) (PMS-Olanzapine ODT-PMS) (CO Olanzapine ODT-COB) (Sandoz Olanzapine ODT-SDZ)**

For treatment of:

- (a) Schizophrenia.
- (b) Other psychotic conditions where there has been:
 - Treatment failure to other atypical anti-psychotic agents.
 - Intolerance to other atypical anti-psychotic agents.
- (c) Patients with acute mania of bi-polar affective disorder for an additional 4 weeks following hospital discharge, and:
- (d) For maintenance treatment of bipolar disorder in patients who are unresponsive to other first line agents (lithium, divalproex and lamotrigine).

***omeprazole, capsule/tablet, 20mg (Losec-AST) (Apo-Omeprazole-APX) (ratio-Omeprazole-RPH) (Sandoz Omeprazole-SDZ) (pms-Omeprazole DR-PMS) (Mylan-Omeprazole-MYL)**

- (a) For a maximum of 8 weeks in treatment of peptic ulcer disease, which includes gastric and duodenal ulcers, in patients not responding or experiencing unusual or severe adverse reactions to a reasonable trial with H₂ blockers, sucralfate or misoprostol. *Coverage for a repeat treatment will be approved only after a 3-6 month period of no treatment or prophylaxis with an H₂ blocker, sucralfate or misoprostol.*
- (b) For treatment of symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to step-down therapy with an H₂ antagonist depending on symptom resolution.*
- (c) For treatment of severe erosive esophagitis and Zollinger-Ellison Syndrome.

- (d) For one week for eradication of *H. pylori*-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*
- (e) For first-line prevention of gastroduodenal hemorrhage in high risk patients with prior history of gastroduodenal bleeds for whom anticoagulant, glucocorticosteroid or NSAID therapy cannot be avoided. *Coverage is renewable on a yearly basis for patients if discontinuation of offending agents or replacement with less damaging alternatives is not feasible.*
- (f) For a maximum of 8 weeks in patients discharged from hospital, on a proton pump inhibitor, following a gastroduodenal bleed.

***omeprazole, capsule/tablet 10mg (Losec-AST) (Sandoz Omeprazole-SDZ) (Mylan-Omeprazole-MYL)**

For treatment of:

- (a) Symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to step-down therapy with an H₂ antagonist depending on symptom resolution.*
- (b) Severe erosive esophagitis and Zollinger-Ellison syndrome. *This is renewable on a yearly basis, and:*
- (c) For maintenance therapy of healed reflux esophagitis. *This is renewable on a yearly basis.*

One-Alpha - see alfacalcidol

Orencia - see abatacept

***oxcarbazepine, tablet, 150mg, 300mg, 600mg (Trileptil-NVR)**

(Apo-Oxcarbazepine-APX);

oral suspension, 60mg/mL (Trileptil-NVR)

For treatment of partial seizures in patients intolerant to carbamazepine.

Oxeze Turbuhaler - see formoterol fumarate

Oxsoralen - see methoxsalen

***pamidronate disodium, injection, 30mg, (Aredia-NVR)**

(Pamidronate Disodium Injection-DBU) (pms-Pamidronate-PMS)

(Sandoz Pamidronate-SDZ) (Pamidronate Disodium Omega-OMG);

***injection, 60mg (Pamidronate Disodium Injection-DBU)**

(Sandoz Pamidronate-SDZ) (Pamidronate Disodium Omega-OMG)

***injection, 90mg (Aredia-NVR) (Pamidronate Disodium Injection-DBU)**

(pms-Pamidronate-PMS) (Sandoz Pamidronate-SDZ)

(Pamidronate Disodium Omega-OMG)

For treatment of osteoporosis in patients intolerant to oral bisphosphonates.

Pamidronate Disodium Omega - see pamidronate disodium

***pantoprazole sodium, enteric-coated tablet, 20mg (ratio-Pantoprazole-RPH)**

(Sandoz Pantoprazole-SDZ) (Apo-Pantoprazole-APX)

(Novo-Pantoprazole-NOP) (Ran-Pantoprazole-RAN); 40mg (Pantoloc-NYC)

(Apo-Pantoprazole-APX) (Novo-Pantoprazole-NOP) (Ran-Pantoprazole-RAN)

(CO Pantoprazole-COB) (Mylan-Pantoprazole-MYL) (pms-Pantoprazole-PMS)

(ratio-Pantoprazole-RPH) (Sandoz Pantoprazole-SDZ)

- (a) For a maximum of 8 weeks in treatment of peptic ulcer disease, which includes gastric and duodenal ulcers, in patients not responding or experiencing unusual or severe adverse reactions to a reasonable trial with H₂ blockers, sucralfate or misoprostol. *Coverage for a repeat*

- treatment will be approved only after a 3-6 month period of no treatment or prophylaxis with an H₂ blocker, sucralfate or misoprostol.*
- (b) For treatment of symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to step-down therapy with an H₂ antagonist depending on symptom resolution.*
 - (c) For treatment of severe erosive esophagitis and Zollinger-Ellison Syndrome.
 - (d) For one week for eradication of H. pylori-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*
 - (e) For first-line prevention of gastroduodenal hemorrhage in high risk patients with prior history of gastroduodenal bleeds for whom anticoagulant, glucocorticosteroid or NSAID therapy cannot be avoided. *Coverage is renewable on a yearly basis for patients if discontinuation of offending agents or replacement with less damaging alternatives is not feasible.*
 - (f) For a maximum of 8 weeks in patients discharged from hospital, on a proton pump inhibitor, following a gastroduodenal bleed.

pantoprazole magnesium, enteric-coated tablet, 40mg (Tecta-NYC)

- (a) For a maximum of 8 weeks in treatment of peptic ulcer disease, which includes gastric and duodenal ulcers, in patients not responding or experiencing unusual or severe adverse reactions to a reasonable trial with H₂ blockers, sucralfate or misoprostol. *Coverage for a repeat treatment will be approved only after a 3-6 month period of no treatment or prophylaxis with an H₂ blocker, sucralfate or misoprostol.*
- (b) For treatment of symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to step-down therapy with an H₂ antagonist depending on symptom resolution.*
- (c) For treatment of severe erosive esophagitis and Zollinger-Ellison Syndrome.
- (d) For one week for eradication of H. pylori-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*
- (e) For first-line prevention of gastroduodenal hemorrhage in high risk patients with prior history of gastroduodenal bleeds for whom anticoagulant, glucocorticosteroid or NSAID therapy cannot be avoided. *Coverage is renewable on a yearly basis for patients if discontinuation of offending agents or replacement with less damaging alternatives is not feasible.*
- (f) For a maximum of 8 weeks in patients discharged from hospital, on a proton pump inhibitor, following a gastroduodenal bleed.

Pantoloc - see pantoprazole sodium

Pariet - see rabeprazole sodium

Pegatron - see peginterferon alfa-2b/ribavirin

peginterferon alfa-2a, injection (pre-filled syringe), 180ug/0.5mL, injection (vial) 180ug/1mL (Pegasys-HLR)

- (a) For treatment of chronic active hepatitis C. Coverage will be provided for a duration of up to 48 weeks. Genotypes 2 and 3 may respond to 24 weeks of therapy.
- (b) For the management of hepatitis B for up to 48 weeks.

peginterferon alfa-2a/ribavirin, injection (pre-filled syringe)/tablet, 180ug/0.5mL/200mg; injection (vial)/tablet, 180ug/1mL/200mg (Pegasys RBV-HLR)

For treatment of chronic active hepatitis C. Coverage will be provided for a duration of up to 48 weeks. Genotypes 2 and 3 may respond to 24 weeks of therapy.

peginterferon alfa-2b/ribavirin, powder for solution/capsule, 50ug/0.5mL/200mg, 150ug/0.5mL/200mg (Pegetron-SCH) 80ug/0.5mL/200mg, 100ug/0.5mL/200mg, 120ug/0.5mL/200mg, 150ug/0.5mL/200mg (Pegetron Redipen-SCH)

For treatment of chronic active hepatitis C. Coverage will be provided for a duration of up to 48 weeks. Genotypes 2 and 3 may respond to 24 weeks of therapy.

peginterferon alfa-2b, powder for injection (vial), 50ug/0.5mL, 80ug/0.5mL, 120ug/0.5mL, 150ug/0.5mL (Unitron PEG-SCH)

For treatment of chronic active hepatitis C. Coverage will be provided for a duration of up to 48 weeks. Genotypes 2 and 3 may respond to 24 weeks of therapy.

peginterferon alfa-2b/ribavirin, powder for solution/capsule, 50ug/200mg, 80ug/200mg, 100ug/200mg, 120ug/200mg, 150ug/200mg (Pegetron-SCH)

For treatment of chronic active hepatitis C. Coverage will be provided for a duration of up to 48 weeks. Genotypes 2 and 3 may respond to 24 weeks of therapy.

pentosan polysulfate sodium, capsule, 100mg (Elmiron-JAN)

For treatment of interstitial cystitis where other treatments have failed.

Persantine - see dipyridamole

PhosLo - see calcium acetate

pimecrolimus, topical cream, 1% (Elidel-NVR)

For treatment of:

- (a) Atopic dermatitis in patients unresponsive to topical steroids tried within the last 3 months.
- (b) Atopic dermatitis in patients intolerant to topical steroids tried within the last 3 months.

***pioglitazone HCl, tablet, 15mg, 30mg, 45mg (Actos-LIL) (Apo-Pioglitazone-APX) (CO Pioglitazone-COB) (Mylan-Pioglitazone-MYL) (Novo-Pioglitazone-NOP) (pms-Pioglitazone-PMS) (ratio-Pioglitazone-RPH) (Sandoz Pioglitazone-SDZ) (Accel Pioglitazone-ACC) (Mint-Pioglitazone-MNT)**

See Appendix B for online adjudication criteria.

Plavix - see clopidogrel bisulfate

pms-Alendronate - see alendronate sodium

pms-Alendronate-FC - see alendronate sodium

pms-Azithromycin - see azithromycin

pms-Bezafibrate - see bezafibrate

pms-Bupropion SR - see bupropion HCl

pms-Carbamazepine-CR - see carbamazepine

pms-Carvedilol - see carvedilol

pms-Ciprofloxacin - see ciprofloxacin

pms-Clarithromycin - see clarithromycin

pms-Cyclobenzaprine - see cyclobenzaprine HCl

pms-Deferoxamine - see deferoxamine mesylate

pms-Fluconazole - see fluconazole
pms-Ketotifen - see ketotifen
pms-Lactulose - see lactulose
pms-Leflunomide - see leflunomide
pms-Levofloxacin - see levofloxacin
pms-Meloxicam - see meloxicam
pms-Norfloracin - see norfloracin
pms-Ofloxacin - see ofloxacin
pms-Olanzapine - see olanzapine
pms-Olanzapine ODT - see olanzapine
pms-Omeprazole DR - see omeprazole
pms-Pantoprazole - see pantoprazole sodium
pms-Pioglitazone - see pioglitazone HCl
pms-Rabeprazole - see rabeprazole sodium
pms-Rivastigmine - see rivastigmine
pms-Sumatriptan - see sumatriptan
pms-Tobramycin - see tobramycin
pms-Ursodiol C - see ursodiol
pms-Vancomycin - see vancomycin HCl

pregabalin, capsule, 25mg, 50mg, 75mg, 150mg, 300mg (Lyrica-PFI)

- (a) For the treatment of neuropathic pain in patients unresponsive following treatment with adequate doses of tricyclic antidepressants (TCA) as indicated on the patient profile by 2 consecutive prescriptions for a TCA within 6 months of the EDS request, or
- (b) For the treatment of neuropathic pain in patients intolerant or contraindicated to tricyclic antidepressants.

Note: Coverage is not approved for the treatment of pain associated with conditions such as fibromyalgia, Multiple Sclerosis, Trigeminal Neuralgia and others.

Prevacid - see lansoprazole
Prevacid FasTab - see lansoprazole
Prezista - see darunavir

progesterone (micronized), capsule, 100mg (Prometrium-SCH)

For treatment of patients:

- (a) Intolerant to medroxyprogesterone acetate (Provera).
- (b) Having low high-density lipoproteins.

Prograf - see tacrolimus
Prometrium - see progesterone (micronized)
Protopic - see tacrolimus
Pulmozyme - see dornase alfa
Purinethol - see mercaptopurine

quinagolide HCl, tablet, 0.075mg, 0.150mg (Norprolac-FEI)

For the treatment of hyperprolactinemia in patients who have failed or are intolerant to bromocriptine.

***rabeprazole sodium, enteric coated tablet, 10mg, 20mg (Pariet-JAN)
(Novo-Rabeprazole EC-NOP) (Ran-Rabeprazole-RAN) (pms-Rabeprazole EC-PMS)
(Sandoz Rabeprazole-SDZ)**

- (a) For a maximum of 8 weeks in treatment of peptic ulcer disease, which includes gastric and duodenal ulcers, in patients not responding or experiencing unusual or severe adverse reactions to a reasonable trial with H₂ blockers, sucralfate or misoprostol. *Coverage for a repeat*

treatment will be approved only after a 3-6 month period of no treatment or prophylaxis with an H₂ blocker, sucralfate or misoprostol.

- (b) For treatment of symptoms of gastroesophageal reflux disease (GERD). *It was noted that patients with non-erosive GERD could potentially be reduced to step-down therapy with an H₂ antagonist depending on symptom resolution.*
- (c) For treatment of severe erosive esophagitis and Zollinger-Ellison Syndrome.
- (d) For one week for eradication of H. pylori-related infections in individuals with peptic ulcer disease. *Provision will be made for additional coverage in treatment failures.*
- (e) First-line prevention of gastroduodenal hemorrhage in high-risk patients with prior history of gastroduodenal bleeds for whom anticoagulant, glucocorticosteroid or NSAID therapy cannot be avoided. *Coverage is renewable on a yearly basis for patients if discontinuation of offending agents or replacement with less damaging alternatives is not feasible.*
- (f) For a maximum of 8 weeks in patients discharged from hospital, on a proton pump inhibitor, following a gastroduodenal bleed.

***raloxifene HCl, tablet, 60mg (Evista-LIL) (Apo-Raloxifene-APX)
(Novo-Raloxifene-NOP)**

For treatment of:

- (a) Osteoporosis in patients unresponsive to etidronate disodium/calcium (Didrocal) after receiving it for 1 year.
- (b) Osteoporosis in patients intolerant to etidronate disodium/calcium (Didrocal).

raltegravir, tablet, 400mg (Isentress-MSD)

For the treatment of HIV-1 infection in treatment-experienced patients who have evidence of viral replication and HIV-1 strains resistant to three classes of HIV agents. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Ran-Carvedilol - see carvedilol

Ran-Cefprozil - see cefprozil

Ran-Ciproflox - see ciprofloxacin

Ran-Clarithromycin - see clarithromycin

Ran-Fentanyl - see fentanyl

Ran-Fentanyl Matrix - see fentanyl

Ran-Pantoprazole - see pantoprazole sodium

Ran-Rabeprazole - see rabeprazole sodium

ranibizumab, injection solution, 10mg/mL (0.3mL vial) (Lucentis-NVR)

For the treatment of neovascular (wet) age-related macular degeneration (AMD) if **all** of the following circumstances apply to the eye to be treated:

- (a) The best corrected visual acuity (BCVA) is between 6/12 and 6/96
- (b) The lesion size is less than or equal to 12 disc areas in greatest linear dimension
- (c) There is evidence of recent (< 3 months) presumed disease progression (blood vessel growth, as indicated by fluorescein angiography, optical coherence tomography (OCT) or recent visual acuity changes)
- (d) Injection will be by a qualified ophthalmologist with experience in intravitreal injections

Coverage will not be provided for patients:

- (a) With permanent structural damage to the central fovea or no active disease (as defined in the Royal College of Ophthalmology guidelines).
- (b) Receiving concurrent verteporfin PDT treatment.

The interval between the doses should be no shorter than one month.
Treatment with ranibizumab should be continued only in people who maintain adequate response to therapy.

Ranibizumab should be permanently **discontinued** if any one of the following occurs:

- (a) Reduction in BCVA in the treated eye to less than 15 letters (absolute) on 2 consecutive visits in the treated eye, attributed to AMD in the absence of other pathology.
- (b) Reduction in BCVA of 30 letters or more compared to either baseline and/or best recorded level since baseline and/or best recorded level since baseline as this may indicate either poor treatment effect or adverse event or both.
- (c) There is evidence of deterioration of the lesion morphology despite optimum treatment over 3 consecutive visits.

Rapamune - see sirolimus

ratio-Aclavulanate - see amoxicillin trihydrate/potassium clavulanate

ratio-Alendronate - see alendronate sodium

ratio-Azithromycin - see azithromycin

ratio-Bupropion SR - see bupropion HCl

ratio-Carvedilol - see carvedilol

ratio-Cefuroxime - see cefuroxime axetil

ratio-Ciprofloxacin - see ciprofloxacin

ratio-Clarithromycin - see clarithromycin

ratio-Cyclobenzaprine - see cyclobenzaprine HCl

ratio-Fentanyl - see fentanyl

ratio-Ketorolac - see ketorolac tromethamine

ratio-Lactulose - see lactulose

ratio-Meloxicam - see meloxicam

ratio-Minocycline - see minocycline HCl

ratio-Omeprazole - see omeprazole

ratio-Pantoprazole - see pantoprazole sodium

ratio-Pioglitazone - see pioglitazone HCl

ratio-Rivastigmine - see rivastigmine

Rebif - see Appendix G

Rebif Initiation Pack - see Appendix G

Remicade - see infliximab

Reminyl ER - see galantamine hydrobromide

Remodulin - see treprostinil

Renagel - see sevelamer HCl

repaglinide, tablet, 0.5mg, 1mg, 2mg (GlucoNorm-NOO)

For treatment of :

- (a) Diabetes in patients uncontrolled on sulfonylureas.
- (b) Diabetes in patients intolerant to sulfonylureas.

Rescriptor - see delavirdine mesylate

Retin A - see tretinoin

Retrovir - see zidovudine

Revatio - see sildenafil citrate

Reyataz - see atazanavir SO₄

rifabutin, capsule, 150mg (Mycobutin-PFI)

For prevention of disseminated *Mycobacterium avium complex* (MAC) in patients with advanced human immunodeficiency virus (HIV) infection.

risedronate sodium, tablet, 5mg, 35mg, 75mg, 150mg (Actonel-PGA)

For treatment of:

- (a) Osteoporosis in patients unresponsive to etidronate disodium/calcium (Didrocal) after receiving it for one year.
- (b) Osteoporosis in patients intolerant to etidronate disodium/calcium (Didrocal).
- (c) Osteoporosis in patients who have pre-existing and/or recent fractures, and:
- (d) Glucocorticoid-induced osteoporosis in patients who have received systemic glucocorticoid treatment for at least 3 months.

risedronate sodium, tablet, 30mg (Actonel-PGA)

For treatment of symptomatic Paget's disease of the bone.

Risperdal Consta - see risperidone

risperidone, powder for suspension sustained-release, 25mg/vial, 37.5mg/vial, 50mg/vial (Risperdal Consta-JAN)

For treatment of patients exhibiting a compliance problem with an oral antipsychotic and in whom the administration of a conventional injectable extended action antipsychotic is ineffective or poorly tolerated.

ritonavir, oral solution, 80mg/mL (Norvir-ABB); soft elastic capsule, 100mg (Norvir SEC-ABB)

For management of HIV disease. *This drug, as with other antivirals in treatment of HIV, should be used under the direction of an infectious disease specialist.*

Rituxan - see rituximab

rituximab, injection solution, 10mg/mL (Rituxan-HLR)

For treatment of severe rheumatoid arthritis when used in combination with methotrexate in adult patients who have failed to respond to an adequate trial of an anti-TNF agent. Rituxan should not be used concomitantly with anti-TNF agents.

Please contact the Drug Plan for billing information.

rivaroxaban, tablet, 10mg (Xarelto-BAY)

- (a) For prophylaxis following total knee arthroplasty for up to 14 days following the procedure.
- (b) For prophylaxis in patients undergoing total hip replacement for up to 14 days following the procedure.

***rivastigmine, capsule, 1.5mg, 3mg, 4.5mg, 6mg (Exelon-NVR)**

(Sandoz Rivastigmine-SDZ) (pms-Rivastigmine-PMS)

(Mylan-Rivastigmine-MYL) (ratio-Rivastigmine-RPH)

(Novo-Rivastigmine-NOP)

oral solution, 2mg/mL ((Exelon-NVR)

- (a) A diagnosis of probable Alzheimer's disease as per DSM-IV criteria.
- (b) A mild to moderate stage of the disease with a MMSE score of 10-26 established within 60-days prior to application for coverage by a clinician.
- (c) A Functional Activities Questionnaire (FAQ) must be completed.
- (d) Patients must discontinue all drugs with anticholinergic activity at least 14 days before the MMSE and FAQ are administered. Drugs with anticholinergic activity are not to be used concurrently with rivastigmine therapy. List all current medications patient was taking at the time of assessment.
- (e) Patients intolerant to one drug may be switched to another drug in this class. Intolerance should be observed within the first month of treatment.
 - **Eligible patients currently taking rivastigmine** would require assessment at 6 month intervals. To continue receiving rivastigmine,

patients must not have both a greater than 2 point reduction in MMSE and a 1 point increase in FAQ in a 6 month evaluation period. Scores are compared to the most recent test results.

- **Eligible new patients** will enter a 3 month treatment period with rivastigmine. During the 3 month trial, patients must exhibit an improvement from the initial MMSE or FAQ to continue treatment with rivastigmine. The improvement must be at least 2 MMSE points or -1 FAQ. Patients who meet these requirements will be re-evaluated at 6 month intervals. To continue receiving rivastigmine, patients must not have both a greater than 2 point reduction in MMSE and a 1 point increase in FAQ in a 6 month evaluation period. Scores are compared to the most recent test results.

The MMSE score must remain at 10 or greater at all times to be eligible for coverage.

- Patients who do not meet criteria to continue rivastigmine can be re-evaluated within 3 months to confirm deterioration before coverage is discontinued.
- Rivastigmine does not need to be discontinued prior to MMSE or FAQ testing.
- A patient intolerant of one drug and switching to a second will be considered a "new" patient and will be assessed as such.
- Coverage will not be considered for patients who have failed on other drugs in this class.

Initial EDS application for rivastigmine (Exelon) will only be accepted from physicians on the Aricept/Exelon/Reminyl EDS application form. This form is available online at <http://formulary.drugplan.health.gov.sk.ca> or by calling the Drug Plan. EDS renewals can be submitted either by telephone, mail or fax.

rizatriptan benzoate, tablet, 5mg, 10mg (Maxalt-MSD); wafer, 5mg, 10mg (Maxalt RPD-MSD)

For treatment of migraine headaches in patients over 18 years of age.

The maximum quantity that can be claimed through the Drug Plan is limited to 6 doses per 30 days within a 60-day period. Patients requiring more than 12 doses in a consecutive 60-day period should be considered for migraine prophylaxis therapy if they are not already receiving such therapy.

Rocaltrol - see calcitriol

rosiglitazone maleate, tablet, 2mg, 4mg, 8mg (Avandia-GSK)

See Appendix B for online adjudication criteria.

rosiglitazone maleate/metformin HCl, tablet, 1mg/500mg, 2mg/500mg, 4mg/500mg, 2mg/1000mg, 4mg/1000mg (Avandamet-GSK)

See Appendix B for online adjudication criteria.

Saizen - see somatropin

salmeterol xinafoate, metered dose inhaler, 25ug/actuation; powder disk, 50ug/blister (Serevent-GSK); powder for inhalation (package), 50ug/dose (Serevent Diskus-GSK)

For treatment of:

- (a) Asthma uncontrolled on concurrent inhaled steroid therapy.
It is important that these patients also have access to a short-acting beta-2 agonist for symptomatic relief.

- (b) COPD unresponsive to short-acting beta agonists or short-acting anticholinergic bronchodilators.

salmeterol xinafoate/fluticasone propionate, metered dose inhaler (package), 25ug/125ug, 25ug/250ug (Advair-GSK); powder for inhalation (package), 50ug/100ug, 50ug/250ug, 50ug/500ug (Advair Diskus-GSK)

For treatment of:

- (a) Asthma in patients uncontrolled on inhaled steroid therapy. *It is important that these patients also have access to a short-acting beta-2 agonist for symptomatic relief.*
- (b) COPD in patients where there has been concurrent or past use of tiotropium or a LABA (salmeterol or formoterol).

Sandostatin - see octreotide

Sandostatin LAR - see octreotide

Sandoz Alendronate - see alendronate sodium

Sandoz Azithromycin - see azithromycin

Sandoz Bupropion SR - see bupropion HCl

Sandoz Calcitonin NS - see calcitonin salmon

Sandoz Cefprozil - see cefprozil

Sandoz Ciprofloxacin - see ciprofloxacin

Sandoz Clarithromycin - see clarithromycin

Sandoz Estradiol Derm - see estradiol

Sandoz Fentanyl MTX - fentanyl

Sandoz Leflunomide - see leflunomide

Sandoz Levofloxacin - see levofloxacin

Sandoz Minocycline - see minocycline HCl

Sandoz Olanzapine ODT - see olanzapine

Sandoz Omeprazole - see omeprazole

Sandoz Pamidronate - see pamidronate

Sandoz Pantoprazole - see pantoprazole sodium

Sandoz Pioglitazone - see pioglitazone HCl

Sandoz Rabeprazole - see rabeprazole sodium

Sandoz Rivastigmine - see rivastigmine

Sandoz Sumatriptan - see sumatriptan

Sandoz Ticlopidine - see ticlopidine HCl

Sandoz Tobramycin - see tobramycin ophthalmic solution

saquinavir, capsule, 200mg, 500mg (Invirase-HLR)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

***selegiline HCl, tablet, 5mg (Novo-Selegiline-NOP) (Apo-Selegiline-APX) (Mylan-Selegiline-MYL) (Nu-Selegiline-NXP) (Dom-Selegiline-DOM) (pms-Selegiline-PMS)**

- (a) For use as an adjunct in cases of Parkinson's disease being treated with levodopa, levodopa/benserazide, levodopa/carbidopa, or bromocriptine.
- (b) For prophylaxis in early Parkinsonism.

Serevent - see salmeterol xinafoate

Serevent Diskus - see salmeterol xinafoate

sevelamer HCl, tablet, 800mg (Renagel-GZY)

For treatment of:

- (a) End-stage renal disease in patients intolerant to aluminum or calcium containing phosphate-binding agents.

- (b) End-stage renal disease in patients where aluminum or calcium containing phosphate-binding agents are inappropriate.

sildenafil citrate, tablet, 20mg (Revatio-PFI)

For treatment of pulmonary arterial hypertension on the recommendation of a specialist. Note: The maximum dose that will be provided as a benefit is 20mg three times daily.

Singulair - see montelukast sodium

sirolimus, tablet, 1mg; oral solution, 1mg/mL (Rapamune-WYA)

For prophylaxis of graft rejection in transplant patients.

sodium cromoglycate, capsule, 100mg (Nalcrom-AVT)

For treatment of:

- (a) Patients who experience severe reactions to foods which cannot be avoided.
- (b) Crohn's Disease unresponsive to traditional therapy.
- (c) Ulcerative colitis in patients unresponsive to traditional therapy.

solifenacin succinate, tablet, 5mg, 10mg (Vesicare-APC)

For treatment of patients intolerant to oxybutynin chloride.

somatropin, injection, 5mg (Humatrope-LIL), 6mg, 12mg, 24mg (Humatrope Cartridge-LIL)

For treatment of children who have growth failure due to inadequate secretion of normal endogenous growth hormone.

+somatropin, injection, 3.33mg, 8.8mg (Saizen-SRO), 5mg (Nutropin-HLR) (Saizen-SRO), 10mg (Nutropin AQ-HLR) (Nutropin-HLR); cartridge, 10 mg (Nutropin AQ Pen-HLR)

For treatment of:

- (a) Children who have growth failure due to inadequate secretion of normal endogenous growth hormone.
- (b) Children who have growth failure associated with chronic renal insufficiency. *Note Exception Drug Status coverage is not required for S.A.I.L. patients. Coverage is provided under Saskatchewan Aids to Independent Living (S.A.I.L.) Program.*

Somatuline Autogel - see lanreotide acetate

Soriatane - see acitretin

Spiriva - see tiotropium bromide monohydrate

Sporanox - see itraconazole

Starlix - see nateglinide

stavudine, capsule, 15mg, 20mg, 30mg, 40mg (Zerit-BRI)

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Stelara - see ustekinumab

Stieva-A Forte - see tretinoin

Strattera - see atomoxetine HCl

Suboxone - see buprenorphine/naloxone

***sumatriptan, tablet, 25mg (CO Sumatriptan-COB)
(Mylan-Sumatriptan-MYL) (pms-Sumatriptan-PMS) (Dom-Sumatriptan-DOM)
(Novo-Sumatriptan DF-NOP); 50mg (Imitrex DF-GSK)
(Apo-Sumatriptan-APX) (CO Sumatriptan-COB) (Mylan-Sumatriptan-MYL)
(pms-Sumatriptan-PMS) (Sandoz Sumatriptan-SDZ) (ratio-Sumatriptan-RPH)
(Dom-Sumatriptan-DOM) (Novo-Sumatriptan DF-NOP);
100mg (Imitrex DF-GSK) (Apo-Sumatriptan-APX) (CO Sumatriptan-COB)
(Mylan-Sumatriptan-MYL) (Novo-Sumatriptan-NOP) (pms-Sumatriptan-PMS)
(Sandoz Sumatriptan-SDZ) (ratio-Sumatriptan-RPH) (Dom-Sumatriptan-DOM)
(Novo-Sumpatriptan DF-NOP); nasal spray, 5mg, 20mg (Imitrex-GSK)**

For treatment of migraine headaches in patients over 18 years of age.

The maximum quantity that can be claimed through the Drug Plan is limited to 6 doses per 30 days within a 60-day period. Patients requiring more than 12 doses in a consecutive 60-day period should be considered for migraine prophylaxis therapy if they are not already receiving such therapy.

Suprax - see cefixime

Suprefact - see buserelin acetate

Sustiva - see efavirenz

Symbicort Turbuhaler - see formoterol fumarate dihydrate/budesonide

Synarel - see nafarelin acetate

3TC - see lamivudine

tacrolimus, capsule, 0.5mg, 1mg, 5mg (Prograf-APC); extended-release capsule, ampoule, 0.5mg, 1mg, 5mg; (Advagraf-APC), 5mg/mL (Prograf-APC)

For prophylaxis of graft rejection and to prevent rejection in post bone marrow/stem cell transplant patients.

tacrolimus, topical ointment, 0.03%, 0.1% (Protopic-FUJ)

For treatment:

- (a) Atopic dermatitis in patients unresponsive to topical steroids tried within the last 3 months.
- (b) Atopic dermatitis in patients intolerant to topical steroids tried within the last 3 months.

Taro-Ciprofloxacin - see ciprofloxacin

Tecta - see pantoprazole magnesium

Tegretol CR - see carbamazepine

telithromycin, tablet, 400mg (Ketek-AVT)

For treatment of pneumonia known to be resistant or unresponsive to listed alternatives and for pneumonia in patients allergic to listed alternatives.

Telzir - see fosamprenavir calcium

tenofovir disoproxil fumarate, tablet, 300mg (Viread-GSI)

For treatment of:

- (a) HIV in patients who have failed an alternative nucleoside reverse transcriptase inhibitor.
- (b) HIV in patients intolerant to an alternative nucleoside reverse transcriptase inhibitor.

This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.

- (c) Chronic hepatitis B infection in patients with cirrhosis documented on radiologic or histologic grounds and a HBV DNA concentration above 2000IU/mL.

***ticlopidine HCl, tablet, 250mg (Apo-Ticlopidine-APX) (Nu-Ticlopidine-NXP) (Mylan-Ticlopidine-MYL) (Sandoz Ticlopidine-SDZ) (Novo-Ticlopidine-NOP)**

For treatment of patients who have experienced a:

- (a) Transient ischemic attack, stroke, or myocardial infarction while on acetylsalicylic acid.
- (b) Transient ischemic attack, stroke or myocardial infarction and have clearly demonstrated allergy to acetylsalicylic acid (manifested by asthma or nasal polyps).
- (c) Transient ischemic attack, stroke or a myocardial infarction and are intolerant of acetylsalicylic acid (manifested by gastrointestinal hemorrhage).

tinzaparin sodium, syringe, 10,000IU/mL (0.35mL, 0.45mL), 20,000IU/mL (0.5mL, 0.7mL, 0.9mL); injection solution, 10,000IU/mL (2mL), 20,000IU/mL (2mL) (Innohep-LEO)

- (a) For treatment of venous thromboembolism for up to 10 days.
- (b) For prophylaxis following total knee arthroplasty for up to 35 days.
- (c) For major orthopedic trauma for up to 10 days (treatment duration may be reassessed).
- (d) For long-term outpatient prophylaxis in patients who are pregnant.
- (e) For long-term outpatient prophylaxis in patients who have a contraindication to, are intolerant to, or have failed, warfarin therapy.
- (f) For long-term outpatient prophylaxis in patients who have lupus anticoagulant syndrome.
- (g) Prophylaxis in patients undergoing total hip replacement or following hip fracture surgery for up to 35 days following the procedure.

tiotropium bromide monohydrate, powder capsule, 18ug/dose (Spiriva-BOE)

- (a) For treatment of COPD in patients unresponsive to short-acting beta agonists or short-acting anticholinergic bronchodilators, or
- (b) For treatment of moderate to severe COPD (i.e. Medical Research Council (MRC) dyspnea scale score 3 to 5), in conjunction with spirometry demonstrating moderate to severe airflow obstruction (i.e. FEV1 <60% and low FEV1/FVC <0.7), without a trial of short-acting agents.

tipranavir, capsule, 250mg (Aptivus-BOE)

For the management of HIV disease in patients who have been shown to be non-responsive or resistant to all currently listed protease inhibitors (except Prezista).

This drug, as with all antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.

***tizanidine HCl, tablet, 4mg (Zanaflex-DPY) (Apo-Tizanidine-APX) (Mylan-Tizanidine-MYL)**

For treatment of :

- (a) Severe spasticity in patients unresponsive to baclofen or benzodiazepines.
- (b) Severe spasticity in patients intolerant to baclofen or benzodiazepines.

TOBI - see tobramycin inhalation solution

Tobradex - see tobramycin/dexamethasone

Tobramycin - see tobramycin ophthalmic solution

tobramycin, inhalation solution, 60mg/mL (TOBI-CCL)

For treatment of cystic fibrosis patients intolerant to injectable tobramycin when used for inhalation.

**tobramycin, ophthalmic ointment, 0.3% (Tobrex-ALC);
*ophthalmic solution, 0.3% (Tobrex-ALC) (pms-Tobramycin-PMS)
(Sandoz Tobramycin-SDZ)**

For treatment of ophthalmic infections in cases unresponsive to gentamicin ophthalmic.

tobramycin/dexamethasone, ophthalmic suspension, 0.3%/0.1%; ophthalmic ointment, 0.3%/0.1% (Tobradex-ALC)

- (a) For treatment of ophthalmic infections in cases unresponsive to therapeutic alternatives.
- (b) For post-operative long-term (>7days) use.

Tobrex - see tobramycin

tolterodine l-tartrate, extended-release capsule, 2mg, 4mg (Detrol LA-PFI)

For treatment of patients intolerant to oxybutynin chloride.

Tracleer - see bosentan

treprostinil, injection solution, 1mg, 2mg, 5mg, 10mg (Remodulin-NTI)

For treatment of patients with primary pulmonary hypertension or pulmonary hypertension secondary to collagen vascular disease, with New York Heart association class 111 or 1V disease who have both:

- (a) failed to respond to non-prostanoid therapies (i.e. calcium channel blockers, vasodilators, bosentan)

and:

- (b) who are not candidates for epoprostenol therapy because of:
 - prior recurrent complications with central line access (i.e. infection, thrombosis) or,
 - they reside in an area without ready access to medical care, which could complicate problems associated with an abrupt interruption of epoprostenol therapy.

Please contact the Drug Plan for billing information.

***tretinoin, cream, 0.1% (Stieva-A Forte-STI) (Retin A-JAN)**

For treatment of acne unresponsive to alternative topical therapy.

triamcinolone hexacetonide, injection suspension, 20mg/mL (Aristospan-STI)

For intra-articular injection in the management of pediatric chronic inflammatory arthropathies.

Trileptal - see oxcarbazepine

Trizivir - see abacavir SO₄/lamivudine/zidovudine

Trosec - see trospium chloride

trospium chloride, tablet, 20mg (Trosec-ORX)

For treatment of patients intolerant to oxybutynin chloride.

Truvada - see emtricitabine/tenofovir disproxil fumarate

Tysabri - see natalizumab

Ultramop - see methoxsalen

Unitron PEG - see peginterferon alfa-2b

Urispas - see flavoxate HCl

Urso - see ursodiol

***ursodiol, tablet, 250mg (Urso-AXC), 500mg (Urso DS-AXC)
(pms-Ursodiol C-PMS)
(Dom-Ursodiol C-DOM)**

For management of cholestatic liver diseases such as primary biliary cirrhosis.

ustekinumab, solution for injection, 45mg/0.5mL (Stelara-JAN)

For treatment of adult patients with severe debilitating plaque psoriasis who meet all of the following criteria:

- i) failure to respond to, contraindications to, or intolerant of methotrexate and cyclosporine and
- ii) failure to respond to, intolerant to or unable to access phototherapy.

Coverage will be approved initially for the induction phase of up to 16 weeks. Coverage can be renewed in patients who have responded to therapy. This product should be used in consultation with a specialist in this area.

Valcyte - see valganciclovir HCl

**valganciclovir HCl, tablet, 450mg (Valcyte-HLR); powder for oral solution, 50mg/mL
(Valcyte-HLR)**

- (a) For treatment of retinitis arising from CMV infection in patients with HIV infection.
- (b) For treatment and prophylaxis of CMV infection in transplant patients. Coverage will be approved for a six month period.

Vancocin - see vancomycin HCl

**vancomycin HCl, capsule, 125mg, 250mg (Vancocin-LIL);
injection, 500mg, 1g (pms-Vancomycin-PMS)**

For treatment of Clostridium difficile infections for up to two consecutive two week periods after no response, allergies or intolerance to a course of metronidazole. *Repeat approvals will only be granted with laboratory evidence of C. difficile toxin.*

Venofer - see iron sucrose

Vesicare - see solifenacin succinate

Vfend - see voriconazole

Videx EC - see didanosine

Vigamox - see moxifloxacin HCl

Viracept - see nelfinavir

Viramune - see nevirapine

Viread - see tenofovir disoproxil fumarate

Vitamin A Acid - see tretinoin

Volibris - see ambrisentan

Voltaren Ophtha - see diclofenac sodium

voriconazole, tablet, 50mg, 200mg; (Vfend-PFI)

For step-down treatment of patients treated in hospital for invasive aspergillosis or other serious fungal infections in consultation with an infectious disease specialist.

Wellbutrin SR - see bupropion HCl

Wellbutrin XL - see bupropion HCl

Xarelto - see rivaroxaban

Zaditen - see ketotifen fumarate

zafirlukast, tablet, 20mg (Accolate-AST)

For treatment of:

- (a) Asthma when used in patients on concurrent steroid therapy.
- (b) Asthma in patients uncontrolled on inhaled corticosteroids.

Zanaflex - see tizanidine HCl

Zerit - see stavudine

Ziagen - see abacavir SO₄

zidovudine, syrup, 10mg/mL; injection, 10mg/mL (Retrovir-GSK)

***capsule, 100mg (Retrovir-GSK) (Apo-Zidovudine-APX)**

For management of HIV disease. *This drug, as with other antivirals in the treatment of HIV, should be used under the direction of an infectious disease specialist.*

Zithromax - see azithromycin

Zoladex - see goserelin acetate

zoledronic acid, solution, 5mg/100mL (Aclasta-NVR)

For symptomatic treatment of Paget's disease of the bone. *Note: only one treatment per year is required.*

zolmitriptan, tablet, 2.5mg (Zomig-AST); orally dispersible tablet, 2.5mg (Zomig Rapimelt-AST); nasal spray, 5mg (Zomig Nasal Spray-AST)

For treatment of migraine headaches in patients over 18 years of age.

The maximum quantity that can be claimed through the Drug Plan is limited to 6 doses per 30 days within a 60-day period. Patients requiring more than 12 doses in a consecutive 60-day period should be considered for migraine prophylaxis therapy if they are not already receiving such therapy.

Zomig - see zolmitriptan

Zomig Nasal Spray - see zolmitriptan

Zomig Rapimelt - see zolmitriptan

zuclopenthixol, acetate injection, 50mg/mL (Clopixol-Acuphase-AVT); decanoate injection, 200mg/mL (Clopixol-Depot-AVT); dihydrochloride tablet, 10mg, 25mg, (Clopixol-AVT)

For treatment of schizophrenia in patients unresponsive to other neuroleptic medications.

Zymar - see gatifloxacin

Zyprexa - see olanzapine

Zyprexa Zydis - see olanzapine

Zyvoxam - see linezolid

LEGEND:

***These brands of products have been approved as interchangeable.**

+These brands of products have NOT been approved as interchangeable.

APPENDIX B

ONLINE ADJUDICATION CRITERIA

Online Adjudication

Approval of certain criteria based medication is available online.

Claims for the medications noted below can be submitted and adjudicated automatically through the online computer system. For these specific medications, the Drug Plan computer system checks the patient's online drug profile and if the necessary alternate dates appear on the Drug Plan profile the coverage and approval letter are automatically generated for the patient. This means the prescriber or pharmacist will not need to apply for coverage for these specific medications via phone, fax or mail.

Please Note: *Requests for these medications are still accepted by telephone, mail or fax. This may be required if for some reason the patient's computer profile is incomplete or if there are unusual circumstances surrounding the application.*

Online Adjudication Medications

***pioglitazone HCl, tablet, 15mg, 30mg, 45mg**

For treatment of patients who have had previous prescriptions for metformin or sulfonylureas (as indicated by prescription claims on their online Drug Plan profile).

rosiglitazone maleate, tablet, 2mg, 4mg, 8mg

For treatment of patients who have had previous prescriptions for metformin or sulfonylureas (as indicated by prescription claims on their online Drug Plan profile).

rosiglitazone maleate/metformin HCl, tablet, 1mg/500mg, 2mg/500mg, 4mg/500mg, 2mg/1000mg, 4mg/1000mg

For the convenience of patients who have been stabilized on metformin and rosiglitazone.

Please Note: *These products should be used in patients with diabetes who are not adequately controlled on or are intolerant to metformin or sulfonylureas.*

APPENDIX C

SPECIAL COVERAGES

A) SENIORS' DRUG PLAN

Effective July 1, 2008, an income test component was introduced to the Seniors' Drug Plan. Saskatchewan residents who are 65 years of age and older with a reported income (Line 236) that is less than \$66,698 for 2008 will be eligible; he/she must submit a complete application (Form A) to be approved for benefits. This program ensures that Saskatchewan seniors pay \$15* per prescription for drugs listed in the Saskatchewan Formulary or approved under Exception Drug Status.

The Seniors' Drug Plan does not include seniors who are covered under federal government programs, such as the federal Non-Insured Health Benefits Program or Veterans Affairs Canada.

Seniors with Guaranteed Income Supplement (G.I.S.) or Seniors' Income Plan (S.I.P.) will continue to have a \$200 or \$100 semi-annual deductible. Individual prescriptions under these two programs will be \$15.

Seniors with Special Support coverage will pay the lesser of the Special Support co-payment or the \$15 per prescription.

Patients with the following coverage WILL NOT be affected and will continue to be covered in the same manner as they have in the past:

- Saskatchewan Aids to Independent Living (SAIL)
- Palliative Care
- Seniors receiving S.I.P. and residing in a long term care facility

Which prescriptions are covered?

Prescription drugs listed on the Saskatchewan Formulary and approved under Exception Drug Status.

How does someone apply?

Application forms are available:

- online at www.health.gov.sk.ca/seniors-prescription-drug-plan
- at your pharmacy
- by contacting the Drug Plan and Extended Benefits Branch toll-free at 1-800-667-7581 or in Regina at 787-3317

Form A – CRA Application/Consent One-Time Application Form

To apply for the Seniors' Drug Plan program, each eligible senior must complete and sign an application and consent form. By using Form A, he/she gives the Drug Plan and Extended Benefits Branch permission to update coverage annually.

Form B – Annual Application

To apply for the Seniors' Drug Plan, this form can be completed and submitted with income information each year.

B) SPECIAL SUPPORT PROGRAM - INCOME BASED DRUG BENEFITS

An income-based program was implemented on July 1, 2002. Individuals or families will pay the full cost of their prescriptions unless they apply to the income-based program, the Special Support Program. As of July 1, 2008, coverage under the Special Support program will be effective the date a complete application is received by the Drug Plan and Extended Benefits Branch.

What is Special Support?

The Special Support Program is designed to assist **those whose benefit drug costs are high in relation to their income**. Based on income information provided on the application form, income tax documentation and Drug Plan records, the Drug Plan calculates a family threshold (deductible) and a consumer co-payment that may reduce the consumer's share of drug costs. The threshold is based on 3.4% of the total family income (adjusted for number of dependents) and the co-payment is calculated using total family income and actual benefit drug costs.

How does a person apply?

Residents can call the Drug Plan at 787-3317 (in Regina) or toll-free at 1-800-667-7581 and request an application form be sent to them or they may pick up a form at their community pharmacy. The benefit period is January 1 to December 31.

There are two application forms available on the health website: www.health.gov.sk.ca/health_forms.html under Special Support Program. The differences include:

- 1) CRA Application/Consent form:
 - one time completion of application form
 - must sign "CONSENT to Canada Revenue Agency" section
 - must forward documentation of income initially; subsequent years the coverage will automatically be renewed as long as the applicant and spouse both file individual income tax to CRA
- 2) Annual Application:
 - must re-apply annually by October 1
 - must sign "CONSENT and DECLARATION" section
 - must forward document of income each year, such as the Notice of Assessment or pages 1 and 2 of their income tax forms.

If the family income or medication costs change during the coverage period, the consumer may contact the Drug Plan for a reassessment of coverage:

1. changes in income must be made in writing with supporting documentation;
2. a request to review the assessment should be made in writing; or
3. a pharmacist may contact the Drug Plan requesting the coverage be reviewed due to new drugs.

C) INCOME SUPPLEMENT RECIPIENTS

Who receives income supplements?

Adults in families receiving Family Health Benefits, and seniors receiving the Seniors' Income Plan supplement (S.I.P.) or receiving the federal Guaranteed Income Supplement (G.I.S.) and residing in a special care home will pay a \$100 semi-annual deductible.

Seniors receiving S.I.P. and residing in a nursing home may be nominated for coverage under Supplementary Health and would pay no cost for formulary and approved Exception Drugs and would be eligible for other extended health benefits. The special-

care home completes a Health Coverage Advice form and Seniors' Income Plan completes the nomination.

Seniors receiving G.I.S. (ie. living in the community) have a \$200 semi-annual deductible.

Seniors who have high drug costs in relation to their income may apply for Special Support. They will have their drug coverage based on income and drug costs.

The Seniors' Drug Plan will ensure that no senior will pay more than \$15* per prescription.

Other Health Benefits:

All seniors who receive S.I.P. are eligible for the following through the Medical Services Branch:

- Vision exams
- Chiropractic treatments

All seniors are eligible for Emergency Ambulance Coverage. The senior would pay the first \$250 and the Senior Citizens Ambulance Assistance Program (SCAP) covers the remaining cost.

All seniors are eligible for coverage of Oxygen if they meet certain medical criteria.

1) Family Health Benefits

Family Health Benefits help low-income families pay for their children's optical, dental, drug and other health expenses. To be eligible, families must include at least one child under the age of 18, living with parents or guardians in Saskatchewan. They must have a valid Saskatchewan Health Services Card.

Eligibility is established through the Ministry of Social Services, in co-operation with Revenue Canada, based on the family income for the previous year and the number of children in the family. Most eligible families will be receiving the Saskatchewan Child Benefit, the National Child Benefit Supplement, or the Saskatchewan Employment Supplement.

Children under 18 years of age of families receiving Family Health Benefits are eligible for the same benefits as Supplementary Health beneficiaries with Plan Two coverage (see page 274). This means all covered drugs will be provided at no charge*. Also certain dental services, medical supplies and appliances, optical services, chiropractic services, and emergency medical transportation costs will be covered.

Adults receiving Family Health Benefits are also eligible for chiropractic services and an eye examination every two years.

Inquiries regarding benefits, contact the Supplementary Health Program:

Regina: 787-3124 Toll-free: 1-800-266-0695

Inquiries regarding prescription drugs should be directed to the Drug Plan:

Regina: 787-3317 Toll-free: 1-800-667-7581

SUMMARY OF FAMILY HEALTH BENEFITS

HEALTH BENEFITS	CHILDREN	PARENTS OR GUARDIANS
Dental Coverage	Covers the majority of the cost of most services	Coverage not provided
Optometric Services	Eye examinations once a year Basic Eyeglasses	Eye examinations covered once every two years
Emergency Ambulance	Covered	Coverage not provided
Medical Supplies	Basic coverage, some items require prior approval	Coverage not provided
Chiropractic Services	Covered	Covered
Drug Coverage	No charge for Formulary drugs*	\$100 semi-annual family deductible; 35% consumer co-payment there after Drug Plan Special Support Program available if provides better coverage (Consumer must apply)

D) SUPPLEMENTARY HEALTH (SOCIAL ASSISTANCE) BENEFICIARIES

1) Plan One Drug Coverage

Beneficiaries with Supplementary Health cards designated as "Plan One" may obtain prescriptions for Formulary drugs and approved Exception Drug Status drugs for \$2.00* per prescription. In addition, they may obtain the following prescribed drugs without charge:

insulin, oral hypoglycemics, injectable Vitamin B₁₂, oral contraceptives, allergenic extracts, and products used in megavitamin therapy.

Beneficiaries under the age of 18 may obtain Formulary drugs or approved Exception Drug Status drugs without charge*.

The Supplementary Health Program covers the cost of allergenic extracts and products used in megavitamin therapy. All of the other products listed above are covered and prescription claims are processed through the Drug Plan network.

*MAC & LCA policies apply.

2) Plan Two Drug Coverage

Beneficiaries requiring five or more Formulary drugs on a regular basis can be considered for "Plan Two" drug coverage. Plan Two coverage may be initiated by contacting the Drug Plan at 787-8744 or (toll-free) 1-800-667-7581. A patient or a health professional (ie. physician, social worker) may submit the request.

Individuals with Supplementary Health cards designated as "Plan Two" may obtain the products available under "Plan One" together with any Formulary drugs or approved Exception Drug Status drugs, without charge*.

3) Plan Three Drug Coverage

Beneficiaries with Supplementary Health cards designated as "Plan Three" may obtain, in addition to drugs available under the Drug Plan, select prescribed over-the-counter (OTC) products and drugs at no charge*. The Supplementary Health Program covers the cost of these select products. The prescription claims are processed through the Drug Plan network.

Pharmacies may contact the Drug Plan at 787-3315 (Regina) or (toll-free) 1-800-667-7578 with inquires regarding Plan Three drug coverage.

E) EMERGENCY ASSISTANCE

What is Emergency Assistance?

Residents who require immediate treatment with covered prescription drugs and are unable to cover their share of the cost, may access Emergency Assistance. An eligible beneficiary may obtain a limited supply of covered prescription drug(s) at a reduced cost. Generally, this is a one-time assistance for no more than a month's supply. The level of assistance provided will be in accordance with the consumer's ability to pay. A Special Support Application **must be** completed for future assistance.

How do I request Emergency Assistance?

During regular office hours, the patient's pharmacy may call the Drug Plan at 787-3315 (Regina) or toll-free at 1-800-667-7578 to provide the information needed to support the request, as follows:

- patient identification (health services number);
- pharmacy identification (name, number);
- name and cost of the drug(s) required immediately;
- reason for the request, including evidence that other sources of credit or assistance have been explored and are not available.

Following approval by the Drug Plan, the claims may be submitted via the online system. The patient may obtain up to a one-month supply of covered drug product(s) included in the request. For future assistance, complete and submit a "Special Support" form.

Outside regular office hours, the pharmacy may provide up to a **four-day** supply of benefit drug products in an emergency situation. The paper claim will be honoured by the Drug Plan at the rate of payment specified by the pharmacist. A completed "Request for Special Support" form must be submitted for future assistance.

F) EXCEPTION DRUG STATUS PROGRAM

Please refer to Appendix A for detailed information and criteria for coverage of medications under the Exception Drug Status Program. For general information regarding Exception Drug Status, see "Notes Concerning the Formulary".

G) PALLIATIVE CARE COVERAGE

Definition of Palliative Care

Patients who are in the late stages of a terminal illness, where life expectancy is measured in months, and for whom treatment aimed at cure or prolongation of life is no longer deemed appropriate, but for whom care is aimed at improving or maintaining the quality of remaining life (e.g. management of symptoms such as pain, nausea and stress), will be eligible for Drug Plan Palliative Care drug benefits. The patient's physician must submit a completed Drug Plan "Request for Palliative Care Coverage" form to the Drug Plan in order to register a patient for this program.

Drug Benefits under Palliative Care

A palliative care patient who is registered with the Drug Plan is entitled to receive prescription drugs listed in the Saskatchewan Formulary at no charge* to them. The patient's pharmacy will bill the Drug Plan for 100% of the cost of benefit medications. Coverage is also provided for some commonly used laxatives, on prescription request, to patients registered under this program.

Exception Drug Status Drugs for Palliative Care Patients

Drugs listed under the Exception Drug Status program still require a separate physician request on behalf of the patient. To be eligible for approval of Exception Drug Status drugs, palliative care patients must meet the criteria as outlined in Appendix A of the current Saskatchewan Formulary. The Drug Plan must be provided with all relevant information to determine if the patient meets the criteria for the Exception Drug Status drug being requested on the patient's behalf.

Provisional Approval of Palliative Care Coverage

Provisional approval may be granted in response to a telephoned request from the pharmacist, the physician or social worker involved in the patient's care. At the time of the request, the pharmacist or social worker **must** be in possession of a signed Palliative Care form. After provisional coverage has been granted, the pharmacist or social worker must forward the signed form to the Drug Plan. Provisional approval may be withheld by the Drug Plan if the pharmacist or social worker is not in receipt of a signed form. All physicians requesting provisional approval must provide the Drug Plan with a signed form on the patient's behalf in a timely manner.

For provisional approval of Palliative Care, please contact the Drug Plan at **787-8744** to arrange coverage.

Notification of Physician and Patient

Upon receipt of a signed Palliative Care form, notification letters are generated by the Drug Plan, to the patient and the requesting physician.

Backdating of Palliative Care Coverage

Palliative Care coverage is routinely backdated **30 days** from the date the form is received by the Drug Plan. In certain cases where a patient is eligible for coverage but application is inadvertently not made, the Drug Plan will consider backdating at the physician's request, beyond this period.

Palliative Care Benefits under Health Regions

Patients, pharmacists or physicians should contact the home care office in their health region to inquire about coverage provided by the region for dietary supplements and other basic supplies.

*MAC & LCA policies apply.

H) "NO SUB" PRESCRIPTION DRUG COVERAGE

It is recognized that extremely rare cases may exist in which a person is not able to use a particular brand of product. In such cases, the prescriber may request exemption from full payment of incremental cost when a specific brand of drug in an interchangeable or maximum allowable cost category is found to be essential for a particular patient. There is no provision for "blanket" exemptions. Each request must be patient and product specific.

The request may be submitted in writing or by telephone (787-8744 or toll-free 1-800-667-2549) and must provide sufficient details to permit thorough, objective assessment.

I) S.A.I.L. COVERAGE (SASKATCHEWAN AIDS TO INDEPENDENT LIVING)

Saskatchewan Aids to Independent Living (S.A.I.L) provides coverage for Formulary and non-Formulary disease-related drugs for persons registered on the Cystic Fibrosis, End Stage Renal and Paraplegic Programs. SAIL also provides assistance for other items such as nutritional products. For general inquiries regarding this program, telephone (306) 787-7121. For drug inquiries, telephone (306) 787-3315 or 1-800-667-7578 (press #1).

J) SASKATCHEWAN CANCER AGENCY

Prescriptions for drugs covered by the Saskatchewan Cancer Agency are provided free of charge to registered cancer patients by either the Allan Blair Cancer Centre Pharmacy in Regina (**telephone: (306) 766-2816**) or the Saskatoon Cancer Centre Pharmacy (**telephone: (306) 655-2680**). These drugs may be provided when prescribed by an oncologist or a physician working in association with the Cancer Agency. **These drugs are not covered by the Drug Plan** for cancer indications.

K) SPECIAL DRUG AUTHORIZATION

In addition to Formulary and Exception Drug Status benefits, beneficiaries with Plan One and Plan Two coverage may be eligible for a selected panel of products under the Supplementary Health Program through the Special Drug Authorization process. Selected over the counter (OTC) products that are currently benefits for Plan Three beneficiaries could be considered for coverage when prescribed for Plan One and Plan Two beneficiaries on a case-by-case basis. The prescriber must submit a request on the patient's behalf. Requests may be submitted in writing or by telephone to the Drug Plan at (306) 787-8744 or (toll-free) 1-800-667-2549.

L) CHILDREN'S INSULIN PUMP PROGRAM

Children who are 17 years of age or less and who meet certain criteria and who are approved under the Children's Insulin Pump Program will receive the following benefits:

- insulin pumps for children are provided under Saskatchewan Aids to Independent Living (SAIL). The cost of the insulin pump is covered in full.
- insulin pump supplies are a benefit under the Drug Plan for those patients meeting the criteria for an insulin pump. Cost of the supplies will be subject to coverage, deductible and co-payment.

M) CHILDREN'S DRUG PLAN

Effective July 1, 2008, the Ministry of Health implemented the Children's Drug Plan. Saskatchewan residents 14 years of age and under qualify automatically. This program ensures that Saskatchewan children pay \$15* per prescription for drugs listed in the Saskatchewan Formulary or those approved under Exception Drug Status. No application is required--children 14 years of age and under whose drugs costs are not covered by other government programs are automatically eligible for coverage.

Children who have coverage under their family's Special Support coverage will pay the lesser of the Special Support co-payment or the \$15 per prescription.

Children with the following coverage WILL NOT be affected and will continue to be covered in the same manner as they have in the past:

- Supplementary Health Benefits
- Family Health Benefits
- Saskatchewan Aids to Independent Living (SAIL)
- Palliative Care

APPENDIX D

CODES FOR PHARMACY ONLINE CLAIMS PROCESSING

The following is a list of error and warning codes that may appear when processing claims on the online system. The **error codes** are bolded.

<u>CODE</u>	<u>DESCRIPTION</u>
AA	HSN not on file
AB	Registry Number (DIAND) not on file
AI	First Nations/Inuit beneficiary not covered by the Drug Plan
AR	HSN does not have current valid coverage
CA	Prescription number required
CB	Prescriber ineligible on dispensing date
CC	Prescriber number required
CD	Prescriber inactive (dispensing date within 365 days of expiry date)
CE	Prescriber not on file
CF	Prescriber inactive (dispensing date greater than 365 days from expiry date)
CG	Prescriber suspended or revoked on dispensing date
CH	Invalid Pharmacist Organization ID
CI	Pharmacist not on file
CJ	Pharmacist ineligible on dispensing date
CK	Invalid Health Provider Organization ID
CM	Prescriber not eligible for methadone DIN claimed
CO	Pharmacy not on file
CP	Pharmacy inactive (no contract for dispensing date)
CR	Dispensing date is more than 62 days in the past
CS	Dispensing date invalid
CT	Invalid prescription number
EC	ECP fee not allowed as EC prescription not found
ED	Duplicate submission of ECP fee
EF	Maximum ECP fee exceeded
FC	Limited time for formulary clearance
GA	Benefit Rxs - possible duplicate (same pharmacy/same prescriber)
GB	Benefit Rxs - possible duplicate (same pharmacy/different prescriber)

<u>CODE</u>	<u>DESCRIPTION</u>
GC	Non-formulary drug - maximum allowable unit drug cost exceeded & recommended quantity exceeded
GE	Formulary/EDS drug - maximum allowable unit drug cost exceeded
GG	Non-formulary drug - maximum allowable unit drug cost exceeded - check unit drug cost
GH	Non-formulary drug - maximum allowable unit drug cost exceeded
GI	Dispense SOC for payment
GJ	Non-formulary drug - maximum allowable unit drug cost exceeded & recommended quantity exceeded & possible duplicate
GK	Total prescription cost exceeded (communications unavailable)
GL	Patient paid exceeded (communications unavailable)
GM	Recommended quantity exceeded & possible duplicate
GN	Non-formulary drug - maximum allowable unit drug cost exceeded & possible duplicate
GO	Dispensing fee exceeds maximum allowable
GP	Benefit Rxs - possible duplicate (different pharmacy/same prescriber)
GQ	Benefit Rxs - possible duplicate (different pharmacy/different prescriber)
GR	Age inconsistent with drug
GT	Total prescription cost invalid (communications unavailable)
GU	Patient paid invalid (communications unavailable)
GW	Compound unit drug cost & compounding fee exceeds established amounts
GX	Compound quantity must be one (1)
GY	Compound unit drug cost exceeds established amount
GZ	Compounding fee exceeds established amount
HA	Non-benefit DIN
HB	DIN not on file
HC	Benefit Rxs - 3 submissions exceeded (same drug/same pharmacy)
HD	Benefit Rxs - 3 submissions exceeded (same drug/different pharmacies)
HE	Possible benefit under Exception Drug Status
HF	Palliative Care - 3 submissions exceeded (same drug/same pharmacy)
HG	Palliative Care - 3 submissions exceeded (same drug/different pharmacies)
HH	Palliative Care - 3 submissions exceeded (same drug & same/different pharmacies) & recommended quantity exceeded
HI	Palliative Care - 3 submissions exceeded (same drug & same/different pharmacies) & non-formulary maximum allowable unit drug cost exceeded

<u>CODE</u>	<u>DESCRIPTION</u>
HJ	Palliative Care - 3 submissions exceeded (same drug & same/different pharmacies) & recommended quantity exceeded & non-formulary maximum allowable unit drug cost exceeded
IP	Alternative Reimbursement not allowed
IS	Alternative Reimbursement Fee exceeds maximum allowable
IT	Alternative Reimbursement Type (Quantity) invalid
KA	Benefit & non-benefit Rxs - possible duplicate (same pharmacy/same prescriber)
KB	Benefit & non-benefit Rxs - possible duplicate (same pharmacy/different prescriber)
KJ	Benefit & non-benefit Rxs - possible duplicate & recommended quantity exceeded & non-formulary maximum allowable unit drug cost exceeded
KM	Benefit & non-benefit Rxs - possible duplicate & recommended quantity exceeded
KN	Benefit & non-benefit Rxs - possible duplicate & non-formulary maximum allowable unit drug cost exceeded
KP	Benefit & non-benefit Rxs - possible duplicate (different pharmacy/same prescriber)
KQ	Benefit & non-benefit Rxs - possible duplicate (different pharmacy/different prescriber)
LA	Non-benefit Rxs - possible duplicate (same pharmacy/same prescriber)
LB	Non-benefit Rxs - possible duplicate (same pharmacy/different prescriber)
LC	Non-benefit Rxs - possible duplicate for First Nations/Inuit beneficiary not covered by the Drug Plan
LD	Non-benefit Rxs - possible duplicate for HSN without current valid coverage
LE	Non-benefit Rxs - possible duplicate for non-benefit DIN
LF	Non-benefit Rxs - possible duplicate & 3 submissions exceeded (same drug/same pharmacy)
LG	Non-benefit Rxs - possible duplicate & 3 submissions exceeded (same drug/different pharmacies)
LH	Non-benefit Rxs - possible duplicate & possible benefit under Exception Drug Status
LI	Non-benefit Rxs - possible duplicate & maximum allowable quantity exceeded

<u>CODE</u>	<u>DESCRIPTION</u>
LJ	Non-benefit Rxs - possible duplicate & authorized quantity limit exceeded
LP	Non-benefit Rxs - possible duplicate (different pharmacy/same prescriber)
LQ	Non-benefit Rxs - possible duplicate (different pharmacy/different prescriber)
MA	Drug mark-up percentage exceeds maximum allowable
MB	Discount percentage exceeds 100%
NA	Transmission error - resend
PA	Online EDS adjudication (OEA) successful
PB	Online EDS adjudication (OEA) not successful
PD	Duplicate PACT Fee (same pharmacy)
PE	Duplicate PACT Fee (different pharmacy)
RC	Void - original claim not found
RD	Void - original claim previously voided
RE	Void not allowed - claim paid to family
RG	Drug not eligible for Refusal to Dispense Fee Alternative Reimbursement
RH	Duplicate Refusal to Dispense Fee (same pharmacy)
RI	Duplicate Refusal to Dispense Fee (different pharmacy)
RN	Void not allowed - original claim has been adjusted
SA	Not authorized for automated interface to pharmacy PC - contact Drug Plan Help Desk
SB	Drug not eligible for Seamless Care Fee Alternative Reimbursement
SC	Duplicate Seamless Care Fee (same pharmacy)
SD	Duplicate Seamless Care Fee (different pharmacy)
SF	File error - contact Drug Plan Help Desk
TB	Drug not eligible for Trial Prescription Program
TC	Trial not allowed - not a new medication (previous Rx submitted from same pharmacy)
TD	Trial not allowed - not a new medication (previous Rx submitted from different pharmacy)
TE	Duplicate trial prescription (same pharmacy)
TF	Duplicate trial prescription (different pharmacy)
TG	Remainder not allowed - no trial within last 14 days
TH	Remainder-duplicate prescription (same pharmacy)
TJ	Remainder not allowed - dispensed too soon after trial prescription

<u>CODE</u>	<u>DESCRIPTION</u>
TK	Remainder not allowed - regular Rx submitted within last 14 days (same pharmacy)
TL	Remainder not allowed - regular Rx submitted within last 14 days (different pharmacy)
TM	Remainder - dispensing fee not allowed - the 2nd fee should be billed as an Alternative Reimbursement
TN	Regular Rx not allowed - trial submitted within last 14 days (same pharmacy)
TP	Alternative Reimbursement not allowed - no trial within last 30 days
TQ	Alternative Reimbursement - duplicate submitted within last 30 days (same pharmacy)
YI	Maximum allowable quantity exceeded
YK	Recommended quantity exceeded
YL	Authorized quantity limit exceeded
YM	Quantity submitted is lower than the minimum billing quantity for this drug (check 100 day & Two Month Drug Lists)

APPENDIX E

MAINTENANCE DRUG SCHEDULE

The following lists of drugs are appended to the contract between Saskatchewan Health and each Saskatchewan pharmacy. Prescribing and dispensing should be in these quantities once the medical therapy of a patient is in the maintenance stage, unless there are unusual circumstances that require these quantities not be dispensed.

100 DAY LIST (by product categories)	
<p>ANTICONVULSANTS carbamazepine clobazam clonazepam divalproex sodium ethosuximide gabapentin lamotrigine levetiracetam methsuximide nitrazepam oxcarbazepine phenytoin primidone topiramate valproate sodium valproic acid vigabatrin</p> <p>ANTI-THYROIDS methimazole propylthiouracil</p> <p>DIGITALIS PREPARATIONS digoxin</p>	<p>DIURETICS amiloride HCl amiloride HCl/hydrochlorothiazide chlorthalidone furosemide hydrochlorothiazide indapamide hemihydrate metolazone spironolactone spironolactone/hydrochlorothiazide triamterene/hydrochlorothiazide</p> <p>ORAL HYPOGLYCEMICS acarbose chlorpropamide gliclazide glyburide metformin nateglinide pioglitazone HCl repaglinide rosiglitazone maleate rosiglitazone maleate/metformin tolbutamide</p> <p>PHENOBARBITAL phenobarbital</p> <p>THYROID PREPARATIONS thyroid levothyroxine (sodium)</p>

TWO MONTH DRUG LIST (by product categories)	
<p>ESTROGENS conjugated estrogens estradiol estropipate ethinyl estradiol piperazine estrone sulfate stilboestrol stilboestrol sodium diphosphate</p>	<p>CONTRACEPTIVES INCLUDING: oral contraceptives ethinyl estradiol/etonogestrel (NuvaRing)</p>

APPENDIX F

TRIAL PRESCRIPTION PROGRAM

A trial prescription provides a patient with a 7 or 10-day supply of a new medication to determine if it is effective and/or tolerated.

The following medications are eligible for reimbursement under the Trial Prescription Program. If the medication is also listed under the Exception Drug Status (EDS) program, the client must be approved for EDS for the medication to be a benefit.

24:00 CARDIOVASCULAR DRUGS

Eligible drugs are those listed in this class in the Saskatchewan Drug Plan Formulary and its updates.

28:00 CENTRAL NERVOUS SYSTEM AGENTS

Eligible drugs are those listed in this class in the Saskatchewan Drug Plan Formulary and its updates.

GASTROINTESTINAL AGENTS

misoprostol

HEMORRHEOLOGIC AGENTS

pentoxifylline

Please refer to the Ministry of Health, Drug Plan & Extended Benefits Branch Pharmacy Reference Manual for Trial Prescription Program policies and procedures.

APPENDIX G

SASKATCHEWAN MS DRUGS PROGRAM

PROCEDURE FOR OBTAINING COVERAGE OF MS DRUGS UNDER THE DRUG PLAN

- Requests are initiated by a physician. The patient and physician complete the application form and the physician forwards all relevant information to the Saskatchewan MS Drugs Program. For a copy of the application forms please refer to the website at: <http://formulary.drugplan.health.gov.sk.ca/>
- The MS Drug Advisory Panel reviews the application form and relevant documentation and renders a decision based on the criteria for coverage. **Note: A patient's eligibility for coverage is determined by the MS Drug Advisory Panel.** The Drug Plan is notified of the decision and communicates the results to the patient and the physician. Please note, annual renewal applications are required for consideration of ongoing Exception Drug Status (EDS) approval by the MS Drug Advisory Panel. Renewal application forms are mailed by the Drug Plan to the prescribing physician one month before expiration of coverage.
- **Questions regarding eligibility should be directed to:**
Saskatchewan MS Drugs Program Telephone: (306) 655-8400
Suite 7718-7th Floor FAX: (306) 655-8404
Saskatoon City Hospital
Saskatoon, S7K 0M7
- Upon approval of coverage, patients are encouraged to apply for assistance with the cost of these medications under the Drug Plan Special Support Program. For more detailed information regarding this program, see Appendix C.

1. CRITERIA FOR COVERAGE OF:

- *interferon beta-1b (Betaseron-BEX),*
- *glatiramer acetate (Copaxone-TVM),*
- *interferon beta-1a (Rebif-SRO), and*
- *interferon beta-1a (Avonex-BGN)*

Approval for coverage will be given to patients who are assessed and meet the following criteria:

- have clinical definite relapsing and remitting multiple sclerosis;
- have had at least two documented attacks of MS during the previous two years (an attack is defined as the appearance of new symptoms or worsening of old symptoms, lasting at least 24 hours in the absence of fever, preceded by stability for at least one month);
- are fully ambulatory for 100 meters without aids (canes, walkers or wheelchairs)
- Extended Disability Status Scale (EDSS) 5.5 or less;
- are age 18 or older (Note: Applications for patients under 18 will be considered.)

Contraindications to Treatment

- concurrent illness likely to alter compliance or substantially reduce life expectancy;
- pregnancy, anticipated pregnancy or breast feeding within the next year;
- active, severe depression.

Physicians should also forward the following information:

- documentation of attacks, date of onset, date of diagnosis;
- neurological findings, Extended Disability Status Scale (EDSS);
- MRI reports or other significant information;
- list of current medications.

2. CRITERIA FOR COVERAGE OF:

- **natalizumab (Tysabri-BGN)**

For monotherapy treatment in patients with a diagnosis of multiple sclerosis who also meet **ALL** of the following criteria:

- a) Failure to respond to full and adequate courses of treatment with at least two disease-modifying therapies or have contraindications to, or be intolerant of these therapies, **AND**
- b) Significant increase in T2 lesion load compared to a previous MRI or at least one gadolinium-enhancing lesion, **AND**
- c) Two or more disabling relapses in the previous year.

Contraindications to Treatment

- any evidence of disease progression independent of relapses;
- immune compromise due to immunosuppressant or anti-neoplastic therapy or due to immunodeficiency (HIV, leukemia, lymphoma, etc.);
- history of progressive multifocal leukoencephalopathy (PML);
- concurrent malignancy;
- pregnancy, anticipated pregnancy or breast-feeding within the next year;
- active infectious disease (such as tuberculosis).

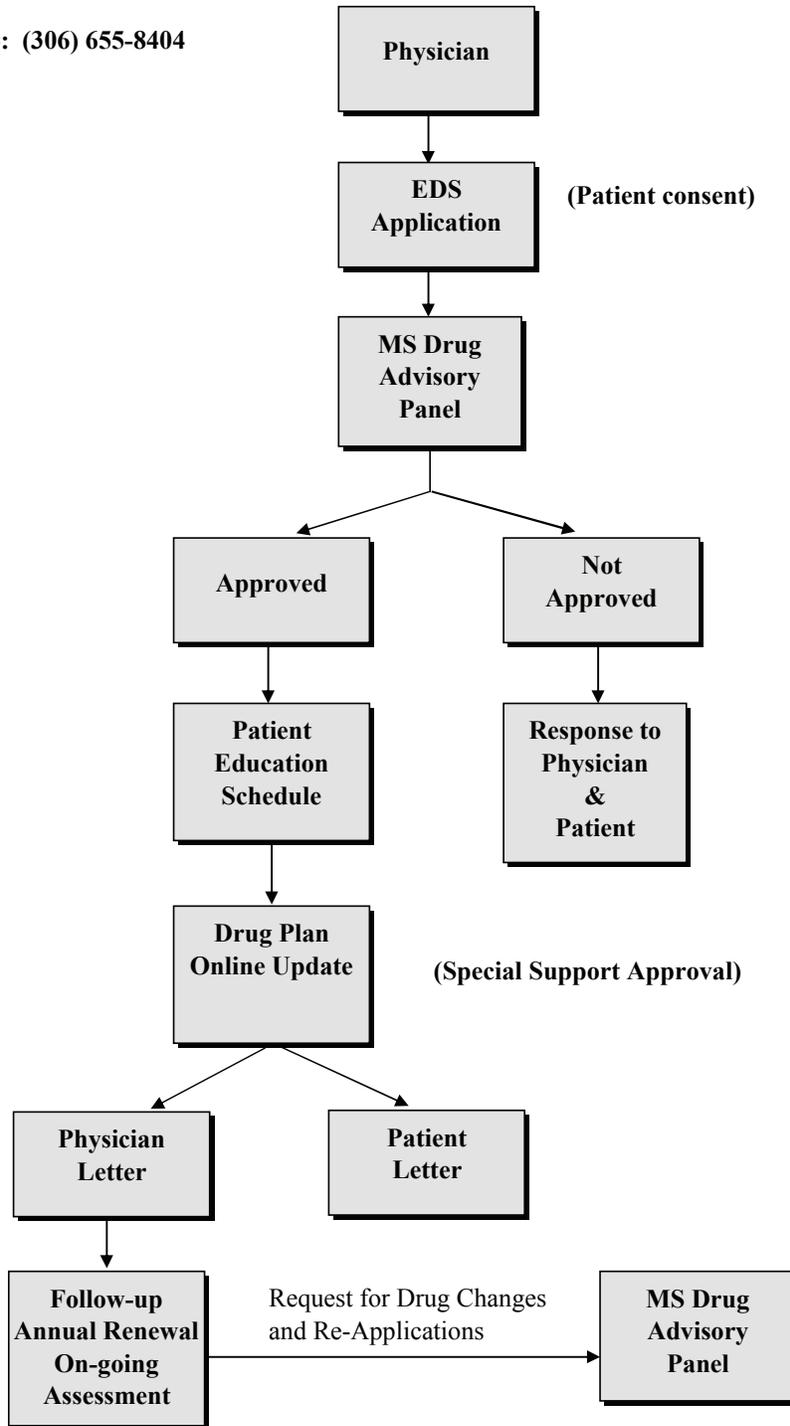

Neurologists should also forward the following information:

- name of previous disease-modifying therapies and duration of treatment;
- details of intolerance or failure with previous disease-modifying therapies;
- documentation of attacks including date of onset, duration of relapse, etc.;
- neurological findings, including Extended Disability Status Scale (EDSS) scores;
- MRI reports or other significant information;
- list of current medications.

Note: Applications for Tysabri must be initiated by a neurologist.

APPENDIX I

MAXIMUM ALLOWABLE COST (MAC) POLICY

For many common medical conditions, drug manufacturers market a wide variety of prescription drugs that often vary in price but achieve the same medical effect. Under the MAC policy, the Drug Plan obtains expert advice on which prescription drug products within a group of similar medications are safe and beneficial, and the most cost-effective. The price of the most cost-effective drugs are used as a guide to set the maximum allowable cost the Drug Plan will cover for other similar drugs used to treat the same condition. The price is not necessarily set at the lowest cost drug.

Patients have two options if they are prescribed a drug whose price is above the MAC for the group; (1) they can either continue to take the higher priced drug and pay the difference in cost over the MAC or, (2) they can talk to their physician about switching to a drug that is within the MAC. If the patient wishes to switch medications they will need a new prescription from their physician.

If the patient chooses to remain on a higher priced drug, then only the maximum allowable cost will go towards their deductible and/or calculation of their co-payment.

The expert drug review committees assess the need for exemptions (and any exemption criteria) as they review each possible MAC group. Exemption criteria (where applicable) are noted in the chart below for each group. Exemption requests are considered on a case-by-case basis. Prescribers or pharmacists may make exemption requests, with supporting detailed information, to the Drug Plan via the Exception Drug Status process.

The MAC policy applies equally to all Saskatchewan residents eligible for benefits under the Drug Plan and Extended Benefits Branch.

MAXIMUM ALLOWABLE COST GROUP(S)

Proton Pump Inhibitors (PPIs)

Group includes	esomeprazole, lansoprazole, omeprazole, pantoprazole magnesium, pantoprazole sodium, rabeprazole
Maximum Allowable Cost	\$1.51 per tablet or capsule (subject to the patient's usual co-payment and deductible).
Exemption Criteria	<ul style="list-style-type: none">- Patients who are intolerant or refractory to at least two drugs priced within the MAC policy.- Patients requiring administration of a PPI by nasogastric tube.
Notes	<ul style="list-style-type: none">- These drugs are available under the Exception Drug Status (EDS) program. Patients must meet EDS criteria to qualify for coverage. See Appendix A for information on EDS criteria for specific PPIs.- HP-PAC prescriptions are not affected by this policy. <p>Please refer to formulary/website for actual prices.</p>

HOSPITAL BENEFIT DRUG LIST

HOSPITAL BENEFIT DRUG LIST

April 2010

**NOTIFICATION OF UPDATES TO THE HOSPITAL BENEFIT DRUG LIST
WILL BE PROVIDED IN THE DRUG PLAN UPDATE BULLETINS**

**PLEASE DIRECT INQUIRIES REGARDING THIS LIST TO:
(306) 787- 3420**

1. This list of drug benefits under Saskatchewan Health is supplementary to the annual Saskatchewan Formulary (60th Edition, April 2010). It is intended to expand on the Formulary as required to meet the special requirements of hospitals and health centers.
2. The Benefit Drug List is published annually with periodic updates included in the Formulary Bulletins.
3. In summary, the government is accepting the following items as insured benefits when administered to patients in hospital and/or health centers. Institutional formularies put in place by Regional Health Authorities and affiliates may affect the availability of some insured drugs:
 - (a) All products listed in the Saskatchewan Formulary. (Brands other than those listed are not considered as interchangeable.)
 - (b) Unlisted strengths of products included in the Saskatchewan Formulary or approved for Exception Drug Status coverage (see item 5). [This applies only to brands manufactured by the same supplier(s).]
 - (c) Generally accepted nursing treatments, agents such as antiseptics, disinfectants, mouthwashes, lozenges, lubricants, soaps and emollients.
 - (d) All diagnostic agents.
 - (e) All irrigating solutions.
 - (f) All radioactive agents.
 - (g) All injectable vitamins and injectable multivitamin preparations when used to maintain or attain nutritional status.
 - (h) Alcoholic beverages such as beer, stout, brandy and whiskey.
 - (i) All dietary supplements.
 - (j) All antacids and laxatives marketed by approved manufacturers.
 - (k) All hemostatic agents.
 - (l) All agents appearing on the attached supplemental list including all dosage forms and strengths unless otherwise indicated in the list. Prolonged release, sustained release, and delayed release dosage forms are benefits only when specifically listed.
 - (m) New dosage forms, drug entities and other products released on the market after the effective date of this list are not insured hospital/health center benefits. They may be charged to hospital or health center clients until reviewed and approved as an insured benefit by the Drug Advisory Committee of Saskatchewan.
4. Formularies established by Regional Health Authorities and affiliates may not include all insured items. If an insured drug is not included in a health region/affiliate formulary, its provision will be subject to Regional Health Authority/affiliate policy. However if a benefit drug is provided within the guidelines of the Hospital Benefit

Drug List /Saskatchewan Formulary, it should be considered a benefit for that patient and paid for by the institution.

5. Only drugs listed in the Saskatchewan Formulary, and not those on the Benefit Drug List, are an insured benefit when dispensed to ambulatory patients, i.e. through retail pharmacies or an organized hospital dispensing service.
6. For certain patients, the Prescription Drug Services Branch may approve/has approved Exception Drug Status coverage, on an outpatient basis, for certain products which are not listed in the Saskatchewan Formulary or the Benefit Drug List. Patients with such coverage have been issued a letter of authorization which, upon presentation in a hospital or health center, also entitles the beneficiary to receive the specified drug as an inpatient benefit (notwithstanding Statement 4 above).

In cases where treatment with a product known to be eligible for Exception Drug Status Coverage is initiated in the hospital or health center, it will be recognized as an inpatient benefit providing the patient's case meets the eligibility criteria listed in the Saskatchewan Formulary. The drugs eligible for such coverage and the criteria for patient eligibility are published in the Saskatchewan Formulary as Appendix A.

7. Certain products are benefits only when used according to specific criteria. The usage criteria or restrictions that apply are shown for each product. When these products are ordered, the ordering physician and/or the pharmacist must determine if the conditions for coverage have been met. When the conditions are met, the patient receives the drug as a benefit. The cost is absorbed by the health region or affiliate. The region/affiliate may choose to charge the patient for administration of drugs in this section that fails to meet the criteria/restrictions listed.
8. Combination products are only benefits if they are specifically included in the Benefit Drug List. Listing of one ingredient included in a combination product does not make that product a benefit.
9. Products that are not listed in either the Saskatchewan Formulary or this supplementary benefit drug list, or which have not received special approval, are not insured and therefore are chargeable to a patient.
10. Certain products may be granted Restricted Coverage status for non-approved indications. This is the case only when the Drug Advisory Committee of Saskatchewan has reviewed evidence to demonstrate safety and efficacy and the prescriber is aware the drug is being prescribed for a non-approved indication.
11. Toxoids and Vaccines are to be provided by health regions and affiliates according to supply and guidelines established by Saskatchewan Health and Canadian Blood Services. Other such products will be reviewed and recommended for approval on a case by case basis by the health regions and affiliates. Serums are listed in Section 80:00.00.
12. EprexTM, AranespTM, InfuferTM and VenoferTM may be billed to the Drug Plan when used for the treatment of anemia of renal disease if patients receive these drugs in an institution's dialysis unit as an outpatient. In addition Pamidronate (all brands listed in the Saskatchewan Formulary), OreniciaTM, RemicadeTM, and RituxanTM may be billed to the Drug Plan via this process for patients meeting Exception Drug Status criteria. Payment for inpatient use of all of these drugs is the responsibility of the health region or affiliate.

Payment Policy Statement:

- The Drug Plan will reimburse hospital pharmacies the actual acquisition cost (AAC) of the dose of Eprex™, Aranesp™, Infufer™, Venofer™, Pamidronate (brands listed in the Saskatchewan Formulary), Orencia™, Remicade™, and Rituxan™ that is administered plus a 10% mark-up for each month's supply. The mark-up will be capped at \$20.00 per month, unless there are dosage changes. Where new generic brands are approved by the Saskatchewan drug review process as interchangeable with the above drugs, payment will be provided only up to the cost of the generic brand.

How to bill the Drug Plan:

- To ensure consistency in billing for these agents, hospital pharmacy departments are asked to use their specific DRUG PLAN WEB CERTIFICATE to submit claims online. Please contact (306) 787-3315 or toll free 1-800-667-7578 with any questions.

APPENDIX I: PROCEDURES FOR OBTAINING DRUGS PROVIDED UNDER PROVINCIAL PROGRAMS		30
APPENDIX II: HOME PARENTERAL MEDICATION PROGRAM COVERAGE POLICY		31

04:00.00 ANTIHISTAMINE AGENTS

CYPROHEPTADINE
Tablet 4mg
Syrup 0.4mg/mL
DIPHENHYDRAMINE (injection only)
Injection 50mg/mL
PROMETHAZINE
Injection 25mg/mL

08:00.00 ANTI-INFECTIVE AGENTS

08:12.00 ANTIBIOTICS

08:12.02 AMINOGLYCOSIDES

AMIKACIN
Injection 250mg/mL
TOBRAMYCIN
Injection 10mg/mL, 40mg/mL

08:12.04 ANTIFUNGALS

AMPHOTERICIN B
Injection 50mg
AMPHOTERICIN B LIPID COMPLEX INJECTION (Abelcet) and
LIPOSOMAL AMPHOTERICIN B (AmBisome)
Restricted Coverage: When used in consultation with an infectious disease specialist under the following guidelines:

- failure of amphotericin B deoxycholate. For adults, this is normally defined as poor clinical response to >500mg cumulative doses;
- nephrotoxicity due to conventional amphotericin B therapy as evidenced by doubling of baseline serum creatinine or a significant rise from baseline plus concomitant use of other potential nephrotoxins;
- significant pre-existing renal failure – creatinine >220umol/L or CrCl <25mL/minute or special renal condition (e.g. transplant or single kidney);
- severe dose-related toxicities which do not resolve with premedication (e.g. fever, rigors, hypotension).

CASPOFUNGIN ACETATE
Restricted coverage: when administered in consultation with an infectious disease specialist.

Injection 50mg, 70mg

FLUCONAZOLE

Restricted Coverage: Injection

Injection 2mg/mL

FLUCYTOSINE (Health Canada - Special Access Programme)

Injection 1g, 5g, 10g

Capsules 500mg

08:12.06 CEPHALOSPORINS

CEFAZOLIN

Injection 500mg, 1g

CEFOTAXIME

Restricted Coverage: Benefit status is automatic for first 72 hours in severe infections. Long-term use is covered when supported by sensitivity tests.

Injection 500mg, 1g, 2g

CEFOTETAN

Injection 1g, 2g

CEFOXITIN SODIUM

Injection 1g, 2g

CEFTAZIDIME

Restricted Coverage: Benefit status is automatic for first 72 hours in severe infections. Long-term use is covered when supported by sensitivity tests.

Injection 500mg, 1g, 2g

CEFTOBIPROLE MEDOCARIL

Restricted Coverage: For use as a second/third line agent for suspected or proven MRSA infections, or as a second/third line agent for suspected or proven mixed infections. This agent should be reserved for use by an infectious disease specialist.

Injection 500mg

CEFTRIAXONE

Restricted Coverage: Benefit status is automatic for first 72 hours in severe infections. Long-term use is covered when supported by sensitivity tests.

Injection 250mg, 1g, 2g

CEFUROXIME (see Appendix A – Saskatchewan Health Drug Plan Formulary)

Injection 750mg, 1.5g

CEPHALOTHIN

Injection

08:12.07 MISCELLANEOUS BETA LACTAM ANTIBIOTICS

ERTAPENEM

Restricted coverage: For the treatment of severe infections on the recommendation of an infectious disease specialist, internist or microbiologist.

Injection 1g

IMIPENEM/CILASTATIN

Restricted Coverage: For the treatment of severe infections on the recommendation of an infectious disease specialist; internist or medical microbiologist.

Injection 250mg/250mg; 500mg/500mg

MEROPENEM

Restricted Coverage: For the treatment of severe infections on the recommendation of an infectious disease specialist; internist or medical microbiologist.

Injection

08:12.08 CHLORAMPHENICOL

CHLORAMPHENICOL

Injection 1g

08:12.12 MACROLIDES

AZITHROMYCIN (see Appendix A - Saskatchewan Health Drug Plan Formulary)

Injection

ERYTHROMYCIN

Injection (lactobionate) 500mg, 1g

08:12.16 PENICILLINS

AMPICILLIN

Injection 125mg, 250mg, 500mg, 1g, 2g

PIPERACILLIN

Injection 2g, 3g, 4g

PIPERACILLIN/TAZOBACTAM

Restricted Coverage: For the treatment of severe infections on the recommendation of an infectious disease specialist; internist or medical microbiologist.

Injection 2g/0.25g; 3g/0.375g; 4g/0.5g

TICARCILLIN

Injection 3g

08:12.24 TETRACYCLINES

08:12.24.12 GLYCYLCYCLINES

TIGECYCLINE

Restricted Coverage: Reserved for the treatment of infections resistant to first-line agents and on the recommendation of an infectious disease specialist.

08:12.28 MISCELLANEOUS ANTIBIOTICS

BACITRACIN STERILE

Vial 50,000 units

POLYMYXIN B SULFATE (injection only) (Health Canada - Special Access Programme)

QUINUPRISTIN/DALFOPRISTIN

Restricted Coverage: Reserved for use against multi-resistant gram positive organisms, including Methicillin Resistant Staph. Aureus (MRSA) and vancomycin resistant E.faecium, on the recommendation of an infectious disease specialist.

Injection

VANCOMYCIN

Injection

08:14.00 ANTIFUNGAL AGENTS

VORICONAZOLE

Restricted Coverage: When prescribed by an infectious disease specialist.

Injection

08:16.00 ANTITUBERCULOSIS AGENTS

ETHAMBUTOL

Tablet 100mg, 400mg

ISONIAZID

Tablet 50mg, 100mg, 300mg

Syrup 10mg/mL

PYRAZINAMIDE

Tablet 500mg

RIFAMPIN

Capsule 150mg, 300mg

08:18.00 ANTIVIRALS

ACYCLOVIR

Restricted Coverage:

- a) *IV form only when used for treatment of initial and recurrent mucosal and cutaneous herpes simplex infections in immunocompromised patients and;*
- b) *IV form when used for severe initial episodes of herpes simplex infections in patients who may not be immunocompromised.*

Suspension 40mg/mL

Injection 500mg, 1g

FOSCARNET (Health Canada - Special Access Programme)

Injection 24mg/mL

GANCICLOVIR (see Appendix A - Saskatchewan Health Drug Plan Formulary)

Vial 500mg

RIBAVIRIN

Restricted Coverage: When used in a Pediatric Intensive Care Unit, preferably on the basis of consultation with an infectious disease specialist, and for proven or seriously ill cases during an outbreak of the Respiratory Syncytial Virus (RSV).

Powder for inhalation solution 6g

08:22.00 QUINOLONES (see Appendix A - Saskatchewan Health Drug Plan Formulary)

CIPROFLOXACIN

Injection 10mg/mL

LEVOFLOXACIN

Injection 5mg/mL, 25mg/mL

MOXIFLOXACIN

Injection, 400mg

08:40.00 MISCELLANEOUS ANTI INFECTIVES

LINEZOLID (see Appendix A - Saskatchewan Health Drug Plan Formulary)

Injection

PENTAMIDINE ISETHIONATE

Injection

Oral inhalation solution 300mg

10:00.00 ANTINEOPLASTIC AGENTS (Agents used for non-cancer indications.

Contact the Saskatchewan Cancer Agency for information regarding drugs for cancer indications.)

BLEOMYCIN

Injection 15 unit

CYCLOPHOSPHAMIDE

Tablet 25mg, 50mg

Injection 200mg, 1g

DAUNORUBICIN

Injection 20mg

DOXORUBICIN

Injection 2mg/mL

FLUOROURACIL

Injection 50mg/mL

METHOTREXATE

Injection 10mg/mL (2mL), 25mg/mL (2mL, 4mL, 8mL, 20mL, 40mL, 200mL)

Powder for injection 20mg

RITUXIMAB

Restricted Coverage: For treatment of antibody-mediated rejection in kidney transplant patients.

Injection 10mg/mL

12:00.00 AUTONOMIC DRUGS

12:04.00 PARASYMPATHOMIMETIC (CHOLINERGIC) AGENTS

NEOSTIGMINE

Injection 0.5mg/mL (1:2000), 1mg/mL (1:1000)

Injection 2.5mg/mL (5mL)

12:08.00 ANTICHOLINERGIC AGENTS

12:08.08 ANTIMUSCARINIC/ANTISPASMODICS

HYOSCINE BUTYLBROMIDE Also known as SCOPOLAMINE BUTYLBROMIDE

Injection 20mg/ML

HYOSCINE HYDROBROMIDE Also known as SCOPOLAMINE HYDROBROMIDE

Injection 0.4mg/mL, 0.6mg/mL

12:12.00 SYMPATHOMIMETIC (ADRENERGIC) AGENTS

DOBUTAMINE

Injection 12.5mg/mL

DOPAMINE

Injection 40mg/mL (20mL)

IV premixed bag 0.8mg/mL (250mL, 500mL) D5W

EPHEDRINE

Injection 50mg/1mL

Tablet 8mg, 15mg, 25mg, 30mg

Capsule 25mg

ISOPROTERENOL

Injection 0.2mg/mL (1:5000)

NOREPINEPHRINE

Injection 1mg/mL

PHENYLEPHRINE

Injection 10mg/mL

PSEUDOEPHEDRINE

Tablet 60mg

Syrup 6mg/mL

12:16.00 SYMPATHOLYTICS

PHENTOLAMINE MESYLATE

Injection

12:20.00 SKELETAL MUSCLE RELAXANTS

ATRACURIUM BESYLATE
Injection 10mg/mL (5mL, 10mL)
PANCURONIUM
Injection 2mg/mL
ROCURONIUM
Injection 10mg/mL (10mL)
SUCCINYLCHOLINE
Injection 20mg/mL
VECURONIUM
Injection 10mg

20:00.00 BLOOD FORMATION AND COAGULATION

20:04.00 ANTIANEMIA DRUGS

20:04.04 IRON PREPARATIONS

FERROUS FUMARATE
Capsule
FERROUS GLUCONATE
Tablet
FERROUS SULPHATE
Tablet
Syrup
Oral drops
Oral solution
IRON DEXTRAN
Injection 50mg/mL elemental iron

20:12.00 COAGULANTS AND ANTICOAGULANTS

20:12.04 ANTICOAGULANTS

ARGATROBAN
Restricted Coverage: For treatment of heparin-induced thrombocytopenia in consultation with a hematologist or internist. It is suggested that a heparin-induced thrombocytopenia (H.I.T) assay be completed.
Injection
DALTEPARIN
Restricted Coverage: See Appendix A - Saskatchewan Health Drug Plan Formulary. For in-hospital treatment of acute coronary syndrome to a maximum of eight (8) days.
Injection
DANAPAROID
Restricted Coverage: For treatment of heparin-induced thrombocytopenia in consultation with a hematologist or internist. It is suggested that a heparin-induced thrombocytopenia (H.I.T) assay be completed.
Injection
ENOXAPARIN
Restricted Coverage: See Appendix A - Saskatchewan Health Drug Plan Formulary. For in-hospital treatment of acute coronary syndrome to a maximum of eight (8) days.
For in-hospital treatment of ST-segment elevation myocardial infarction.
Injection
FONDAPARINUX SODIUM
Restricted Coverage: For the treatment of heparin induced thrombocytopenia (HIT).

Injection
HEPARIN (not including low molecular weight formulations)
Injection 1,000 IU/mL (1mL, 10mL, 30mL)
Injection (subcutaneous) 25000 IU/mL (0.2mL, 2mL)
Injection (heparin lock flush) 100 IU/mL (2mL, 10mL)
IV premixed bags all strengths mixed in D5W and 0.9% NaCl

LEPIRUDIN

Restricted Coverage: For treatment of heparin-induced thrombocytopenia in consultation with a hematologist or internist. It is suggested that a heparin-induced thrombocytopenia (H.I.T) assay be completed.

Injection
NADROPARIN

Restricted Coverage: See Appendix A - Saskatchewan Health Drug Plan Formulary. For in-hospital treatment of acute coronary syndrome to a maximum of eight (8) days.

Injection
RIVAROXABAN

Restricted Coverage: See Appendix A - Saskatchewan Health Drug Plan Formulary.

- a) *prophylaxis following total knee arthroplasty for up to 14 days following the procedure.*
 - b) *prophylaxis in patients undergoing total hip replacement for up to 14 days following the procedure.*
- tablet

20:12.08 ANTIHEPARIN AGENTS

PROTAMINE SULPHATE
Injection 10mg/mL

20:12.16 HEMOSTATICS

ANTIHEMOPHILIC FACTOR VIII (HUMAN)
APROTININ
Injection 10,000 Kallikrein Inhibitory Units/mL
FACTOR IX
TRANEXAMIC ACID
Injection 100mg/mL

20:12.18 PLATELET AGGREGATION INHIBITORS

CLOPIDOGREL
Tablet 300mg

20:40.00 THROMBOLYTIC AGENTS

STREPTOKINASE
Injection 250,000 IU, 750000 IU, 1.5 million IU
TENECTEPLASE (TNK)
*Restricted Coverage: For the treatment of patients with:
larger acute myocardial infarction and presenting within twelve (12) hours;
high risk inferior wall myocardial infarctions;
patients with significant hypotension or cardiogenic shock.*
Injection
ALTEPLASE (TISSUE PLASMINOGEN ACTIVATOR or tPA)
Restricted Coverage:

- c) *for the treatment of patients with:
larger acute myocardial infarction and presenting within twelve (12) hours.
high risk inferior wall myocardial infarctions.
patients with significant hypotension or cardiogenic shock.
Injection 50mg, 100mg*
- b) *for the treatment of strokes when all the following circumstances are present:
within three (3) hours of the onset of symptoms;
under the guidance of a neurologist and a neuro-radiologist;
after a CT scan to rule out hemorrhage; and
in conjunction with established treatment protocols.*
- c) *Injection, powder for solution, 2mg/vial (Cathflo)
For correction of catheter occlusions.*

24:00.00 CARDIOVASCULAR DRUGS

24.04.00 CARDIAC DRUGS

ADENOSINE

Restricted Coverage: When used as an antiarrhythmic – for conversion to sinus rhythm of paroxysmal supraventricular tachycardia, including those associated with accessory bypass tracts (Wolf-Parkinson-White Syndrome).

Injection 3mg/mL

AMIODARONE HCl

Injection 50mg/mL

BRETYLIUM TOSYLATE

Injection 50mg/mL

DIGOXIN

Injection 0.05mg/mL (1mL), 0.25mg/mL (2mL)

DILTIAZEM

Injection 5mg/mL (5mL, 10mL)

ESMOLOL (Health Canada – Special Access Program)

Restricted Coverage: For use in Operating Room or Critical Care Areas only for: the perioperative management of tachycardia and hypertension in patients with atrial fibrillation or atrial flutter in acute situations.

Injection 10mg/mL (10mL)

Infusion bag 10mg/ml (250ml size)

MILRINONE

Restricted Coverage:

a) *When used in the short-term management of ventricular dysfunction unresponsive to digitalis, diuretics and vasodilators or as an aid to weaning off an intra-aortic balloon pump when other inotropes have failed.*

b) *Must be administered in a critical care setting capable of invasive cardiac monitoring including cardiac output, pulmonary capillary wedge pressures and systemic vascular resistance.*

Injection 1mg/mL (10mL, 20mL)

PROCAINAMIDE

Injection 100mg/mL (10mL)

24:08.00 HYPOTENSIVE AGENTS

LABETALOL

Injection 5mg/mL

SODIUM NITROPRUSSIDE

Injection 50mg

24:12.00 VASODILATING AGENTS

ALPROSTADIL

Injection 0.5mg/mL

NIMODIPINE

Injection 0.2mg/mL (250mL)

NITROGLYCERIN

Injection 5mg/mL (10mL)

PAPAVERINE

Injection 32.5mg/mL (2mL)

NITRIC OXIDE

Restricted Coverage: For use in the pediatric population

Inhalation Gas

28:00.00 CENTRAL NERVOUS SYSTEM AGENTS

28:04.00 GENERAL ANESTHETICS

DESFLURANE

Inhalation solution 1mL/mL (240mL)

ENFLURANE

Solution 250mL

HALOTHANE

Solution 250mL

ISOFLURANE

Solution 100mL

KETAMINE

Injection 10mg/mL, 50mg/mL

PROPOFOL

Injection 10mg/mL (20mL, 50mL, 100mL)

SEVOFLURANE

Solution 250mL

THIOPENTAL

Injection kit 1 g kit and 500mg /2.5% kit

28:08.00 ANALGESICS AND ANTIPYRETICS

28:08.04 NON-STEROIDAL ANTI-INFLAMMATORY AGENTS

ACETYLSALICYLIC ACID

Tablet

Enteric coated tablet

Suppository

28:08.08 OPIATE AGONISTS

ALFENTANIL

Injection 0.05mg/mL, 0.5mg/mL

FENTANYL

Injection 50ug/mL

METHADONE

Powder for oral solution

(Use of methadone is restricted to Health Protection Branch authorized prescribers)

SUFENTANIL
Injection 50ug/mL

28:08.12 OPIATE PARTIAL AGONISTS

NALOXONE
Injection 0.4mg/mL

28:12.00 ANTICONVULSANTS

28:12.12 HYDANTOINS

FOSPHENYTOIN
Restricted coverage: for the treatment of status epilepticus.
Injection 25mg (50 PE)

28:12.92 MISCELLANEOUS ANTICONVULSANTS

MAGNESIUM SULFATE
Injection 50mg/mL

28:16.00 PSYCHOTHERAPEUTIC AGENTS (see the Saskatchewan Formulary)

28:20.00 RESPIRATORY AND CEREBRAL STIMULANTS

DOXAPRAM (FDA – Special Access Program)
Restricted Coverage: When used for approved indications.
Injection 20mg/mL (20mL)

28:24.00 ANXIOLYTICS, SEDATIVES AND HYPNOTICS

28:24.04 BARBITURATES (see the Saskatchewan Formulary)

28:24.08 BENZODIAZEPINES

MIDAZOLAM
Injection 1mg/mL (2mL, 5mL, 10mL), 5mg/mL (1mL, 2mL, 10mL)

28:24.92 MISCELLANEOUS ANXIOLYTICS, SEDATIVES, HYPNOTICS

DROPERIDOL

Injection 2.5mg/mL

PARALDEHYDE

Injection 5mL ampoule (1mL is equivalent to approximately 1g)

28:92.00 MISCELLANEOUS CENTRAL NERVOUS SYSTEM AGENTS

FLUMAZENIL

injection

40:00.00 ELECTROLYTIC, CALORIC AND WATER BALANCE

40:08.00 ALKALINIZING AGENTS

SODIUM BICARBONATE injectable preparations

Injection 0.5mEq/mL (4.2%), 1mEq/mL (8.4%) pre-load syringe

Injection 5g/100mL (5%) (500mL)

Injection 75mg/mL (7.5%)

Injection 1mEq/mL (8.4%)

TROMETHAMINE injection

Injection 36mg/mL (0.3 Molar)

40:12.00 ELECTROLYTE AND FLUID REPLACEMENT

CALCIUM CHLORIDE

Injection 10% - 100mg/mL (27mg elemental calcium/mL)

CALCIUM GLUCONATE

Injection 10% - 100mg/mL (9mg elemental calcium/mL)

CALCIUM ORAL DOSAGE FORMS

Note: 500mg elemental calcium = 12.5mmol or 25mEq elemental calcium

DEXTRAN 40

Solution 10% in D5W 500mL

Solution 10% in Saline 0.9% 500mL

DEXTRAN 70

Solution 32% in D10W 100mL

Solution 6% in D5W 500mL

Solution 6% in Saline 0.9% 500mL

MAGNESIUM ORAL DOSAGE FORMS

MAGNESIUM SULPHATE

Injection 50% - 500mg/mL (50mg elemental magnesium/mL)

Note: 5mg elemental magnesium = 0.2mmol or 0.4mEq elemental magnesium

PHOSPHATE

Injection potassium phosphate dibasic 236mg/mL

Injection potassium phosphate monobasic 224mg/mL

Effervescent tablet 500mg

POTASSIUM ACETATE

Injection 392mg/mL

POTASSIUM CHLORIDE

Injection 2mEq elemental potassium/mL

POTASSIUM PHOSPHATE
Vial 3mmol/mL
SODIUM CHLORIDE
Injection 2.5mEq/mL
Injection 4mEq/mL
SODIUM PHOSPHATE
Injection 3 mmol/mL

ABCIXMAB INJECTION

Restricted Coverage: For use in high risk angioplasties carried out in a cardiac catheterization laboratory as per approved health region/affiliate protocols.

Injection 2 mg/mL (5mL)

BASILIXIMAB

Restricted Coverage: For prophylaxis of acute rejection in renal transplant patients.

Injection

BERACTANT

Restricted Coverage: When administered in a Neonatal Intensive Care Unit.

Powder (reconstituted) 25mg phospholipids/mL

COLFOSCERIL PALMITATE

Restricted Coverage: When administered in a Neonatal Intensive Care Unit.

Powder for tracheal suspension

CYANIDE ANTIDOTE KIT

With sodium nitrate injection 30mg/mL (2 x 10mL ampoules), sodium thiosulfate injection 250mg/mL (2 x 50mL ampoules), amyl nitrate inhalant solution (12 x 0.3mL crushable ampoules)

CYCLOSPORINE (see Appendix A - Saskatchewan Health Formulary)

Injection 50mg/mL

DACLIZUMAB

Restricted Coverage: For prophylaxis of acute rejection in renal transplant patients.

Injection 5mg/mL

DIMETHYL SULFOXIDE

Solution 500mg/g (50mL)

DROTRECOGIN ALFA

Restricted coverage: for use when administered in a tertiary care facility on the recommendation of an intensivist.

Injection 5mg, 20mg

EPTIFIBITIDE

Restricted Coverage: When used on the recommendation of a cardiologist for the treatment of High Risk Unstable Angina and Non-ST Segment Elevation Myocardial Infarction according to the guidelines of The American College of Cardiology & American Heart Association, Inc. (Circulation, 2000; 102: 1193-1209)

Injection

ETANERCEPT (see Appendix A - Saskatchewan Health Formulary)

Injection

FOMEPIZOLE

Restricted Coverage: This product should be used in consultation with the Poison and Drug Information Service (PADIS). A contact number for PADIS is 1-866-454-1212.

Injection

LEVOCARNITINE

Restricted Coverage: For the treatment of metabolic disorders with carnitine deficiency and neonates who will be on long term Total Parenteral Nutrition (greater than 14 days).

Injection 200mg/mL

Oral solution 100mg/mL

Tablet 330mg

OCTREOTIDE

Restricted Coverage:

- a) *For the treatment of acute variceal bleeds in patients with acute portal hypertension.*

b) *For the prevention of fistulas following pancreatic resection to a maximum of 7 days.*

Injection 50ug, 100ug, 500ug (1mL)

Injection 200ug (5mL)

Injection 10mg, 20mg, 30mg (powder for injection)

PAMIDRONATE

Restricted coverage: For the treatment of non-malignant hypercalcemia.

Note: requests for treatment of hypercalcemia of malignancy should be referred to the Saskatchewan Cancer Agency.

Injection

PRALIDOXIME CHLORIDE (Health Canada – Special Access Program)

Injection, 1g vial

SOMATOSTATIN

Restricted Coverage: For the treatment of acute variceal bleeds.

Powder 205ug, 3mg

TIROFIBAN

Restricted Coverage: When used on the recommendation of a cardiologist for the treatment of High Risk Unstable Angina and Non-ST Segment Elevation Myocardial Infarction according to the guidelines of The American College of Cardiology & American Heart Association, Inc. (Circulation, 2000; 102: 1193-1209)

Injection

TRACE ELEMENTS

Chromium 4ug/mL

Copper 0.4mg/mL

Manganese 0.1mg/mL, 0.5mg/mL

Selenium 40ug/mL

Zinc 1mg/mL, 5mg/mL

Note: May come as cocktails.

(M.T.E.-4 contains: 4.0ug/mL chromium, 0.4mg/mL copper, 0.1mg/mL manganese, and 1.0mg/mL zinc)

(Micro 5 contains: 10ug/mL chromium, 1mg/mL copper, 0.5mg/mL manganese, 60ug/mL selenium, 5mg/mL zinc)

APPENDIX I: PROCEDURES FOR OBTAINING DRUGS PROVIDED UNDER PROVINCIAL PROGRAMS

DRUGS USED FOR THE TREATMENT OF TUBERCULOSIS:

The following drugs can be obtained for use in the treatment of tuberculosis by contacting the Clinical Director for Tuberculosis Control 1-866-780-6482. The drugs will be sent from the TB Pharmacy in Ellis Hall at the Royal University Hospital in Saskatoon.

Amikacin injection 500mg/2mL
Ethambutol tablets 100mg, 400mg
Isoniazid syrup 10mg/mL, tablets 100mg, 300mg
Levofloxacin tablet 500mg
Pyrazinamide tablet 500mg
Rifampin capsule 150mg, 300mg, suspension 25mg/mL

DRUGS USED FOR THE TREATMENT OF SEXUALLY TRANSMITTED INFECTIONS:

- The following drugs can be obtained from your local public health office:

Azithromycin 1g
Erythromycin PCE 333mg or 250mg
Cefixime 400mg
Doxycycline 100mg
Amoxicillin 500mg
Benzathine Penicillin 1.2 MU IM injection
Ciprofloxacin 500mg

COVERAGE OF VERTEPORFIN (VISUDYNE) FOR THE TREATMENT OF MACULAR DEGENERATION:

- Health regions will provide coverage for Visudyne and the associated laser treatment according to the following criteria:
 - for the treatment of age-related macular degeneration with predominately classic subfoveal choroidal neovascularization (CNV)
 - for the treatment of pathologic myopia
 - for the treatment of ocular histoplasmosis

For patients meeting the above criteria health regions may submit an invoice for the drug cost to the Drug Plan & Extended Benefits Branch, 3475 Albert Street, Regina, Saskatchewan, S4S 6X6.

APPENDIX II: HOME PARENTERAL MEDICATION PROGRAM COVERAGE POLICY

Regional Health Authorities will cover home/nursing home administration of approved parenteral medications when they are prescribed as an acute care replacement measure. The Saskatchewan Prescription Drug Plan will cover approved parenteral medications administered for maintenance therapy of life long or chronic conditions except when the patient is a registered inpatient in an acute care facility. Drugs administered parenterally include sub-cutaneous or intramuscular injections as well as intravenous medications.

The Regional Health Authorities will cover supply costs for medications listed below in both the acute and chronic therapy categories. These are purchased through hospital contracts and would have significant cost implications if purchased outside of these contracts. The supplies to be provided to the client without charge include but are not limited to, intravenous solutions, tubing, cathlons, heparin locks and caps, pump cassettes, syringes and needles.

Eligibility of drugs for coverage will be subject to the Hospital Benefit Drug List, Saskatchewan Formulary, and/or Regional Health Authority protocols.

These policies apply to residents of special care homes as well as community residents.

PART I - ACUTE CARE REPLACEMENT MEDICATIONS

These are parenteral medications that enable early discharge from the acute care site, or that prevent admission to the acute care site. These medications are to be provided by the Regional Health Authority without charge to the individual. Eligible drugs are listed within this section "Hospital Benefit Drug List" (Supplementary Information - Saskatchewan Health Drug Plan Formulary). Changes to the Hospital Benefit Drug List are through recommendations of the Drug Advisory Committee of Saskatchewan.

Also included in this policy are medications (e.g. low molecular weight heparins) for temporary anticoagulation prior to a surgical procedure. Health regions will also be responsible for the supply of low molecular weight heparins for patients who have been on warfarin or are starting on warfarin until a therapeutic INR is reached.

Regional Health Authorities shall establish appropriate guidelines for home parenteral therapy and an appropriate screening mechanism for the services. Considerations when determining if parenteral therapy at home or in a special-care home is appropriate for a particular individual shall include the:

- ability to co-ordinate and plan the care with the physician, home care program/special-care home program, hospital/health centre and pharmacist;
- practicality and safety of administering the drug at home or in a special-care home;
- ability and motivation of the individual and/or the availability of family support, when therapy is delivered at home;
- availability of more appropriate oral alternatives;
- cost-effectiveness of providing the drug at home or in a special-care home.

PART II - CHRONIC CONDITION MEDICATIONS

Injectable drugs used in the treatment of chronic conditions administered in the community or in hospitals to hospital outpatients where the only purpose in entering a hospital is to receive the drug will be covered under the Saskatchewan Drug Plan and subject to a co-payment and deductible where applicable.

Eligible drugs are listed in the Saskatchewan Health Drug Plan Formulary. Maintenance of the Formulary is through the formulary approval process via the Saskatchewan drug review process. Where applicable, these medications are subject to Exception Drug Status approval, co-pay, and family deductible. Drugs that have not been approved by the Saskatchewan review process will not be considered benefit drugs under the Drug Plan.

Certain drugs require Exception Drug Status (EDS) approval. See Appendix A of the Saskatchewan Health Drug Plan Formulary for EDS Program information, as well as a complete list of EDS drugs.

Benefits provided prior to this policy will be grandfathered (e.g. pulse therapy, IV iron, Eprex).

**THE PRESCRIPTION REVIEW
PROGRAM**

THE PRESCRIPTION REVIEW PROGRAM

The Prescription Review Program gathers data regarding a panel of drugs subject to abuse and/or diversion.

PROGRAM PARTNERS:

- Saskatchewan College of Pharmacists
- College of Physicians and Surgeons of Saskatchewan
- College of Dental Surgeons of Saskatchewan
- The Saskatchewan Registered Nurses' Association
- Saskatchewan Health

OBJECTIVE:

To reduce the abuse and diversion of a select panel of prescription drugs.

THE PROGRAM:

1. Alerts prescribers to possible multiple doctoring, inappropriate prescribing or use of medications to which the Prescription Review Program applies.
2. May seek an explanation to the relevant professional regulatory body where the data indicates prescribing and/or dispensing practices not consistent with acceptable professional standards; and
3. Encourages appropriate prescribing and dispensing practices by providing professional guidance to both prescribers and pharmacists.

PRESCRIBER PARTICIPATION:

Prescribers may prescribe any of the medications on the panel of monitored drugs so long as the following information is contained on each prescription in addition to the current legal requirements:

- a) The patient's date of birth;
- b) The patient's address;
- c) the patient's health services number;
- d) The total quantity of medication prescribed, both numerically and in written form; except when prescribing electronically, by email or by FAX when only one form is acceptable or available; and
- e) The prescriber's name and address.

Please refer to guidelines at:

http://www.napra.org/Content_Files/Files/Electronic_Transmission_of_Prescriptions_Policy_Statement_and_Guidelines_Pharmacists.pdf

Verbal prescriptions cannot be issued for any of the products included in the Prescription Review Program. Faxed prescriptions are acceptable if done according to the published guidelines for faxing prescriptions.

DATA COLLECTION:

The Drug Plan's electronic network with pharmacies will receive and store prescription information for benefit and non-benefit monitored drugs, for Drug Plan beneficiaries and non-beneficiaries who have a Saskatchewan Health Service card, and send this information electronically to the College of Physicians and Surgeons.

Pharmacists must continue to mail the College of Physicians and Surgeons a copy of any prescriptions for drugs monitored under the Prescription Review Program that were not successfully "adjudicated" or "captured" by the Drug Plan system. Upon receipt of the prescription copy, the College of Physicians and Surgeons will enter the information into their computer system.

ADDITIONAL INFORMATION:

The Prescription Review Program does not apply to medication orders for hospital inpatients or residents of licensed long term care facilities, or prescriptions issued by veterinarians.

While under federal law many of these drugs can be prescribed verbally, the written prescription requirement continues for all drugs under the new Program, including those that have been added.

Pharmacists may dispense part fills at their discretion, or prescribers may request part fills if the following information is set out in the prescription:

- a) The total quantity;
- b) The amount to be dispensed each time; and
- c) The time interval between fills.

Prescribers may issue **refills** as permitted under federal law. To summarize, prescription refills are NOT permitted for any Narcotic, but are permitted under the Program when issued in writing for:

- a) Controlled Drugs Level I and II, including Preparations, if the prescriber has specified the number, and frequency or interval between, refills,
- b) Benzodiazepines, if the prescriber has specified the number of refills and less than one year has elapsed since the date the prescription was issued. If the prescriber also specifies the interval between refills, the pharmacist may not dispense the refill until the interval has expired.
- c) Chloral hydrate if the prescriber has specified the number of refills.

If a prescriber or dispenser is concerned about a patient's drug utilization history, he or she may contact the College personally for confidential information during weekday daytime hours at (306) 244-8778.

Patient drug utilization profiles for the drugs in the Prescription Review Program, as well as all other prescription drugs, are accessible electronically through the Pharmaceutical Information Program (PIP) to those prescribers and pharmacists actively involved in the professional care of the patient in question. All prescribers and pharmacists are strongly encouraged to utilize the information available to them in the PIP when prescribing drugs that are high risk and/or dealing with patients who are high risk. Information about the PIP is accessible at www.health.gov.sk.ca/pip. To inquire about receiving access to PIP, please contact pipinformation@shin.sk.ca or (306) 787-9833.

If a prescriber or pharmacist is concerned about a patient's drug utilization history, he or she may contact the College of Physicians and Surgeons personally for confidential information during weekday daytime hours at (306) 244-8778.

DRUGS SUBJECT TO THE PRESCRIPTION REVIEW PROGRAM:

The following **categories of drugs** are included under the Prescription Review Program:

- Select narcotic and controlled drugs
- Amphetamines
- Anabolic Steroids
- Barbiturates
- Benzodiazepines
- Buprenorphine
- Chloral hydrate

DRUGS SUBJECT TO THE PRESCRIPTION REVIEW PROGRAM (con't):

An alphabetical list of generic names included in the above categories is noted below. All brands, strengths, and dosage forms of products with a generic name listed below are subject to the program, except where indicated otherwise.

The list is subject to change from time to time. Prescribers and pharmacists will be advised directly of the effective date of any additions or deletions. Questions should be directed to the College of Physicians and Surgeons at (306) 244-8778, or to the Saskatchewan College of Pharmacists at (306) 584-2292.

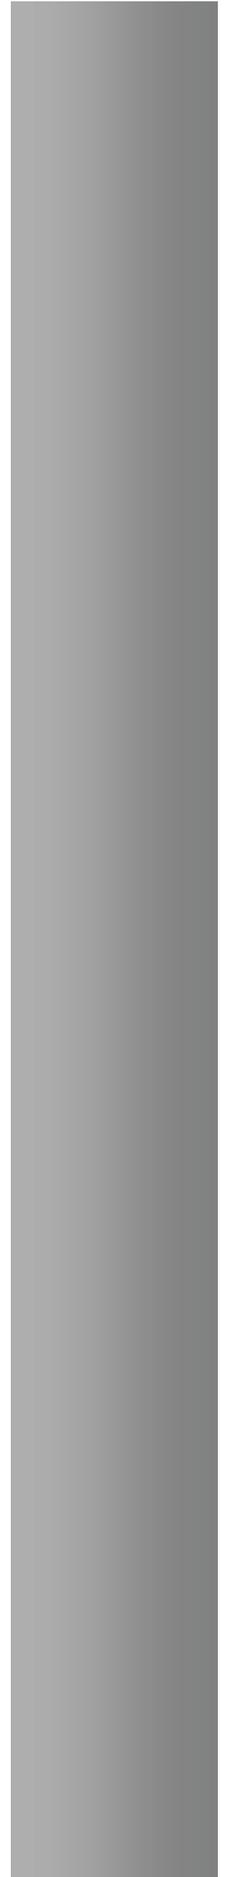

**THE PRESCRIPTION REVIEW PROGRAM PANEL OF DRUGS
(by generic name)***

ACETAMINOPHEN WITH CODEINE - in all dosage forms except those containing 8 mg or less of codeine
ACETYLSALICYLIC ACID (ASA) WITH CODEINE - in all dosage forms except those containing 8 mg or less of codeine
ALPRAZOLAM
AMOBARBITAL
ANILERIDINE
BROMAZEPAM
BUPRENORPHINE
BUTALBITAL
BUTALBITAL WITH CODEINE
BUTORPHANOL
CHLORAL HYDRATE
CHLORDIAZEPOXIDE
CLOBAZAM
CLONAZEPAM
CLORAZEPATE
COCAINE
CODEINE - as the single active ingredient, or in combination with other active ingredients, in all dosage forms except those containing 20 mg per 30 ml or less of codeine in liquid for oral administration
DEXTROAMPHETAMINE
DIAZEPAM
DIETHYLPROPION
FENTANYL
FLURAZEPAM
HYDROCODONE - DIHYDROCODEINONE
HYDROMORPHONE - DIHYDROMORPHONE
LEVORPHANOL
LORAZEPAM
MEPERIDINE - PETHIDINE
METHADONE
METHYLPHENIDATE
MIDAZOLAM
MORPHINE
NANDROLONE
NITRAZEPAM
NORMETHANDONE-P-HYDROXYEPHEDRINE
OXAZEPAM
OXYCODONE - as the single active ingredient, or in combination with other active ingredients in all dosage forms
PANTOPON
PENTAZOCINE
PENTOBARBITAL
PHENOBARBITAL
PHENTERMINE
PROPOXYPHENE
SECOBARBITAL
TEMAZEPAM
TESTOSTERONE
THIOPENTAL
TRIAZOLAM

* **Note** - The Bylaw contains category names as noted on the previous page. Generic names are provided above for reference only.

TIPS ON PRESCRIPTION WRITING

TIPS ON PRESCRIPTION WRITING

(Adapted from "Tips on Prescription Writing", a pamphlet available from the Saskatchewan College of Pharmacists.)

Properly issued prescriptions are in the best interest of the patient, the pharmacist and the prescriber. This information is designed to assist prescribers to issue prescriptions most effectively. These guidelines will help to reduce the time involved in the prescription process, increase patient safety and maximize patient compliance.

For further information on the provincial requirements for prescriptions please refer to the College of Physicians and Surgeons *Bylaw 53*. Information regarding the documentation of verbal prescription is stated in the Saskatchewan College of Pharmacists *Bylaw 14.13.3*.

PRESCRIPTION CONTENT

Prescriptions need to be issued clearly and completely to minimize errors. Clear pronunciation or legible writing with accurate spelling is essential.

The prescription may be written, or verbal for certain classes of drugs, (for more information refer to the chart *Saskatchewan College of Pharmacists – Prescription Regulations* also published in this Supplementary Information section) and must include the following information:

- date
- physician's name and signature
- patient's name
- full name of the medication
- medication concentration where appropriate
- medication strength where appropriate
- dosage
- amount prescribed or the duration of treatment
- administration route if other than oral
- explicit instructions for patient usage of the medication
- number of refills where refills are authorized

The prescriber's name, address and telephone number should be preprinted on the prescription form, or hand printed beneath the signature.

VERBAL PRESCRIPTIONS

Federal and Provincial legislation states that a verbal prescription or refill authority must be given by a duly licensed practitioner prescribing within their scope of practice **directly to a pharmacist**. Having a receptionist or nurse (other than a RN-NP) assume this responsibility is contrary to the law.

Direct prescriber/pharmacist communication is necessary to provide the best quality of care for the patient. The pharmacist may wish to discuss an aspect of the drug therapy prior to dispensing the medication. As well, the prescriber may wish to ask the pharmacist about a particular medication, or a patient's medication history, compliance, or pattern of drug use. Both the professionals and the patient will benefit from this direct communication.

MEDICATION DIRECTIONS

Pharmacists maintain patient profiles, which contain information concerning prescriptions dispensed, directions for use, drug allergies, medical conditions, and other pertinent information. These profiles are used to monitor the patient's drug usage and compliance, and drug interactions. As this information is now transmitted to Saskatchewan Health

and retained for review by designated health care practitioners, pharmacists must ensure the accuracy and integrity of information provided for use by The Prescription Information Program. Thus, it is very important that directions on the prescription be consistent with verbal instructions given to the patient. Clear directions enable the pharmacist to effectively counsel the patient and reinforce the prescriber's instructions.

Prescriptions with closing instructions written "As Directed" create problems for the patient, particularly the elderly or those assisting them. Patients taking more than one medication may become confused if all instructions read "As Directed". Such labelling also makes it impossible for pharmacists to monitor compliance, or assist patients with medication concerns.

It is helpful for a patient taking more than one medication, or for the caregiver, to know what the medication is used for. The prescriber may wish to indicate the use of the medication on the prescription (e.g. for heart), to enable the pharmacist to include this information on the label.

REFILLS

When a patient is stabilized on medication, refills, where permitted by law, should be indicated on the prescription. Authorization should allow for sufficient refills until the patient's next appointment, to a maximum of one year. If refills are not properly indicated on the prescription, the pharmacist must by law, contact the prescriber for refill authorization.

Specific regulations apply to various categories of prescription drugs. Your pharmacist would be pleased to review the regulations with you. Please refer to the chart *Saskatchewan College of Pharmacists – Prescription Regulations* (also published in this Supplementary Information section) for a summary of requirements.

SUBSTITUTION

Unless the prescriber directs otherwise, the pharmacist may select and dispense an interchangeable pharmaceutical product, other than the one prescribed, according to the Saskatchewan Prescription Drug Plan Formulary. An **interchangeable pharmaceutical product** is a product containing a drug or drugs in the same amounts, of the same active ingredients, in the same dosage form as that directed by the prescription. Those which conform to the criteria for interchangeability determined by the Saskatchewan Formulary Committee are designated as "interchangeable" in the Saskatchewan Formulary Listing.

A prescriber may request that a specific brand of a drug be dispensed by indicating in his own handwriting at the time of issuing a written prescription, or verbally at the time of giving a verbal prescription, No Substitution, No Sub, or N/S. In most cases, the patient is responsible for the incremental cost of "No Sub" prescriptions.

TRANSFER OF PRESCRIPTIONS

Schedule F drugs may be transferred from one pharmacist to another at the request of a patient. Prescriptions for benzodiazepines and other targeted substances may be transferred once. Prescriptions for Schedule 2 and 3 drugs and Narcotic and Controlled Drugs may **NOT** be transferred.

When a prescription is transferred, the original prescription shall remain on file, and on it shall be entered:

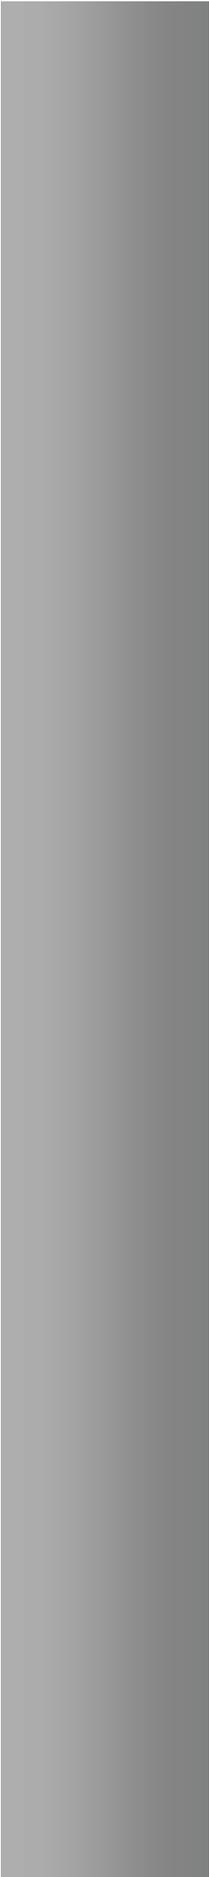

1. the date of the transfer;
2. an indication that no further sales nor transfers may be made under the prescription (i.e. the word "VOID");
3. the name of the pharmacy and pharmacist to whom the prescription was transferred;
4. the patient profile, manual or electronic, must also indicate the prescription is "VOID".

The pharmacist receiving the transferred prescription shall indicate:

1. the name of the pharmacist transferring the prescription;
2. the name and address of the pharmacy transferring the prescription;
3. the number of authorized repeats remaining, if any;
4. the date of the last fill or refill.

PRESCRIPTION REGULATIONS

Saskatchewan College of Pharmacists PRESCRIPTION REGULATIONS

A synopsis* of Federal and Provincial Acts and Regulations governing the Distribution of Drugs by Prescription in Saskatchewan

CLASS	DESCRIPTION	REQUIREMENTS
NARCOTIC DRUG** Examples: Codeine, Demerol, MS Contin, Novahistex DH, Percocet, Oxycontin, Tussionex, Tylenol #4, Lomofil, Darvon-N, Talwin, etc.	All straight narcotics, all narcotic drugs or compounds for parenteral use. Compounds containing more than one narcotic or compounds with less than two non-narcotic ingredients. All products containing diacetylmorphine, oxycodone, hydrocodone, methadone, or pentazocine. Refer to the Controlled Drugs and Substances Act and to the Schedule to the Narcotic Control Regulations.	Written prescription signed and dated by a practitioner. **Refer to the Prescription Review Program for complete prescription documentation requirements.
VERBAL PRESCRIPTION NARCOTIC** Examples: 282, 292, Fiorinal C 1/4, C 1/2, Tylenol #2 and #3, etc.	A combination product not intended for parenteral use, containing one narcotic (only) and two or more non-narcotic drugs in therapeutic dose, not including products containing diacetylmorphine, oxycodone, hydrocodone, methadone, or pentazocine. Refer to the Controlled Drugs and Substances Act and to the Schedule to the Narcotic Control Regulations.	Written or verbal prescription** from a practitioner. Verbal prescription must be reduced to writing by a pharmacist showing: - name and address of patient; - name, initials and address of prescriber; - name, quantity, and form of drug(s); - directions for use; - date; - prescription number; - name or initials of pharmacist **Refer to the Prescription Review Program. Written prescriptions are required under the program.
CONTROLLED DRUGS - LEVEL I** Examples: Dexedrine, Ritalin, etc.	Those drugs listed in Part I of the Schedule to Part G of the Food and Drug Regulations and Schedule III of the Controlled Drugs and Substances Act. They include amphetamines, methaqualone, methylphenidate, phendimetrazine, phenmetrazine, pentobarbital and secobarbital.	**Refer to the Prescription Review Program. Written prescriptions are required under the program.
CONTROLLED DRUG PREPARATION - LEVEL I**	A combination containing a controlled drug - Level I - as described above, and one or more active medicinal ingredients, in a recognized therapeutic dose, other than a narcotic or controlled drug.	
CONTROLLED DRUGS - LEVEL II** Examples: Phenobarb, Tenuate, Ionamin, Anabolic Steroids (i.e. Delatestryl), etc.	Those drugs listed in Parts II & III of the Schedule to Part G of the Food and Drug Regulations and Schedule IV of the Controlled Drugs and Substances Act. They include: butorphanol, chlorphentermine, diethylpropion, nalbuphine, phentermine, thiobarbituric acid, barbituric acid and its salts and derivatives (except secobarbital and pentobarbital).	
CONTROLLED DRUG PREPARATION - LEVEL II Examples: Fiorinal, Anabolic Steroids (i.e. Climacteron), etc.	A combination containing a controlled drug - Level II - as described above, and one or more active medicinal ingredients, in a recognized therapeutic dose, other than a narcotic or controlled drug.	As immediately above, plus, in the case of verbal prescriptions: - number and frequency of refills (if any) authorized. **Refer to the Prescription Review Program. Written prescriptions are required under the program.
BENZODIAZEPINES & OTHER TARGETED SUBSTANCES Examples: Benzodiazepines (except for Flunitrazepam, Clozapine & Olanzapine), Mazindol, Pipradol, etc.	Those drugs listed in Schedule I of the Benzodiazepines and Other Targeted Substances Regulations.	Written or verbal prescription from practitioner. Verbal prescriptions must be reduced to writing by a pharmacist showing date, prescription number, patient's name and address, name and quantity of drug(s), directions for use, prescriber's name, name and initials of pharmacist, and number of refills (if any). **Refer to the Prescription Review Program. Written prescriptions are required under the program.
PRESCRIPTION DRUGS Please see Schedule F	Those drugs listed in Schedule I of the Bylaws to the Pharmacy Act, 1996, including drugs listed in Schedule F to the Food and Drug Regulations.	Written or verbal prescription from practitioner. Verbal prescriptions must be reduced to writing by a pharmacist showing date, prescription number, patient's name and address, name and quantity of drug(s), directions for use, prescriber's name, name and initials of pharmacist, and number of refills (if any).
TRANSFER OF PRESCRIPTIONS	Only prescriptions for Schedule 1 may be transferred from one pharmacist to another at the request of a patient. Prescriptions for Narcotic and Controlled Drugs may NOT be transferred. Prescriptions for Benzodiazepines and Targeted Substances may only be transferred ONCE .	The pharmacist receiving the transferred prescription shall indicate: 1. the name of the pharmacist transferring the prescription; 2. the name and address of the pharmacy transferring the prescription; 3. the number of authorized repeats remaining, if any; 4. the date of the last fill or refill.

* This synopsis is a condensation of some of the pertinent Acts and Regulations. Users of the chart are reminded that it has been compiled for convenient reference only and that the official legislation should always be consulted for the purposes of interpreting and applying the laws.

** **Prescription Review Program:** Please refer to the Prescription Review Program in the Pharmacy Reference Manual for details.

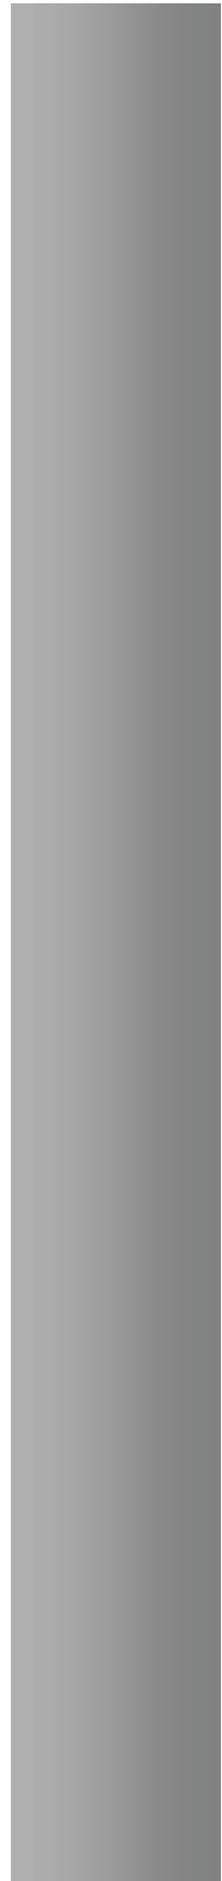

*** **RECORDS** - Narcotic Register includes either the approved manual or electronic (i.e. pharmacy computer) version.

May 20, 2009 Saskatchewan College of Pharmacists

REPEATS	RECORDS***
<p>No Repeats. All re-orders must be new, written prescriptions. However, a prescription may be <i>part-filled</i> subject to professional discretion.</p>	<p>All receipts/purchase records must be recorded and retained (invoices of purchases may be retained). All sales (except prescription sales of dextropropoxyphene) must be entered in an appropriate manual or computer record available for printing and review. Prescriptions filed in order of date and number in a special file designated for Narcotics and Controlled Drugs. If a part-fill is made, all records, including the prescription itself, must reflect the actual amount dispensed. Further a paper trail of all part-fills must be documented and retained in the prescription files and referenced to the original prescription.</p>
<p>No Repeats. All orders must be new, written prescriptions. However, a prescription may be <i>part-filled</i>, subject to professional discretion.</p>	<p>All Receipts/purchase records must be recorded and retained (invoices of purchases may be retained). Sales - no manual or computer record is required for sales pursuant to prescriptions, but emergency supplies provided to another pharmacist and returns to licensed dealers must be recorded as narcotic sales in the appropriate manual/computer record. Prescriptions filed in order of date and number in a special file designated for Narcotics and Controlled Drugs.</p>
<p>No repeats are allowed if original prescription is verbal. If written, the original prescription may be repeated if the prescriber has indicated in writing the number and frequency of repeats.</p> <p>**Refer to the Prescription Review Program. Written prescriptions are required under the program.</p>	<p>All receipts and all sales entered in appropriate manual or computer record (invoices of purchases may be retained). Prescriptions filed in order of date and number in a special file designated for Narcotics and Controlled Drugs.</p> <p>All Receipts/ purchase records must be recorded (invoices may be retained). Sales - no manual or computer record is required for sales pursuant to prescriptions, but emergency supplies provided to another pharmacist and returns to licensed dealers must be recorded as narcotic sales in the appropriate manual/computer record. Prescriptions filed in order of date and number in a special file designated for Narcotics and Controlled Drugs.</p>
<p>Repeats may be authorized on original prescription whether written or verbal, but authorization must indicate number and frequency of repeats.</p> <p>** Refer to the Prescription Review Program. Written prescriptions are required under the program.</p>	<p>All Receipts/ purchase records must be recorded and retained (Invoices may be retained). <p>When a prescription is transferred, the original prescription shall remain on file, and on it shall be entered:</p> <ol style="list-style-type: none"> 1. the date of the transfer; 2. an indication that no further sales nor transfers may be made under the prescription (i.e. the word "VOID"); 3. the name of the pharmacy and pharmacist to whom the prescription was transferred; 4. the patient profile, manual or electronic, must also indicate the prescription is "VOID". 	

**INFORMATION ABOUT REPORTING
ADVERSE DRUG REACTIONS**

INFORMATION ABOUT REPORTING ADVERSE REACTIONS

DEFINITION OF AN ADVERSE REACTION:

“A noxious and unintended response to a drug which occurs with use or testing for the diagnosis, treatment, or prophylaxis of a disease or modification of an organic function. This includes **any** undesirable patient effect suspected to be associated with drug use.”

The Canada Vigilance Program is part of Health Canada’s post-market surveillance program that collects and assesses reports of suspected adverse reactions to health products marketed in Canada. Adverse reactions to health products, including prescription and non-prescription medications, biologics (including fractionated blood products, as well as therapeutic and diagnostic vaccines), natural health products and radiopharmaceuticals, are monitored. Post-market surveillance enables Health Canada to monitor the safety profile of health products once they are marketed to ensure that the benefits of the products continue to outweigh the risks.

WHICH ADVERSE REACTIONS SHOULD BE REPORTED?

Adverse reaction reports are, for the most part, only SUSPECTED associations. Reporting an adverse reaction DOES NOT imply a causal link.

Practitioners should report the following suspected adverse reactions to Saskatchewan’s Canada Vigilance Regional Office:

- all suspected adverse reactions that are **unexpected**. An unexpected adverse reaction is an undesirable patient effect that is not consistent with product information or labelling;
- all suspected adverse reactions that are **serious**. A serious adverse reaction is an undesirable patient effect that contributes to death, significant disability or illness, or is life-threatening. All adverse drug reactions that result in, or prolong hospitalization or require significant medical intervention should be considered serious;
- all suspected adverse reactions to **recently marketed drugs** regardless of their nature or severity. A recently marketed drug is considered to be commercially available for **5 (five)** years or less.

HOW TO REPORT A SUSPECTED ADVERSE REACTION TO THE SASKATCHEWAN CANADA VIGILANCE REGIONAL OFFICE:

Please report suspected adverse reactions **as soon as possible after detection**, even if all details are not known at the time. Saskatchewan’s Canada Vigilance Regional Office staff will follow-up for further information if required.

There are three easy ways to report an adverse reaction to the Canada Vigilance Program:

- **By calling toll-free** at 1-866-234-2345
- **Online** at www.healthcanada.gc.ca/medeffect
- **By completing a form** which you can send by:
 - postage paid mail or
 - fax toll-free to 1-866-678-6789

The form and postage paid label are available at **www.healthcanada.gc.ca/medeffect** or by calling **1-866-234-2345**

The adverse reaction reporting form is also available at the back of the *Compendium of Pharmaceuticals and Specialties (CPS)*.
